1 Introduction

This is the Arrangements Document for the new Group Award in Hairdressing at SCQF level 6, which was validated in September 2009.

This document includes: background information on the development of the Group Award, its aims, guidance on access, details of the Group Award structure, and guidance on delivery.

2 Rationale for the development of the Group Award

The predecessor National Certificate Units for Hairdressing in the SQA catalogue were used by a large number of centres. This means that candidates were presented with the centres' own in-house certificate. There is a high uptake of the predecessor NC Units and centres have indicated the need for a review of the Units and a recognised Group Award in Hairdressing. The new NC Award at SCQF level 5 was created in response to this demand. But it was always the intention to create a two year NC programme to fill the gap within individual centres own provision.

The development of a National Progression Award (NPA) in Cosmetology at SCQF level 4 which was validated in 2006 and the Hairdressing level 5 NC Award validated in 2008 have proved to be very popular. The Skills for Work Courses in Hairdressing at Intermediate 1 and Intermediate 2 have had a high uptake in School/College partnerships.

This National Certificate award is designed to provide candidates with the skills, knowledge and understanding required to equip them for entry to employment in a junior role or for progression to further academic and/or professional qualifications.

6 Approaches to delivery and assessment

6.1 Content and context

The National Certificate Group Award is not designed to train individuals to full industrial competence. Rather they will place an emphasis on developing the basic skills and knowledge required to engage in the next stages of acquisition of those skills and knowledge which will be attractive to future employers both within and outwith the Hairdressing industries. Candidates can then build on their skills when working towards achieving an HNC/HND or SVQ award.

This award should be delivered within the context of Hairdressing. This will enable candidates to develop a greater understanding of terminology, safety, working practices, research methods, personal skills, commercial targets and strategic industry objectives.

The intention is that candidates undertaking any of the Units will gain personal skills and knowledge which can lead towards future employment. Candidates will develop a broad knowledge of the industry and the accepted practices within.

Each award stands alone with its own aims/objectives and the Units show this clearly. Delivery would in all cases require that candidates are well supported in the initial stages and would require support throughout to ensure that standards were being maintained and that there was no compromise on health or safety issues at any time.

Assessments should, where appropriate, be observational, recorded evidence. The skills developed will have a practical focus which will be carried out in a realistic work environment.

6.2 Delivery and assessment

The structures of the qualifications allow a high degree of flexibility in the delivery owing to the very practical nature of the award. It is recommended that a realistic work environment is available for delivery.

This award can be offered on a full-time, part time, block release, day release or evening. Combination of delivery is also a possibility. Centres wishing to provide a full time programme might include more optional Units from the frameworks.

There are opportunities for integrative delivery of Units within the award. Also Assessments should be encouraged to be within the application of Practical Units. Assessment Support Packs (ASPs) will identify specific opportunities for integration with other Units.

The Assessment Strategy is designed to ensure an appropriate level of rigour whilst not imposing excessive demands on centres or candidates. The Design Principles for the award encourage a holistic approach to assessment and this has been adopted in each Unit specification for this award.

Each Unit Specification includes guidance on delivery and assessment and where applicable, any relationship with delivery and assessment of other Units.

Assessment Guidance includes a variety of conditions including open book, folio and practical activities.

Assessment Support Packs (ASPs) are available for all Mandatory Units. This provide guidance on content, context, evidence required, consultation sheets, folios and checklists with clearly stated standards. Centres are recommended to use the ASP templates if producing their own instruments of assessments.

Assessment Guidance is provided in each Unit Specification. Certain Units offer opportunities for integrative assessment covering one or more Performance Criteria. Centres can decide the order in which Units are delivered, based on candidate recruitment patterns, mode of delivery, resource issues and logical progression dictated by topics and Unit content/level.

Throughout all Units there is an emphasis on the application of Health and Safety legislation. Safe working practices should be looked at in accordance with current safety codes of practice and regulations.
