

Areas of potential duplication in 'Practical Training Activities'.

BRICKWORK.

Training Activity	PDA/TAPs
Practical Training Activities 1& 2 could be combined.	Cavity Walling.
The Practical Training Activity could be reduced in size and a step incorporated in the corner therefore there is no need to run the wall in, as no minimum size is stated.	Set out and Build Brickwork Masonry Substructures.
Practical Training Activity 1 could be reduced in height (large repetitive one brick wall) but still include the diaper and all other decorative features.	Decorative Features
Squint corner wall could be incorporated within Practical Training Activity 1 in Decorative Features.	Decorative Panels and Obtuse Corners
