## Introduction

This list of suggested Advanced Higher History dissertation titles offers scope for considerable research into major issues in the fields. It focuses on areas where there is sufficient evidence and historiography to produce a worthwhile dissertation.

Candidates are required to place their issue in its historical context; to use a range of appropriate sources, **both primary and secondary**; and to take account of historical interpretations. Candidates should also bring their analytical skills to bear on the issue and evidence, as this is often the single most valuable characteristic of a good dissertation.

This list is neither final nor definitive. It will be updated as further research and issues come to light. In the meantime, centres who wish to present dissertations with titles which are not included on the list may submit the proposed title to SQA by 1 November. Further details are available from SQA Co-ordinators.

**There is no need for centres to seek approval for titles which merely refine the issue in some way.**
