FOREWORD

This is the seventh volume of statistics on qualifications offered or accredited by the Scottish Qualifications Authority. The volume covers uptake, attainment and the characteristics of candidates undertaking SQA qualifications in 2002/03. We have made some amendments and additions this year, but have also been mindful of the need for consistency to allow comparisons over time.

The information contained here (and in the Annual Statistical Digest) is available on SQA's website: www.sqa.org.uk from where the data can be downloaded as Excel spreadsheets or pdfs. Additional analyses are available on request, subject to confidentiality, and are dependent on sufficient resources being available to carry out the work involved. An appropriate charge may be made.

Your comments on the scope and content of the Annual Statistical Report and Annual Statistical Digest are welcome and can be expressed either using the questionnaire available on the SQA website: www.sqa.org.uk or by writing to: SQA, Research and Information Services, Ironmills Road, Dalkeith, EH22 1LE.

John Young
Director of Qualifications

NATIONAL QUALIFICATIONS 2003

Entries from outside Scotland

Arrangements were made for 68 candidates entered by centres in Scotland to take examinations in the following countries:

Austria, Canada, Dubai, England, Germany, The Netherlands, Italy, Japan, Mallorca, New Zealand, Northern Ireland, Spain, The United States of America, and Wales.

Special Assessment Arrangements

Arrangements were made for 8,350 candidates with special needs.

Forty-two Braille question papers were issued for 14 candidates and 1,222 adapted question papers were issued for 293 candidates.

A total of 4,438 requests were submitted for absentee consideration. Of these, 4,323 were accepted for consideration.

The candidates for whom English was a second language, of which there were 802, were allowed the use of an English/Native Language dictionary with, in most cases, associated extra time.

	No. of candidates	No. of entries
Specific learning difficulties	5,742	27,532
Visual difficulties	102	535
Various other difficulties (including temporary difficulties)	2,506	11,116

INTRODUCTION

The Examination System

In 2003 all candidates moved over to the new National Qualifications at Access, Intermediate 1, Intermediate 2, Higher and Advanced Higher levels.

These new qualifications are bench-marked on Standard Grade as follows:

- Access 3 on Standard Grade Foundation level
- Intermediate 1 on Standard Grade General level
- Intermediate 2 on Standard Grade Credit level

Also:

- The new Higher replaces SCE Higher Grade
- Advanced Higher replaces Certificate of Sixth Year Studies (CSYS).

SCE Higher and Certificate of Sixth Year Studies (CSYS) were no longer available.

Maintenance of Standards

Maintaining the standards of its awards from year to year is one of SQA's essential functions. Candidates and users of SQA qualifications must be assured, for example, that as far as possible a grade B award in Higher Chemistry represents the same level of attainment in 2003 as in previous years. To this end SQA employs a combination of statistical analysis and examiners' professional judgement. In the light of their direct involvement in the assessment and awarding procedures, Principal Assessors report annually to Assessment Panels on the conduct of examinations and the performance of candidates in subjects concerned. The reports of Principal Assessors for these examinations were circulated to centres in Autumn 2003 and are available on the SQA website.

THE SCOTTISH CREDIT AND QUALIFICATIONS FRAMEWORK (SCQF)

The Scottish Credit and Qualifications Framework (SCQF) is a new way of understanding and comparing qualifications in Scotland. Its main purposes are to:

- make the relationships between the various qualifications that are available clearer
- make progression and transfer between qualifications easier by clarifying entry and exit points and routes for progression

The overall aim is that by 2004-05 most of the main Scottish qualifications will be within the SCQF – laying the foundations for Scotland to move to an overall unified education and training framework.

The level a qualification is assigned to in the framework is an indication of how hard it is to achieve. There are 12 levels, from level 1 for Access 1 to level 12 for doctorates. This is illustrated in the following table:

THE SCOTTISH CREDIT AND QUALIFICATIONS FRAMEWORK				
SCQF Level	SQA National Units, Courses and Group Awards	Higher Education	SVQs	SCQF Level
12		Doctorate		12
11		Masters	SVQ 5	11
10		Honours Degree Graduate Diploma/Certificate		10
9		Ordinary Degree Graduate Diploma/Certificate		9
8		Higher National Diploma Diploma in Higher Education	SVQ 4	8
7		Advanced Higher	Higher National Certificate Certificate in Higher Education	
6	Higher		SVQ 3	6
5	Intermediate 2 Credit Standard Grade		SVQ 2	5
4	Intermediate 1 General Standard Grade		SVQ 1	4
3	Access 3 Foundation Standard Grade			3
2	Access 2			2
1	Access 1		1	

The positioning of SVQs in the table gives a **broad** indication of their place in the framework. A major project is underway to clarify the position of SVQs within an overall UK context.

The table does not show every type of qualification, however, the main Scottish qualifications are represented.

The amount of **credit** attached to a qualification indicates how big it is, in terms of the amount of learning required. Credit is expressed in terms of SCOTCAT points – one point represents a notional 10 hours of learning required of the learner to achieve the outcomes contained in the qualification.

Further information is available on the SCQF website www.scqf.org.uk.

Useful publications/additional information:

- *An Introduction to the Scottish Credit and Qualifications Framework*, October 2000, AE1243/2 (this gives an overview of the SCQF)
- *Crediting Learning*, May 2003, AD1432/3 (a leaflet for employers)
- *SCQF Update, National Implementation Plan: Update*, August 2002, AE1671
- *SCQF National Plan for Implementation of the Framework*, December 2002, AE1705.

Commentary and Tables

NATIONAL UNITS

National Units are internally assessed and subject to external moderation, they are awarded on the basis of evidence of the successful attainment of all the Outcomes. The Performance Criteria define the standard of performance required to attain the Outcomes. Almost all National Units have a notional delivery length of 40 hours.

Reporting for National Units has changed from previous years. The new reporting technique is as follows:

- 'Entries' are the entries processed within a year (eg 1/8/02–31/7/03), ie the first time SQA obtains information about a candidate's entry into a particular qualification from the centre.
- 'Awards' are awards certificated within a year (eg 1/8/02–31/7/03), ie the certificate is actually awarded within that time period.

Entry data for previous years have been amended in the trend tables and full years' data can be accessed from the SQA website.

Tables NU1 to NU6 provide detailed information about National Unit entries and awards for 2003 (between 1 August 2002 and 31 July 2003). Details from the tables and explanations of the figures are given below.

Table NU1

This table shows a three-year trend in National Unit entries and awards by centre type.

- National Unit entries have continually increased over the last three years. This year saw an increase in entries of 2%.
- National Unit entries from the school sector have increased over the last year, by 3%. Entries from the FE sector, on the other hand, have shown a small decrease.
- There has been a continual drop in entries and awards in the Workplace/Training Provider sector since 2001. 2003 saw a decrease in entries of 30% and a decrease in awards of 48%.

Table NU2

This table shows a three-year trend in National Unit entries by Superclass (a classification system used in Scottish and UK vocational education and training databases).

- The most popular Superclass was Sciences and Mathematics, followed by Authorship/Photography/Publishing/Media, and Area Studies/Cultural Studies/Languages/Literature.
- The most significant drop in entries within a Superclass (with over 1000 entries) was in Area Studies/Cultural Studies/Languages/Literature – a drop of 21%.

Table NU3

The two tables NU3a and NU3b show National Unit entries grouped by Superclass and level.

- 41% of National Unit entries were at Higher level. This reflects that the largest uptake in National Courses is at Higher level.
- FE candidate National Unit entries at Higher level, however, only accounted for 28% of all FE National Unit entries
- Less than 0.5% of National Unit entries for FE candidates were at Advanced Higher level, compared with 4% for all candidates.

Table NU4

Tables NU4a to NU4g list the top fifty Units for Access 1 through to Advanced Higher. These seven tables show the entry figures for all candidates, male candidates, and female candidates, respectively.

- The most popular individual Access 1 Units were: Working with Materials – Identifying Materials; Healthy Basic Cooking – Producing a Meal; and Healthy Basic Cooking – Using a Cooker/Microwave. 55% of Access 1 Unit entries were from male candidates.

- The most popular individual Access 2 Units were: Using a Computer; Using Mathematics in Everyday Situations 1; and English: Language Study. 62% of Access 2 Unit entries were from male candidates.
- The most popular individual Access 3 Units were: Work Experience; Using a Keyboard; and Using Mathematics 1. 54% of Access 3 Unit entries were from male candidates.
- The most popular individual Intermediate 1 Units were: Making Moral Decisions; Work Experience; and Information Technology. 52% of Intermediate 1 Unit entries were from female candidates.
- The most popular individual Intermediate 2 Units were: Mathematics 1; Mathematics 2; and English: Language Study. 52% of Intermediate 2 Unit entries were from female candidates.
- The most popular individual Higher Units were: English: Literary Study; English: Language Study; and English: Personal Study (written response). 55% of Higher Unit entries were from female candidates.
- The most popular individual Advanced Higher Units were: Mathematics 1; Mathematics 2; and Mathematics 3. 51% of Advanced Higher Unit entries were from female candidates.

Table NU5

This table gives entries by level and result for all candidates, male candidates, and female candidates, respectively.

- 88% of candidate entries for National Units resulted in a pass. Advanced Higher had the highest pass rate for any particular level, at 97%.
- Female candidates had better pass rates than males at the following Unit levels: Unlevelled, Access 2, Access 3, Intermediate 1, Intermediate 2, and Advanced Higher.

Table NU6

The four tables NU6a to NU6d give the number of Units entered for all candidates, by gender, age, and centre type.

- School candidates, on average, did more National Units than FE candidates (1.7 Units more).
- The largest percentage of candidates entered for National Units by age group are under 16's in the school sector and over 25's in the FE sector.
- Over all sectors, 16 year old candidates entered for the most National Units, on average (11.9 Units per candidate).

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
- 0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

TABLE NU4a: NATIONAL UNIT ENTRIES BY GENDER AND TITLE, 2003

TOP 50 ACCESS 1 (SCQF Level 1) UNITS

UNIT TITLE	TOTAL ENTRIES	MALE ENTRIES	FEMALE ENTRIES
Working with Materials – Identifying Materials	204	103	101
Healthy Basic Cooking – Producing a Meal	162	91	71
Healthy Basic Cooking – Using a Cooker/Microwave	161	83	78
Working with Materials – Using Materials	155	69	86
Using Mathematics in Everyday Situations 1 – Time	135	70	65
English and Communication: Oral Communication – Delivering	135	75	60
Physical Education: Integrated Performance – Participation	115	62	53
Personal Hygiene – Commonly Used Products	107	48	59
Developing Drama Skills – Participating with Others	101	47	54
Healthy Basic Cooking – Planning a Meal	92	50	42
English and Communication: Oral Communication – Responding	92	59	33
Using Mathematics in Everyday Situations 1 – Weight and Measurement	86	47	39
Using Mathematics in Everyday Situations 1 – Money	85	47	38
Questioning the World – Understanding Community	84	52	32
Working with Craft Tools – Using Tools	82	69	13
Living Safely at Home – Safe Use of Household Appliances	82	43	39
Physical Education: Integrated Performance – Personal Organisation	81	47	34
Healthy Living – Identifying Healthy Living Principles	80	35	45
Working with Materials – Selecting Materials	69	32	37
English and Communication: Language Study – Understanding Text	68	42	26
English and Communication: Literary Study – Responding to an Imaginative Text	61	38	23
Personal Hygiene, – Carrying Out Activities	57	26	31
Social Awareness and Development: Using Support Services in the Local Community – Identifying Services	56	34	22
Modern Languages: Life in Another Country – Aspects of Life	56	36	20
Music: Performing and Creating – Creating	56	36	20
Physical Education: Integrated Performance – Progress Towards Targets	56	33	23
Personal Hygiene – Planning Activities	54	25	29
Living Safely at Home – Common Dangers in the Home	52	28	24
Personal Awareness and Development: Personal Profiling for Independent Living – Carrying Out Tasks	52	18	34
Using a Computer – Basic Operations	50	21	29
Using Technological Equipment – Identifying Equipment	50	26	24
English and Communication: Language Study – Conveying Information in Writing	48	31	17
Developing Drama Skills – Expressing Ideas and Emotions	48	27	21
Developing an Environmental Area – Propagation	48	35	13
Developing an Environmental Area – Planting Out	46	30	16
English and Communication: Literary Study – Expressing a Point of View	41	24	17
Personal Awareness and Development: Making Local Journeys – Undertaking Local Journeys	39	22	17
Developing an Environmental Area – Preparation	37	28	9
Developing Drama Skills – Using Resources	36	16	20
Using Computer Aided Learning: Using Educational Programs	36	22	14
Healthy Basic Cooking – Reviewing the Production of a Meal	35	20	15
Music: Listening and Performing – Performing	35	22	13
Developing Drama Skills – Reviewing Participation	35	15	20
Working with Craft Tools – Identifying Tools	32	19	13
Living Safely at Home – Simple First Aid	29	12	17
Daily Organisation – Identifying Materials	29	13	16
Personal Awareness and Development: Making Local Journeys – Planning Local Journeys	29	17	12
Social Awareness and Development: Using Support Services in the Local Community – Accessing Services	28	17	11
Healthy Living – Healthy Living in the Home	28	12	16
Vocational Awareness and Development: Contributing to an Enterprise Activity – Planning	28	21	7
All Access 1 Units	4,311	2,353	1,958

GROUP AWARDS

Reporting for Group Awards has changed from previous years. The new reporting technique is as follows:

- 'Entries' are the entries processed within a year (eg 1/8/02–31/7/03), ie the first time SQA obtains information about a candidate's entry into a particular qualification from the centre.
- 'Awards' are awards certificated within a year (eg 1/8/02–31/7/03), ie the certificate is actually awarded within that time period. Entry data for previous years have been amended in the trend tables and full years' data can be accessed from the SQA website.

Table GA1 Table GA2

These tables give information about entries and awards for General Scottish Vocational Qualifications (GSVQs). GSVQs are Group Awards made up of National Units (formerly National Certificate Modules) with an additional integrative assessment at levels II and III. They are taken mainly in colleges. They are broadly-based qualifications which group together skills that apply equally well to a number of different jobs or courses of further study within a certain area.

- There continued to be a large decrease in GSVQ entries and awards this year. 2003 saw a 55% decrease in entries and a 58% decrease in awards. This decrease is due to centres gradually replacing GSVQs with Scottish Group Awards (SGAs).
- 59% of GSVQ candidates were aged under 20. Overall, more female candidates were entered for GSVQs than male (72% female, 28% male).
- The qualification with the highest number of entries was the National Certificate (level III) Care: Social Care with 168 entries.

Table GA3 Table GA4

These tables give information about entries and awards for National Certificate Group Awards – these Group Awards are taken mainly in FE colleges. They are designed to meet specific needs of particular employment sectors. (The tables also include information about the Skillstart awards.)

- There has been a slight decrease in the number of entries and awards in 2003, a drop of 7% in entries and 5% in awards.
- 77% of NCGA candidates were aged under 20. Overall, more male candidates were entered for NCGAs than female (89% male, 11% female).
- The qualification with the highest number of entries was the National Certificate in Engineering Practice with 493 entries.

Table GA5 Table GA6

These tables give information about entries and awards for National Certificate Clusters – these Group Awards are made up of three National Units (formerly National Certificate Modules). As each Unit is based on a notional 40 hours duration, National Certificate Clusters are completed in around 120 hours.

- There has been a decrease in the number of entries and awards in 2003, a drop of 31% in entries and 30% in awards.
- NCC entries were made by either FE colleges or private sector training providers (PSTP). Awards come from FE colleges, PSTPs, or Voluntary Sector Organisations.
- 74% of NCC candidates were aged under 20. Overall, more male candidates were entered for NCCs than female (62% male, 38% female).
- There were only two NCC qualifications with entries this year: Numberstart 1 and Wordstart 1. This was the last year that either of these qualifications was available.

Table GA7

Table GA8

These tables give information about entries and awards for Scottish Group Awards (SGAs). SGAs are Group Awards made up of National Courses and National Units.

A specified Core Skills profile must also be achieved to gain an SGA. There are named SGAs and general SGAs.

- Both entries and awards notably increased in 2003 (51% increase in entries, 47% increase in awards).
- 77% of candidates were aged under 20. Overall, more female candidates were entered for SGAs than male (55% female, 45% male).
- The qualification with the highest number of entries was Care (Intermediate 2) with 619 entries.

Table GA9

Table GA10

These tables give information about entries and awards for Scottish Progression Awards (SPA). SPAs are Group Awards made up of either SVQ Units, National Units or HN Units.

- Both entries and awards increased in 2003 (50% increase in entries, 227% increase in awards). The large increase in awards reflects a similar size of increase in entries in 2002.
- SPA entries and awards come from FE colleges, Workplace/Training Providers, or voluntary sector organisations.
- 85% of candidates were aged over 30. Overall, more female candidates were entered for SPAs than male (87% female, 13% male).
- The qualification with the highest number of entries was Home Care Practice with 265 entries.

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

ACCESS CLUSTERS

Access Units are 40-hour internally-assessed Units which sit below Intermediate 1 in the National Qualifications framework. Access Clusters are groups of three related Access Units which together form a coherent package. They differ from National Courses in that they have no external assessment component. Access Clusters are available at levels 2 and 3, with Access 3 being benchmarked on Standard Grade Foundation level. More detailed information on Access 1 can be viewed in table NU4a.

Access 2 Clusters are at level 2 on the Scottish Credit and Qualifications Framework. Access 3 Clusters are at level 3 on the Scottish Credit and Qualifications Framework.

Reporting for Access is as follows:

- 'Entries' are the entries for a year (eg 1/8/02-31/7/03), ie the centre estimates that the candidate will complete the award within that time period.
- 'Awards' are entries which have been successfully resulted.

Tables AC1 to AC8 provide detailed information about uptake and attainment in Access Clusters.

Table AC1

Table AC2

This table shows a four-year trend in Access 2 Cluster entries by centre type.

- There were 2,264 entries at Access 2 in 2003, a 34% increase from 2002.
- 96% of entries came from the school sector. However, there has been growth within the FE sector this year, and new entries from voluntary vector organisations.
- 42% of Access 2 candidates were aged 15. There were more entries from male candidates than female candidates this year (65% male, 35% female).

Table AC3

This table shows a four-year trend in Access 2 Cluster entries by subject.

- There have been large increases in entries for many of the Access 2 subjects, especially French, Personal and Social Education, Science, and Social Subjects.
- Surprisingly there was a drop in English entries from 424 in 2002 to 390 in 2003. Entries in Mathematics, however, continued to rise this year, from 350 to 460.

Table AC4

This table shows a four-year trend in Access 2 Cluster awards by subject.

- There has been a considerably smaller increase in awards this year. This would suggest that, although the entry numbers are increasing, fewer candidates are successfully completing the Cluster within an academic year.
- The largest percentage increase in awards in 2003 was in Social Subjects, an increase of 188%.

Table AC5

Table AC6

This table shows a four-year trend in Access 3 Cluster entries by centre type.

- There were 9,154 entries at Access 3 in 2003, a 157% increase from 2002, with almost all entries from the school sector.
- 59% of Access 3 candidates were aged 15. There were more entries from male candidates than female candidates this year (60% male, 40% female).

Table AC7

This table shows a four-year trend in Access 3 Cluster entries by subject.

- There have been increases in entries for all but one of the Access 3 subjects. Gaelic (Learners) has continued to decrease in entries over the past three years.
- Out of the 26 Access 3 Clusters, three subjects had entries this year which had no presentations in the previous year, and 15 subjects more than doubled the numbers of entries received.

Table AC8

This table shows a four-year trend in Access 3 Cluster awards by subject.

- The number of Access 3 Cluster awards has more than doubled in 2003.
- Since the number of entries in all subjects except Gaelic (Learners) went up, it would be expected that the number of awards for subjects would go up also. However, although there was the expected decrease in awards for Gaelic (Learners), there were also decreases in awards for the following subjects: Business, Managing Environmental Resources, Personal and Social Education, and Spanish. This would suggest that the completion rate, within an academic year, for these subjects has substantially dropped.

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
- 0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

STANDARD GRADE

Standard Grade is taken after four years of secondary education when candidates are, on average, 15–16 years old. It is based on a criterion-referenced system and is structured in such a way that almost all candidates in the age group take the examination. The results are reported on a scale of 1 to 7, with 1 the highest, in a profile of performance which gives grades for Elements of a subject, as well as an overall award. In most subjects, one of these Elements is internally-assessed with moderation by SQA.

Standard Grade Credit level is at Level 5 on the Scottish Credit and Qualifications Framework.

Standard Grade General level is at Level 4 on the Scottish Credit and Qualifications Framework.

Standard Grade Foundation level is at Level 3 on the Scottish Credit and Qualifications Framework.

Standard Grade had candidate uptake in 36 subjects this year, with two additional variants of English for candidates with special needs. 2003 saw the restructure of the modern language Standard Grade Courses. This entailed the inclusion of the writing Element as part of the Course, rather than as an optional Element. This change affected all modern languages except Gaelic (Learners).

Tables SG1 to SG7 provide detailed information about uptake and attainment in Standard Grade.

Table SG1

This table shows a five-year trend in Standard Grade entries by subject.

- There were 453,450 subject entries at Standard Grade in 2003, a very slight decrease compared with 2002. This is the second consecutive year that there has been a decrease in Standard Grade entries.
- The most considerable drop in entry numbers, in subjects with more than 1000 entries, was in Standard Grade Science. This is due to candidates being presented for Intermediate level individual science subjects instead.

- There were also large decreases in Economics (down 27%), Contemporary Social Studies (down 18%), Italian (down 17%), and Technological Studies (down 16%).
- There was a quite substantial increase in numbers being presented for Standard Grade Religious Studies this year, an increase of 30%.
- Art, Music, and Drama have shown a slow but steady increase over the five-year trend period.

Table SG2

This table shows the number of entries for each subject by stage.

- As would be expected, Standard Grade Courses were mainly entered for by S4 candidates. 99% of Standard Grade entries were from S4.

Table SG3

Table SG4

These tables illustrate the grade distributions for Standard Grade subjects and their Elements. Differences among subjects and Elements can be explained by differences in the nature of the candidature and the nature of the subjects/Elements.

- 44% of subject entries resulted in a Credit award (grade 1–2), 40% in a General award (grade 3–4), and 13% a Foundation award (grade 5–6).
- Candidates obtained considerably better grades in the Practical Abilities Element of the sciences, Computing, Business Management, Administration, Craft and Design, and Accounting and Finance. This is also true of the Investigating Element in Classical Studies and Religious Studies, and the Practical Performance Element in Physical Education. These Elements are all directly graded, which means that they are often based on assessment instruments which are unchanged from year to year.

Table SG5

These tables (SG5a, SG5b, SG5c) describe gender differences in subject choice, grade distribution, and average grade at Standard Grade.

- More males than females took Technological Studies, Craft and Design, Physics, and Physical Education. Male candidates performed better than females in Physical Education; however, in Technological Studies the candidate groups performed equally well; and in Physics and Craft and Design the female candidates obtained better results than male candidates.
- More females than males took Home Economics, Religious Studies, Administration and Biology. Females performed better compared to males in all these subjects except Biology where candidate performance was fairly similar.
- Over all Standard Grade subjects, female candidates out-performed males, especially at Credit level where, for females, almost 50% of entries resulted in Credit level awards.

Table SG6

The four tables (SG6a to SG6d) describe the number of entries; Credit level awards; Credit and General awards; and Credit, General, and Foundation awards gained by all candidates.

- Standard Grade candidates took on average 7.2 subjects (excluding the Writing components).
- 82.6% of candidates were entered for seven or more Standard Grades (down 4.1 percentage points from 2002).
- A larger percentage of female candidates than male entered for seven or more subjects (by 3 percentage points).
- 78.3% of candidates gained at least seven Standard Grades at grades 1 to 6 (down 3.9 percentage points from 2002).
- 59.2% of candidates gained at least seven Standard Grades at grades 1 to 4.

- 22.7% of candidates gained at least seven Standard Grades at grades 1 to 2.
- Female candidates, on average, obtained 3.5 Credit Standard Grade awards while male candidates, on average, obtained only 2.8.

Table SG7

Assessment appeals were made on behalf of 2.7% of externally-assessed Standard Grade Elements, a substantial decrease from 2002, and 54% resulted in an upgrade. The two main contributing factors which led to this decrease in numbers of appeals were: the new SQA policy which advised centres to appeal on behalf of no more than 10% of subject entries without a suitable rationale; and centres being advised not to appeal where a successful Element appeal would not change the overall Standard Grade Course award.

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
- = no entries (table SG 2 only)
- 0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

TABLE SG1: TREND IN ENTRIES FOR EACH SUBJECT AT STANDARD GRADE, 1999 TO 2003

ALL CANDIDATES

TABLE SG7 : TREND IN APPEALS AND THEIR SUCCESS AT STANDARD GRADE, 1999 TO 2003

	1999	2000	2001	2002	2003
Number of appeals	29,539	41,571	40,763	46,770	25,377
– as percentage of externally assessed Element entries	3.3%	4.5%	4.3%	5.0%	2.7%
Successful appeals	15,911	20,438	20,804	24,288	13,777
– as percentage of all appeals	54%	49%	51%	52%	54%

INTERMEDIATE 1

All tables reporting on Intermediate 1 are Course-based analyses, ie candidates must obtain passes in all internally-assessed Units as well as attempting the external Course assessment. Because of this, these tables exclude any candidate who re-sat the external assessment and did not improve on their previous position.

Intermediate 1 is at Level 4 on the Scottish Credit and Qualifications Framework.

Intermediate 1 was designed primarily for candidates in the fifth and sixth year of secondary education and adults. Awards are made at three passing grades, A to C. Only overall awards are reported; there is no profile of performance. This was the fourth year Intermediate 1 had been available to candidates, with entries from 436 centres. Intermediate 1 had candidate uptake in 39 subjects.

Tables IA1 to IA8 provide detailed information about uptake and attainment in Intermediate 1.

Table IA1

This table shows the entry figures for each subject in the first four years of Intermediate 1.

- There were 24,613 entries at Intermediate 1 in 2003, an increase of 21%. Although this is not as large a percentage increase as in 2001 (27%), Intermediate 1 is still a strong growth area.
- Mathematics and English entries made up 40% of the total entries (compared with 47% in 2002).
- The largest percentage increases in entries were from the science subjects: Biology, Chemistry and Physics; and from French and German.
- There were small entry decreases in Physical Education, Accounting and Finance, and Geography.

Table IA2

This table shows the pass rate for each subject in the first four years of Intermediate 1 – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- The Intermediate 1 pass rate has risen slightly, by one percentage point, this year. Given the increase in entry numbers, and the steady pass rate over the past three years, this indicates that this level of qualification, overall, has ‘bedded in’.
- The pass rates for both English and Mathematics improved on last year.
- Changes to the pass rates of individual subjects are not unexpected when uptake has risen sharply – in French, for example, the pass rate fell from 83% in 2002 to 55% in 2003.

Table IA3

This table shows the number of entries for each Intermediate 1 subject by entry stage.

- Intermediate 1 Course entries were mainly comprised of either S5 (57%) or S4 (30%) entries.
- 92% of English entries were from S5, while 89% of Physics entries were from S4.
- The following subjects’ entries were all or predominately from FE centres: Managing Environmental Resources, Psychology, Sociology, Care, Personal and Social Education.

Table IA4

These tables describe Intermediate 1 pass rates and grade distributions by subject – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- Pass rates in subjects with 100 or more entries ranged from 93% in Home Economics – Fashion and Textile Technology, to 47% in Physics.
- The percentage gaining grade A in subjects with 100 or more entries ranged from 79% in Physical Education, to 9% in Physics.
- 347 centres entered candidates for English and 370 for Mathematics, while subjects such as Economics and Russian, for example, had entries from only one centre.

Table IA5

These three tables (IA5a, IA5b, IA5c) describe gender differences in subject choice and attainment at Intermediate 1.

- There were predominately more male candidates taking Woodworking Skills (88%), Physical Education (78%) and Physics (79%) than female. There were also more male candidates entered for English than female in 2003 (60% male, 40% female).
- Almost all Home Economics – Fashion and Textile (98%), Home Economics – Lifestyle and Consumer Technology (96%), and Care (93%) candidates were female.
- The average pass rate for female candidates across all subjects was 7 percentage points higher than that for males (70% compared to 63%).
- The average grade A rate for female candidates across all subjects was 8 percentage points higher than for males (29% compared to 21%).

Table IA6

These three tables (IA6a, IA6b and IA6c) give the average number of entries and passes at Intermediate 1 by age and gender, where age is taken at 31 December 2002.

- 40% of Intermediate 1 candidates were aged 15 and 42% of Intermediate 1 candidates were aged 16. Of these two age groups, the 16 year olds had a better average pass rate than the 15 year olds, by 4 percentage points.
- 49% of all Intermediate 1 candidates were male, 51% were female.
- Candidates entered for, on average, 1.4 Intermediate 1 subjects – down slightly on last year (1.5 in 2002).
- Candidates passed, on average, 0.9 Intermediate 1 subjects – a decrease of 0.1 from 2002.

Table IA7

These tables (IA7a to IA7c) describe the number of entries, passes, and grade A awards gained by all candidates.

- Of the 17,693 candidates, 73% entered only one Intermediate 1 subject.
- Less than 10% of Intermediate 1 candidates entered for three or more subjects.
- 75% of candidates achieved at least one Intermediate 1 pass.

- 32% of candidates achieved at least one Grade A pass (up from 31% in 2002).
- 37% of female candidates, and only 27% of male candidates, achieved at least one Intermediate 1 Grade A pass. On average, males achieved 0.3 'A' passes, and females 0.4.

Table IA8

Assessment appeals were made on behalf of 5.8% of Intermediate 1 entries (10.8% in 2002) and 33% resulted in an upgrade. One of the main contributing factors which led to this decrease in the number of appeals was the new SQA policy which advised centres to appeal on behalf of no more than 10% of subject entries without a suitable rationale.

Symbols used in the tables

The following symbols are used in the tables.

–	=	not applicable
–	=	no entries (table IA2 only)
0%	=	less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

Successful appeals	485	680	619	479
– as percentage of all appeals	47%	35%	28%	33%

INTERMEDIATE 2

All tables reporting on Intermediate 2 are Course-based analyses, ie candidates must obtain passes in all internally-assessed Units as well as attempting the external Course assessment. Because of this, these tables exclude any candidate who re-sat the external assessment and did not improve on their previous position.

Intermediate 2 is at Level 5 on the Scottish Credit and Qualifications Framework.

Intermediate 2 was designed primarily for candidates in the fifth and sixth year of secondary education and adults. Awards are made at three passing grades, A to C, and compensatory awards are available for narrow failures, where candidates receive an A grade in the Intermediate 1 level of the Course, if this is available. Only overall awards are reported; there is no profile of performance. This was the fourth year Intermediate 2 had been available to candidates, with entries from 456 centres. Intermediate 2 had candidate uptake in 64 subjects, including 11 Project-based National Courses (PBNC):

Amenity Horticulture
Care Issues for Society
Construction Craft Skills
Construction Industry Practice
Design
Fabrication and Welding
Fitness and Exercise
Health and Safety in Care Settings
Leading Sports Activities
Plant Propagation
Selling Overseas Tourist Destinations

Tables IB1 to IB8 provide detailed information about uptake and attainment in Intermediate 2.

Table IB1

This table shows the entry figures for each subject in the first four years of Intermediate 2.

- There were 72,327 entries at Intermediate 2 in 2003, a 7% increase from 2002.
- The largest numbers of entries were in English and Mathematics, accounting for 37% of all Intermediate 2 entries.

- Among the subjects with the largest percentage increases in entries were two PBNCs: Care Issues in Society, and Health and Safety in Care Settings.
- The largest percentage decreases in entries, in subjects with over 100 entries, were from Sociology (down 24%); Home Economics – Health and Food Technology (down 17%); and Engineering Craft Skills (down 15%).

Table IB2

This table shows the pass rate for each subject in the first four years of Intermediate 2 – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- The average pass rate for all Intermediate 2 subjects was 72%. There has been an increase of one percentage point in the pass rate every year since 2001. Although there has been a continual increase, it is small and the overall pass rate at Intermediate 2 is remaining fairly steady.
- Some of the high uptake subjects, however, have shown substantial changes in pass rates between 2002 and 2003: Chemistry (from 55% to 66%); Graphic Communication (75% to 67%); Information Systems (71% to 77%).

Table IB3

This table shows the number of entries for each Intermediate 2 subject by entry stage.

- Intermediate 2 entries were mainly comprised of S5 (72%), S6 (13%), FE college (9%), and S4 (5%) entries.
- 89% of English and 81% of Mathematics entries were from S5.
- The following Intermediate 2 subject entries were all from FE centres: Amenity Horticulture, Plant Propagation, Automotive Engineering, Care Issues from Society, Construction Craft Skills, Construction Industry Practice, Fabrication and Welding, Health and Safety in Care Settings, Hospitality – Professional Cookery, Hospitality – Reception and Accommodation Operations, Selling Overseas Tourist Destinations, Fitness and Exercise, and Leading Sports Activities.

Table IB4

These tables describe Intermediate 2 pass rates and grade distributions by subject – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- Pass rates in subjects with 100 or more entries ranged from 94% in Hospitality – Practical Cookery, to 51% in Media Studies.
- The percentage gaining a grade A in subjects with 100 or more entries ranged from 60% in Sociology, to 3% in Home Economics – Health and Food Technology.

Table IB5

These three tables (IB5a, IB5b, IB5c) describe gender differences in subject choice and attainment at Intermediate 2.

- Almost all Technological Studies (96%) and Engineering Craft Skills (95%) candidates were male. The grade A rate for Engineering Craft Skills and the pass rate for Technological Studies was higher for female candidates than for males.
- More female candidates entered for Home Economics – Fashion and Textile Technology (98%), and care qualifications: Care (92%), Care Issues for Society (91%), and Health and Safety in Care Settings (91%). Male candidates had a greater grade A rate and pass rate than female candidates for Care.
- The average pass rate for female candidates over all subjects was 3 percentage points higher than for males.
- The average grade A rate for female candidates over all subjects was 4 percentage points higher than for males.

Table IB6

These three tables (IB6a, IB6b and IB6c) give the average number of entries and passes at Intermediate 2 by age and gender, where age is taken at 31 December 2002.

- 17% of Intermediate 2 candidates were aged 15, 57% were aged 16, and 18% were aged 17.
- Candidates entered for, on average, 1.9 Intermediate 2 subjects, the same average number as in 2002.

- The average number of entries for a 16 year old candidate was 2.1, slightly higher than the average for all candidates.

Table IB7

These tables (IB7a to IB7c) describe the number of entries, passes, and grade A awards gained by all candidates.

- Almost a quarter (24%) of Intermediate 2 candidates entered for three or more subjects.
- 12% of candidates passed three or more Intermediate 2 subjects.
- 1% of candidates gained a grade A in three or more Intermediate 2 subjects.

Table IB8

Assessment appeals were made on behalf of 6.7% of Intermediate 2 entries (9.6% in 2002), and 44% resulted in an upgrade. One of the main contributing factors which led to this decrease in numbers of appeals was the new SQA policy which advised centres to appeal on behalf of no more than 10% of subject entries without a suitable rationale.

Symbols used in the tables

The following symbols are used in the tables.

n/a	=	no fallback award available
–	=	not applicable
–	=	no entries (table IB 2 only)
0%	=	less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

HIGHER

All tables reporting on Higher are Course-based analyses, ie candidates must obtain passes in all internally-assessed Units as well as attempting the external Course assessment. Because of this, these tables exclude any candidate who re-sat the external assessment and did not improve on their previous position.

Higher is at Level 6 on the Scottish Credit and Qualifications Framework.

The Higher was designed for candidates in the fifth and sixth year of secondary education and adults. Awards are made at three passing grades, A to C, and compensatory awards are available for narrow failures, where candidates receive an A grade in the Intermediate 2 level of the Course, if this is available. Only overall awards are reported; there is no profile of performance. This was the fourth year Higher had been available to candidates, with entries from 457 centres. The Higher level had candidate uptake in 77 subjects, including 17 Project-based National Courses (PBNC):

Advertising, Marketing and
Public Relations
Care Practice
Dance Practice
Design
Fitness and Exercise
Food Production Supervision
Hairdressing: Principles of Colouring Hair
Mental Health Care
Photography for the Media
Professional Patisserie
Quantity Surveying
Retail Travel
Selling Scheduled Air Travel
Sports Coaching Studies
Sports Organisation
Structural Engineering
Visual Arts

Tables NH1 to NH8 provide detailed information about uptake and attainment in Higher.

Table NH1

This table shows the entries figure for each subject in the first four years of Higher.

- There were 166,885 entries at Higher in 2003, an increase of 2% on 2002. This is a smaller increase than seen last year (11%), which indicates that entry figures for Higher may be settling down.
- The largest percentage increases, from subjects with more than 100 entries, were from two of the care PBNCs: Early Years Care and Education (118%) and Mental Health Care (107%).
- There were small percentage decreases in entries in the three main science subjects: Biology (4% decrease), Chemistry (3% decrease), and Physics (1% decrease).

Table NH2

This table shows the pass rate for each subject in the first four years of Higher – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- The average pass rate for all Higher subjects was 72%. There has been a decrease of one percentage point in the pass rate since 2002.
- The pass rate for Mathematics increased slightly, from 66% to 67%. The English pass rate fell, however, from 68% to 62%.

Table NH3

This table shows the number of entries for each Higher subject by entry stage.

- Higher courses were mainly comprised of S5 (63%) and S6 (30%) entries.
- Although most of the PBNCs and vocational Highers had entries solely from FE centres, some – Design, Visual Arts, and Sports Organisation – also received entries from school candidates.

Table NH4

These tables describe Higher pass rates and grade distributions by subject – pass rates varied considerably among subjects, reflecting the nature of the candidature and subject.

- Pass rates in subjects with 100 or more entries ranged from 94% in Music, to 57% in Media Studies.
- The percentage gaining grade A in subjects with 100 or more entries ranged from 60% in Gaelic (Learners), to 10% in Media Studies.

Table NH5

These three tables (NH5a, NH5b, NH5c) describe gender differences in subject choice and attainment at Higher.

- Male candidates had more entries than females for Physics (72%), Physical Education (71%) and technological subjects (Technological Studies (95%); Graphic Communication (71%); Computing (76%); Information Systems (68%); and Craft and Design (68%).
- There were more female candidates entered for languages, arts, and care subjects.
- The average pass rate for female candidates over all subjects was 4 percentage points higher than for males.
- The average grade A rate for female candidates over all subjects was 3 percentage points higher than for males.
- Male candidates out-performed female candidates, both at percentage of grade As and percentage of passes, in the following subjects: Italian, Economics, Care Practice, and Home Economics – Lifestyle and Consumer Technology.

Table NH6

These three tables (NH6a, NH6b and NH6c) give the average number of entries and passes at Higher by age and gender, where age is taken at 31 December 2002.

- 50% of Higher candidates were aged 16 – they had an average pass rate of 75%.
- 34% of Higher candidates were aged 17 – they had an average pass rate of 66%.

- 54% of all Higher candidates were female, 46% were male.
- Candidates entered for, on average, 2.8 Higher subjects, passing, on average, 2.0 of them.

Table NH7

These tables (NH7a to NH7c) describe the number of entries, passes, and grade A awards gained by all candidates.

- 54% of candidates took at least three Higher subjects in 2003.
- 34% of candidates passed at least three Higher subjects.
- 8% of candidates gained at least three grade A passes at Higher subjects.
- 34% of female candidates and 30% of male candidates achieved at least one Higher grade A pass.

Table NH8

Assessment appeals were made on behalf of 12.1% of Higher entries (16.3% in 2002) and 45% resulted in an upgrade. One of the main contributing factors which led to a decrease in numbers of appeals was the new SQA policy which advised centres to appeal on behalf of no more than 10% of the subject entries without a suitable rationale.

Symbols used in the tables

The following symbols are used in the tables.

n/a	=	no fallback award available
–	=	not applicable
–	=	no entries (table NH 2 only)
0%	=	less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

TABLE NH8: TREND IN APPEALS AND THEIR SUCCESS AT HIGHER, 2000 TO 2003

	2000	2001	2002	2003
Number of appeals	29,637	23,679	26,751	20,181
– as percentage of entries	25.3%	16.0%	16.3%	12.1%
Successful appeals	12,620	8,973	10,629	9,069
– as percentage of all appeals	43%	38%	40%	45%

ADVANCED HIGHER

All tables reporting on Advanced Higher are Course-based analyses, ie candidates must obtain passes in all internally-assessed Units as well as attempting the external Course assessment. Because of this, these tables exclude any candidate who re-sat the external assessment and did not improve on their previous position.

Advanced Higher is at Level 7 on the Scottish Credit and Qualifications Framework.

The Advanced Higher is designed for candidates in the sixth year of secondary education and adults. Awards are made at three passing grades, A to C, and compensatory awards are available for narrow failures, where candidates receive an A grade in the Higher level of the Course, if this is available. Only overall awards are reported; there is no profile of performance. This was the third year Advanced Higher had been available to candidates, with entries from 401 centres. Advanced Higher had candidate uptake in 41 subjects.

Tables AH1 to AH8 provide detailed information about uptake and attainment in Advanced Higher.

Table AH1

This table shows the trend in entries in Advanced Higher from 2001 to 2003.

- There were 16,998 entries in 2003. This represented an 8% increase on the 2002 figure.
- Of subjects with more than 100 entries, large increases were seen in Drama, English, Graphic Communication, and Business Management.
- There was a small decrease (1%) in Mathematics entries – this may signal a ‘levelling-off’ of Mathematics entries at this level.

Table AH2

This table shows the pass rate for each subject in the first three years of Advanced Higher – pass rates can vary considerably among subjects, reflecting the nature of the candidature and subject.

- The average pass rate for all Advanced Higher subjects was 75%. This pass rate has remained fairly stable over the past three years.
- Pass rates ranged from 94% for Music to 61% for Mathematics.
- The pass rate for English fell slightly from 84% in 2002 to 82% in 2003.
- Generally, in individual high uptake subjects, pass rates remain fairly steady.

Table AH3

This table shows the number of entries for each Advanced Higher subject by entry stage.

- As would be expected, perhaps, the vast majority of entries (98%) were from S6.
- Psychology is the only subject in which the majority of entries came from FE colleges – 92%.

Table AH4

These tables describe Advanced Higher pass rates and grade distributions by subject – pass rates varied considerably among subjects, reflecting the nature of the candidature and subject.

- Overall, at Advanced Higher the grade ‘A’ pass rate was 22%.
- Of subjects with more than 100 entries, the ‘A’ rate ranged from 54% for Music to 10% for Business Management.
- The ‘A’ rate for English was 14%, for Mathematics, 20%.

Table AH5

These three tables (AH5a, AH5b, AH5c) describe gender differences in subject choice and attainment at Advanced Higher.

- Males made up 93% of Technological Studies entries, 85% of Computing entries, and 81% of Physics entries.
- Despite this, female entries performed better than their male counterparts in Physics – with a higher percentage of both passes and ‘A’s.
- Female entries were predominant in Biology, Modern Languages, and Art and Design.
- Overall, females made up 53% of entries.

- The pass rate for males was 72%, for females, 77%.
- The grade 'A' pass rate was 23% for males, and 21% for females.

Table AH6

These three tables (AH6a, AH6b and AH6c) give the average number of entries and passes at Advanced Higher by age and gender, where age is taken at 31 December 2002.

- 16 year olds made up 15% of the 10,937 candidates. 82% of candidates were 17.
- The average number of entries per candidate was 1.6, and the average number of passes was 1.2 per candidate. This compares with 1.5 and 1.1, respectively, in 2002.

Table AH7

These tables (AH7a, AH7b, and AH7c) give the number of entries, passes, and grade 'A' awards gained by all candidates.

- 57% of candidates entered for only one Advanced Higher subject.
- 78% of candidates achieved at least one pass (75% of male candidates, 79% of female candidates).
- Male candidates, on average, gained 0.4 grade 'A' awards, compared with 0.3 for females.

Table AH8

Advanced Higher appeals fell from 17.8% of entries in 2002 to 13% of entries in 2003. Of these, 33% were successful – an increase of four percentage points on 2002. One of the main contributing factors which led to this decrease in numbers of appeals was the new SQA policy which advised centres to appeal on behalf of no more than 10% of subject entries without a suitable rationale.

Symbols used in the tables

The following symbols are used in the tables.

n/a	=	no fallback award available
-	=	not applicable
-	=	no entries (table AH2 only)
0%	=	less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

	2001	2002	2003
Number of appeals	1,110	2,799	2,216
– as percentage of entries	16.4%	17.8%	13.0%
Successful appeals	375	817	732
– as percentage of all appeals	34%	29%	33%

PROGRESSION

The progression tables take the entries for a particular subject in 2003 and match them with the subjects which have a progression link to that subject in 2002, giving a percentage of entries that have progressed from different levels the year before. In some cases candidates sit a higher level of qualification in the previous year. The occurrences of this are small but are nevertheless included in the tables.

English progression figures do not include last year's SCE Higher entries.

In most cases the line of progression is obvious, for instance Standard Grade Mathematics to Higher Mathematics. In other cases it is more complex – Standard Grade Home Economics is included in all three Higher Home Economics progression figures. It should also be mentioned that in some cases the progression figures may incorporate more than one lower level subject – both Intermediate 2 Biology and Intermediate 2 Biotechnology are included in the progression figures for Higher Biology. These special cases are listed below.

Progression to Intermediate 1

Standard Grade to Intermediate 1

- English, English – Alternative Communication, English – Spoken → English
- Social and Vocational Studies → Personal and Social Education
- Craft and Design → Woodworking Skills

Intermediate 2 to Intermediate 1

- Biology, Biotechnology → Biology

Higher to Intermediate 1

- Biology, Biotechnology, Human Biology → Biology

Advanced Higher to Intermediate 1

- Biology, Biotechnology → Biology

Progression to Intermediate 2

Standard Grade to Intermediate 2

- Biology → Biotechnology
- Craft and Design → Design
- English, English – Alternative Communication, English – Spoken → English
- Computing Studies → Information Systems

- Social and Vocational Studies → Personal and Social Education
- Craft and Design → Woodworking Skills

Intermediate 1 to Intermediate 2

- Biology, Biotechnology → Biology
- Biology, Biotechnology → Biotechnology
- Care → Care Issues for Society
- Care → Health and Safety in Care Settings
- Computing Studies → Information Systems

Higher to Intermediate 2

- Biology, Biotechnology, Human Biology → Biology
- Biology, Biotechnology, Human Biology → Biotechnology
- Information Systems, Computing → Information Systems

Advanced Higher to Intermediate 2

- Biology, Biotechnology → Biology
- Biology, Biotechnology → Biotechnology
- Information Systems, Computing → Information Systems

Progression to Higher

Standard Grade to Higher

- Biology → Biotechnology
- Craft and Design → Design
- English, English – Alternative Communication, English – Spoken → English
- Biology → Human Biology
- Computing Studies → Information Systems
- Social and Vocational Studies → Personal and Social Education

Intermediate 1 to Higher

- Biology, Biotechnology → Biology
- Biology, Biotechnology → Biotechnology
- Biology, Biotechnology → Human Biology
- Care → Care Practice
- Care → Early Years Care and Education
- Care → Mental Health Care
- Care → Experiential Approaches to Early Years Care and Education
- Computing Studies → Information Systems
- Travel and Tourism → Tourism

Intermediate 2 to Higher

- Biology, Biotechnology → Biology
- Biology, Biotechnology → Biotechnology
- Biology, Biotechnology → Human Biology

- Care, Care Issues for Society, Health and Safety in Care Settings → Care
- Care, Care Issues for Society, Health and Safety in Care Settings → Care Practice
- Care, Care Issues for Society, Health and Safety in Care Settings → Early Years Care and Education
- Care, Care Issues for Society, Health and Safety in Care Settings → Mental Health Care
- Care, Care Issues for Society, Health and Safety in Care Settings → Experiential Approaches to Early Years Care and Education
- Construction Craft Skills, Construction Industry Practice → Construction
- Electronics and Electrical Fundamentals → Electronics
- Information Systems, Computing → Information Systems
- Travel and Tourism → Tourism

Advanced Higher to Higher

- Biology, Biotechnology → Biology
- Biology, Biotechnology → Biotechnology
- Biology, Biotechnology → Human Biology
- Information Systems, Computing → Information Systems

Progression to Advanced Higher

Standard Grade to Advanced Higher

- Mathematics → Applied Mathematics
- English, English – Alternative Communication, English – Spoken → English
- Computing Studies → Information Systems

Intermediate 1 to Advanced Higher

- Mathematics → Applied Mathematics
- Biology, Biotechnology → Biology
- Computing Studies → Information System

Intermediate 2 to Advanced Higher

- Mathematics → Applied Mathematics
- Biology, Biotechnology → Biology
- Information Systems, Computing → Information Systems

Higher to Advanced Higher

- Mathematics → Applied Mathematics
- Biology, Biotechnology, Human Biology → Biology
- Information Systems, Computing → Information Systems

Table PR1

This table shows the progression to Intermediate 1.

- 44% of the 2003 Intermediate 1 entries had previously taken Standard Grades.
- 53% of entries had no record from the previous year. This can partly be explained by some Intermediate subjects not being available at Standard Grade, eg Travel and Tourism.
- 91% of entries in Intermediate 1 English had previously taken Standard Grade English.
- 82% of entries in Intermediate 1 Mathematics had previously taken Standard Grade Mathematics.

Table PR2

This table shows the progression to Intermediate 2.

- 59% of 2003 Intermediate 2 entries had previously taken Standard Grades.
- Overall, there were higher progression rates from Standard Grade to Intermediate 2 than to Intermediate 1.
- Progression rates from Standard Grade for English, Mathematics, Gàidhlig, Geography, Craft and Design, Art and Design, and Physical Education were 70% and above.
- Many of the Intermediate 2 Courses, including Project-based National Courses, are not available at the levels below. This may deflate the overall progression figures.

Table PR3

This table shows the progression to Higher.

- 60% of 2003 Higher entries previously took Standard Grade and 8% previously took Intermediate 2 Courses.
- As with Intermediate 2, many of the Higher Courses, including Project-based National Courses, are not available at the levels below. This may deflate the overall progression figures.
- 24% of entries had no record of qualifications attempted in the previous year. This can partly be explained by candidates attempting 'crash' Highers – where no lower level Course in that subject has been obtained.

PROGRESSION

Table PR4

This table shows the progression to Advanced Higher.

- 97% of 2003 Advanced Higher entries took Higher Courses last year.
- The subject with the lowest progression rate from Higher to Advanced Higher was Psychology. Although this is a small uptake subject it is worth noting that the one candidate who did progress from Higher, representing 8%, was a school candidate while the other eleven who had no lower level Course were from FE centres.

Symbols used in the tables

The following symbols are used in the tables.

n/a	=	no subject to progress from in the year below
-	=	no entries
0%	=	less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

HIGHER NATIONAL QUALIFICATIONS

Higher National (HN) Units can be taken as stand-alone Units, or built up into Group Awards, such as Higher National Certificate (HNC), Higher National Diploma (HND) or Professional Development Awards (PDA). They are intended for candidates at a post-school but below degree level, and are mostly taken in colleges of further education.

HNC is at Level 7 on the Scottish Credit and Qualifications Framework.

HND is at Level 8 on the Scottish Credit and Qualifications Framework.

Reporting for Higher National qualifications is as follows:

- 'Entries' are the entries processed within a year (eg 1/8/02–31/7/03), ie the first time SQA obtains information about a candidate's entry into a particular qualification from the centre.
- 'Awards' are awards certificated within a year (eg 1/8/02–31/7/03), ie the certificate is actually awarded within that time period.

The HN Unit entry and award figures this year include HN pilot Units and HN group award Graded Units.

Tables HN1 to HN18 provide detailed information about HN Unit and Group Award entries and awards for 2003 (between 1 August 2002 and 31 July 2003). A summary of the information which appears in each table is given below.

Table HN1

This table shows a three-year trend in Higher National Unit entries and awards by centre type.

- Total entries for this academic session numbered 377,412, a slight decrease (2%) on 2002.
- 91% of all entries were from candidates in FE colleges.
- Total awards certificated within this academic session were 345,331, a decrease of 19% on 2002.
- Over both centre types, 17% of awards were at merit grade. Merit awards at FE colleges have decreased by one percentage point each year since 2001.

Table HN2

This table shows a three-year trend in Higher National Unit entries grouped by Superclass. (This is a classification system used in a number of Scottish and UK vocational education and training databases.)

- The most popular Superclass was Information Technology and Information followed by Business/Management/Office Studies and Authorship/Photography/Publishing/Media.
- Most of the Superclasses saw a drop in entries in 2003. The Superclasses where there was an increase are: Humanities; Performing Arts; Construction and Property; and Transport Services.

Table HN3

This table relates numbers of candidates to entry numbers, and gives an age/gender breakdown.

- 57,614 candidates entered for a total of 377,412 HN Units, an average of 6.6 Units per candidate.
- 48% of candidates were male and 52% female.
- Male candidates entered on average for more Units than female candidates, and younger candidates for more than older candidates.
- 28% of candidates were aged under 20, 36% were in their twenties, and 36% were aged 30 and above.

Table HN4

This table shows Unit entries grouped by Superclass, age and gender.

- Although total Unit entries for males and females were approximately equal, some of the subject areas reflected different ratios of male to female candidates.
- There were more male candidates entered for HN Units in Engineering and Oil/Mining/Plastic/Chemicals.
- More female candidates than male entered for HN Units in Education/Training/Teaching, and Family Care/Personal Development/Personal Care and Appearance.

- Sports Games and Recreation and Performing Arts Units were more popular with candidates aged under 20.
- Education/Training/Teaching and Environment Protection/Energy/Cleansing/Security Units were more popular with candidates aged 30 and over.

Table HN5

These three tables (HN5a, HN5b, and HN5c) list the fifty HN Units with the most entries for all candidates, male candidates, and female candidates, respectively. Old and new versions of Units (where the Unit title is identical) are grouped.

- The most popular HN Unit this year was Communication: Presenting Complex Communication for Vocational Purposes.
- 11 Units featured in the top fifty for both males and females, mainly in the areas of information technology applications and business.
- The most popular Units for male candidates also included Units in engineering and information technology systems, whereas for female candidates popular Units also included those in the fields of education, care, and a wider range of business Units.

Table HN6

This table gives information about candidates' results by Superclass.

- 79% of Unit entries in 2003 were successfully completed with the academic year.
- 13% of entries gained a merit award.
- Entries for Units in Environment Protection/Energy/Cleansing/Security had the highest percentage of merit awards, and Transport Services the lowest.
- Of the group award Graded Units, 68% of entries gained a successful award.

Table HN7

This table gives a breakdown of candidates according to how many HN Units they were entered for in 2003.

- 30% of candidates were entered for 10 or more Units.

- 47% of candidates aged under 20 entered for 10 or more Units, compared with only 17% of the candidates aged over 30. This can be explained by the fact that younger candidates were more likely to study full time, and hence enter for more Units.

Table HN8

Table HN9

Table HN10

Table HN11

The Higher National Certificate is made up of a coherent, validated programme of HN Units. Typically an HNC takes one year of full-time study or two years of part-time study, and may allow the candidate direct entry to the second year of some university degree courses.

Tables HN8, HN9, HN10 and HN11 give information about entries and awards for HNC qualifications.

- There were 18,168 HNC entries in 2003, a decrease of 17%. Colleges may have held back processing HNC entries in 2001 which would lead to higher than expected entry figures in 2002. Given this, the percentage decrease seen this year may be inflated.
- 93% of HNC entries were from FE colleges.
- There were 12,522 HNC awards in 2003, a decrease of 21%. This decrease came solely from the FE sector.
- HNC entries were split: 56% female candidates, 44% male candidates.
- 30% of candidates who entered in 2003 were aged under 20, 33% were in their 20s, and 36% were aged 30 and over.
- The largest number of entries within this age/gender split was from female candidates over 30.
- HNC awards were split: 60% female candidates, 40% male candidates.
- The largest number of awards was from candidates over 30 (44%).
- The three HNCs with the highest numbers of entries were: HNC Child Care and Education; HNC Social Care; and HNC Administration and Information Management. These qualifications were principally entered for by female candidates.

- The three HNCs with the highest numbers of awards were also: HNC Child Care and Education; HNC Social Care; and HNC Administration and Information Management. The number of awards from these three qualifications alone makes up 26% of the overall HNC awards.

Table HN12

Table HN13

Table HN14

Table HN15

The Higher National Diploma is made up of a coherent validated programme of HN Units. The HND typically takes two years of full-time study, and may allow the candidate direct entry to the third year of some university degree courses. Tables HN12, HN13, HN14 and HN15 give information about entries and awards for HND qualifications.

- There were 12,727 HND entries in 2003, an increase of 7% on 2002.
- 93% of HND entries were from FE colleges.
- There were 6,409 HND awards in 2003, a decrease of 16%. This decrease came solely from the FE college sector.
- HND entries were split: 48% female candidates, 52% male candidates.
- 42% of candidates who entered in 2003 were aged under 20, 40% were in their 20s, and 18% were aged 30 and over.
- The largest number of entries within this age/gender split was from female candidates under 20.
- HND awards were split: 52% female candidates, 48% male candidates.
- The largest number of awards were from candidates aged between 20 and 24 (45%).
- The three HNDs with the highest numbers of entries were: HND Business Administration; HND Accounting; and HND Sports Coaching with Sports Development.
- The three HNDs with the highest numbers of awards were: HND Business Administration; HND Accounting; and HND Beauty Therapy. All awards from Beauty Therapy were from female candidates.

Table HN16

Table HN17

Table HN18

Professional Development Awards (PDAs) are specialised qualifications which allow candidates to build on existing qualifications or experience and facilitate career development. The Advanced Diploma, Diploma, and Advanced Certificate are constructed exclusively of HN Units. The Certificate can be constructed from HN Units, National Units, Workplace Assessed Units, or a combination of these.

Tables HN16, HN17, and HN18 give information about entries and awards for PDA qualifications.

- Overall, candidates entered for 2,178 PDAs in 2003, an increase of 6%. The increase in entries came from the Certificate and Advanced Certificate qualification levels. Entries at both PDA Diploma and Advanced Diploma levels dropped.
- 1,486 awards were made, a slight decrease on 2002. Decreases in entries at qualification level were from Advanced Certificates and Advanced Diplomas.
- Entries and awards for PDAs mainly came from FE colleges (95% of both entries and awards).
- 59% of PDA entries were from male candidates, 41% from female candidates.
- 56% of PDA awards were from male candidates, 44% from female candidates.
- The most popular PDA was the Advanced Certificate in Carpentry and Joinery, which accounted for 15% of all PDA entries and 14% of all PDA awards.

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

SCOTTISH VOCATIONAL QUALIFICATIONS

Scottish Vocational Qualifications (SVQs) are designed to certificate successful candidates who can meet the National Occupational Standards defined by standards-setting bodies. There are SVQs available at up to five levels, for virtually every occupational area. The Units of which SVQs consist are designed to be assessed in the conditions of the workplace.

SVQ level 1 is at Level 4 on the Scottish Credit and Qualifications Framework.
SVQ level 2 is at Level 5 on the Scottish Credit and Qualifications Framework.
SVQ level 3 is at Level 6 on the Scottish Credit and Qualifications Framework.
SVQ level 4 is at Level 8 on the Scottish Credit and Qualifications Framework.
SVQ level 5 is at Level 11 on the Scottish Credit and Qualifications Framework.

SQA is responsible for the accreditation of all SVQs. The accreditation process ensures that the criteria for SVQs have been met and that the awarding body meets criteria related to quality assurance and certification processes. In 2003, 99% of SVQ entries were by SQA alone or in partnership with another awarding body. SVQs can fall into any of the three categories: 'SQA', 'SQA and partner', or 'accreditation only'. However SVQs can also gain entries from a mixture of the above, as is the case with some of the SVQs listed in Tables VQ5 and VQ6.

Reporting for Scottish Vocational Qualifications is as follows:

- 'Entries' are the entries processed within a year (eg 1/8/02–31/7/03), ie the first time SQA obtains information about a candidate's entry into a particular qualification from the centre.
- 'Awards' are awards certificated within a year (eg 1/8/02–31/7/03), ie the certificate is actually awarded within that time period.

Tables VQ1 to VQ9 provide information about SVQs from all awarding bodies, and Workplace Professional Development Awards (PDA–Ws), consisting wholly or mainly of Workplace Assessed Units. PDA–Ws are solely SQA qualifications.

SQA receives data from other SVQ awarding bodies regarding candidate entries only when the SVQ is successfully completed. Therefore, entry figures are underestimated.

Table VQ1
Table VQ2
Table VQ3

Tables VQ1 to VQ3 show SVQ entries and awards, by centre type and level of qualification.

- There were 39,816 SVQ entries in 2003, a decrease of 11% on last year. Colleges may have held back processing entries in 2001 which would lead to higher than expected entry figures in 2002. Given this, the percentage decrease seen this year may be inflated.
- 58% of entries were from 'Other' centre types, these include higher education institutions, HM Prisons, and Public/Private Training Providers.
- There were 21,519 SVQ awards in 2003, a decrease of 31% on the previous year. This decrease is due in part to a drop in awards of 'accreditation only' SVQs.
- Overall, 51% of SVQ entries (53% of awards) were at level 2, with a further 42% of entries (39% of awards) at level 3.

Table VQ4

This table provides an age breakdown of entries by level of qualification.

- 39% of entries in 2003 were aged under 20, with 27% in their 20s, 16% in their 30s and 18% aged 40 and over.
- Level 1, level 2, and level 3 SVQ entries came mainly from candidates under 30, 67% of candidates at each level. Candidates sitting level 4 and level 5 SVQs, however, were mainly from the over 30 age group, 84% at level 4 and 100% at level 5.

Table VQ5
Table VQ6

These two tables list the top 50 SVQs for both entries and awards, and provide a male/female split. SVQs with identical titles have been combined.

- 52% of SVQ entries were from male candidates, 48% from female candidates.
- Customer Service level 3 was the SVQ with most entries. Uptake in this course mainly came from female candidates (67% female, 33% male).
- Care level 2 and Administration level 3 were the second and third most popular courses entered, again both of these were mainly taken by female candidates.
- In 17 of the top 50 SVQ entry titles, over 90% of entries were male – mainly in construction and engineering-based courses.
- In 6 of the top 50 SVQ entry titles, over 90% of entries were female – mainly in beauty and care courses.
- 51% of SVQ awards were to female candidates, 49% to male candidates.
- The top three SVQ awards were in Customer Service level 3, Administration level 2, and Care level 2.

Table VQ7

Table VQ8

Table VQ9

Workplace Professional Development Awards (PDA–Ws) are specialised qualifications which allow candidates to build on existing qualifications or experience and facilitate career development. The Certificate can be constructed from HN Units, National Units, Workplace Assessed Units, or a combination of these. Tables VQ7, VQ8 and VQ9 describe entries and awards in PDA–Ws consisting wholly or mainly of Workplace Assessed Units.

- Candidates entered for 9,498 Workplace Assessed based PDAs in 2003 and 7,497 awards were made.
- Both entry and award numbers dropped this year.
- 56% of Workplace Assessed based PDA entries were from male candidates, 44% from female candidates.
- 57% of Workplace Assessed based PDA awards were to male candidates, 43% to female candidates.
- The Workplace Assessed based PDA with most entries was the Certificate for Vocational Assessors while the Workplace Assessed based PDA with most awards was the Certificate for Classroom Assistant.

Symbols used in the tables

The following symbols are used in the tables.

- = not applicable
0% = less than 0.5%

Notation used in the tables

Percentages are independently rounded and so may not always add exactly to 100%.

RELEVANT PUBLICATIONS AND USEFUL LINKS

Relevant publications from SQA's Assessment Research and Development Team include:

Estimates, Absentees and External Assessment Appeals: guidance on evidence requirements (BA0992/3, April 2004)

This document specifically addresses the role of National Assessment Bank instruments (NABs) in relation to estimates and assessment appeals. It describes how this relationship varies across subjects depending on the degree to which NABs can assess against the Grade Descriptions of the Course without compromising the validity of the Unit assessment, ie how NABs in some subjects have 'headroom' and can thus inform estimates and provide evidence for assessment appeals. Part two gives detailed information for each subject area.

Guide to Assessment and Quality Assurance for Secondary Schools (AA0840/3, September 2003)

Guide to Assessment and Quality Assurance for Colleges of Further Education (AA0841/3, September 2003)

Guide to Assessment and Quality Assurance for Training Providers and Employers (AA0842/4, March 2004)

Guide to Internal Moderation for SQA Centres (AA1453, December 2001)

These guides can be used to support induction of new staff, for in-service training, and as useful reference documents. They include our equal opportunities policy. They are also available on SQA's website: www.sqa.org.uk.

Comparability Study of Scottish Qualifications and GCE Advanced Levels (K0586-K0591, January 1998)

The aims of this comparability study were to provide information about the comparability of Scottish qualifications with the GCE Advanced level, to check the benchmarking of the Advanced Higher against current qualifications, and to provide assurance about the standards which will be required.

To order any of these publications, phone SQA's Customer Contact Centre on 0845 279 1000.
