## Researching Historical Issues (Advanced Higher) Unit

**SCQF:** level 7 (8 SCQF credit points)

**Unit code:** to be advised

### Unit outline

The general aim of this Unit is to develop a wide range of independent historical research skills.

Learners who complete this Unit will:

- 1 Develop independent research skills in the context of complex historical issues

This Unit is a mandatory Unit of the History (Advanced Higher) Course and is also available as a free-standing Unit. The Unit Specification should be read in conjunction with the *Course and Unit Support Notes*, which provide advice and guidance on delivery, assessment approaches and development of skills for learning, skills for life and skills for work. Exemplification of the standards in this Unit is given in *Unit Assessment Support*.

The *Course Assessment Specification* for the History (Advanced Higher) Course gives further mandatory information on Course coverage for learners taking this Unit as part of the Advanced Higher History Course.

### Recommended entry

Entry to this Unit is at the discretion of the centre. However, learners would normally be expected to have attained the skills, knowledge and understanding required by one or more of the following or equivalent qualifications and/or experience:

- ◆ Higher History Course

## **Equality and inclusion**

This Unit Specification has been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners should be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence. For further information, please refer to the *Course and Unit Support Notes*.

# Standards

## Outcomes and assessment standards

### Outcome 1

The learner will:

- 1 Develop independent research skills in the context of complex historical issues by:**
  - 1.1 Identifying an appropriate, complex historical issue for research
  - 1.2 Planning a programme of research
  - 1.3 Researching, collecting and recording information
  - 1.4 Evaluating, analysing and synthesising evidence
  - 1.5 Understanding approaches to organising, presenting and referencing findings, using appropriate conventions

### Evidence Requirements for the Unit

Assessors should use their professional judgement, subject knowledge and experience, and understanding of their learners, to determine the most appropriate ways to generate evidence and the conditions and contexts in which they are used.

Evidence is required to show that the learner has met the Outcomes and Assessment Standards. Learners are required to demonstrate the skills in each of the Assessment Standards and assessors must gather evidence of the attainment of these skills in appropriate ways.

This Unit requires the learner to develop a range of researching skills. The Unit focuses on the processes relevant to undertaking independent research. Evidence for this Unit may be generated through a range of activities, such as:

- ◆ completing checklists/folios/logbooks
- ◆ interviews undertaken by the assessor
- ◆ preparing interim reports while undertaking a piece of research
- ◆ presentations to the assessor or to other learners
- ◆ assessor observation

The assessor may use a checklist during learners' interviews or presentations. The evidence may be collected and retained in a variety of forms including written records and audio or digital recordings.

Evidence may be presented for individual Assessment Standards or gathered for the Unit as a whole.

Exemplification of assessment is provided in *Unit Assessment Support*. Advice and guidance on possible approaches to assessment is provided in the *Course and Unit Support Notes*.

## **Development of skills for learning, skills for life and skills for work**

It is expected that learners will develop broad, generic skills through this Unit. The skills that learners will be expected to improve on and develop through the Unit are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and drawn from the main skills areas listed below. These must be built into the Unit where there are appropriate opportunities.

### **1 Literacy**

1.1 Reading

1.2 Writing

### **4 Employability, enterprise and citizenship**

4.6 Citizenship

### **5 Thinking skills**

5.3 Applying

5.4 Analysing and evaluating

Amplification of these is given in SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work*. The level of these skills should be at the same SCQF level as the Unit and be consistent with the SCQF level descriptor. Further information on building in skills for learning, skills for life and skills for work is given in the *Course and Unit Support Notes*.
