Introduction

These support notes are not mandatory. They provide advice and guidance on approaches to delivering and assessing the Physical Education: Taking Part in an Individual Activity Unit. They are intended for teachers and lecturers who are delivering this Unit. They should be read in conjunction with:

- ◆ the *Unit Specification*
- ◆ the *Unit Assessment Support pack*

General guidance on the Unit

Aims

The aim of this Unit is to provide learners with an opportunity to take part in an individual activity and by so doing improve their own performance, physical health and sense of wellbeing.

The Unit also provides a framework for learners to develop knowledge and skills for learning, skills for life and skills for work.

The range of physical activities can include walking, cycling, fitness training and horse-riding.

Progression into this Unit

Entry to this Unit is at the discretion of the centre.

This Unit has been designed to draw on and build on Curriculum for Excellence experiences and outcomes.

This Unit would be suitable for learners who have successfully completed qualifications in related areas at SCQF level 1. Relevant experiences and outcomes may also provide an appropriate basis for doing this Unit.

Skills, knowledge and understanding covered in this Unit

If this Unit is being delivered on a free-standing basis, teachers and lecturers are free to select the skills, knowledge, understanding and contexts which are most appropriate for delivery in their centres.

Learners who complete this Unit will be able to take part in an individual physical activity.

Progression from this Unit

This Unit may provide progression to:

- ◆ other Units in Physical Education at SCQF level 1
- ◆ other Units in Physical Education at SCQF level 2
- ◆ other Units of the Personal Achievement Award at both National 1 and National 2
- ◆ the *Self in Community: Leisure Time Activities* Unit of the Personal Development Award at National 2
- ◆ further study, employment and/or training

Further details about these Units can be found on SQA's website.

Learners may progress to other Units at the same level or Courses/Units at higher levels. The nature of this progression will depend on the individual needs of the learner.

Approaches to learning, teaching and assessment

The purpose of this section is to provide general advice and guidance on approaches to learning, teaching and assessment which can be used for the delivery of this Unit.

Learners undertaking qualifications at SCQF level 1 will take part in the Unit at different levels of participation and with varying degrees of support, all of which meet the Assessment Standards. Some learners may take part at an experiential or sensory level requiring full support. Some may require frequent direction and support to enable them to take part, while others may take part independently or with intermittent support.

Learners should be given as much support as they need to engage with learning, teaching and assessment activities whilst maintaining the integrity of the Outcome and Assessment Standards.

The level of support required, and any support framework used, is at the discretion of individual centres.

The skills-based focus of the Unit lends itself to the use of a variety of learning and teaching approaches, reflecting the values and principles of the curriculum. Effective learning and teaching will draw on a variety of approaches to enrich the experience of learners. In particular, a mix of approaches which provide opportunities for personalisation and choice will help to motivate and challenge learners.

Learning should be relevant to the learner's everyday life, their overall learning programme and/or work and leisure. Teachers/lecturers could also consider interdisciplinary and cross-curricular approaches to learning and teaching and explore how extra-curricular activities or the personal interests of learners could be included and recognised.

Learners should be given the opportunity to use their normal mode of communication and have access to the appropriate resources for support where they would normally be available in real-life situations in which the activity is being carried out.

Examples of learning and teaching approaches and ways of recording evidence are provided in the table on the next page.

Physical Education: Taking Part in an Individual Activity (National 1)

Outcome 1

With the appropriate level of support and resources, the learner will take part in an individual physical activity by:

Assessment Standards	Guidance and suggested learning and teaching approaches
1.1 Choosing an activity	The Unit provides learners with an opportunity to take part in an individual physical activity and, by so doing, improve their own performance, physical health and sense of wellbeing.
1.2 Demonstrating one basic skill for the chosen activity	The learner chooses an individual activity. A list of options could be provided in oral or pictorial form, and learners could be asked to select one of these options. For example, activities can include walking, cycling, fitness training, horse-riding, dance and gymnastics.
1.3 Following safe practices when participating in the chosen activity	<p>The learner chooses a skill. A bank of skills to support learners could be made available to learners. This bank could be displayed in a visual form. Examples may include: balance and jumping skills in gymnastics, moving a horse forward, turning right or left in horse-riding and maintaining control of the bicycle in cycling. The skill should relate directly to the individual physical activity.</p> <p>Learners should be encouraged to demonstrate a skill that allows them to access, and increase their enjoyment of, the individual activity.</p> <p>In preparation for an individual activity, learners may be shown a demonstration of safe warm-up techniques appropriate to the chosen activity. The importance of safe warm-up techniques could be explained to them.</p> <p>During the individual activity learners are shown, and supported in the proper use of, equipment to allow them to undertake the physical activity safely. This should be carried out on an ongoing basis for the duration of the activity.</p>

Assessment

There is no external assessment for National 1 Units. All Units are internally assessed against the requirements outlined and described in the Unit Specification and Unit Assessment Support pack.

To achieve the Unit, learners must achieve the Unit Outcome.

At SCQF level 1, it is anticipated that most evidence for assessment purposes will be gathered on a naturally occurring, ongoing basis, rather than from more formal assessment methods. There are many contexts that might be used for gathering evidence. These might include, for example, extra-curricular and/or outdoor learning.

Naturally occurring evidence is evidence which occurs within and as part of the learning and teaching, and can be gathered for assessment purposes in a variety of ways. Examples of how this evidence might be gathered include:

- ◆ observation of evidence demonstrated during an activity (using an observation checklist, visual recording, photography or equivalent)
- ◆ oral questioning before, during and on completion of an activity (recorded using an audio-visual or audio recording or using detailed written assessor notes as evidence)
- ◆ learning and teaching activities which generate physical evidence for assessment
- ◆ identifying opportunities to record evidence within out-of-centre activities

Centres are encouraged to develop criteria for success which focus on small, well-defined steps in learning. In this way the learner is more likely to achieve success in the Units and in any subsequent learning.

Learners will benefit from receiving accurate and regular feedback regarding their learning. This helps to ensure they are actively involved in the assessment process. It is important that different approaches to assessment are adopted to suit the varying needs of learners.

Authentication

For guidance on authentication of evidence that is gathered outwith the direct supervision of the teacher/lecturer responsible for the learner, eg outside the school or classroom, refer to SQA's *Guide to Assessment*.

It is important that teachers/lecturers track and keep accurate records of their assessments in order to:

- ◆ inform learners of their progress
- ◆ identify where further consolidation is required
- ◆ retain and store appropriately evidence of work in progress and completed work for verification purposes

It is anticipated that learners will need a high degree of teacher/lecturer assistance. More details about the type of support are provided within the Equality and Inclusion section.

Developing skills for learning, skills for life and skills for work

The *Unit Specification* lists the skills for learning, skills for life and skills for work that learners should develop in this *Unit*. These are based on SQA's *Skills Framework: Skills for Learning, Skills for Life and Skills for Work* and should be built into the *Unit* where there are appropriate opportunities. The level of these skills will be appropriate to the level of the *Unit*.

Skills for learning, skills for life and skills for work	Examples of learning and teaching approaches
1 Literacy	
<p>1.3 Listening and talking</p> <p>Listening means the ability to understand and interpret ideas, opinions and information presented orally for a purpose and within a context, drawing on non-verbal communication as appropriate. Talking means the ability to communicate orally ideas, opinions and information for a purpose and within a context.</p>	<p>Where appropriate, learners could use their normal mode of communication to:</p> <ul style="list-style-type: none"> ◆ communicate during learning and teaching activities, eg about how to take part in an individual activity ◆ respond during learning, teaching and assessment, eg when asked to choose an activity
3 Health and wellbeing	
<p>3.2 Emotional wellbeing</p> <p>Emotional wellbeing includes taking responsibility for yourself and being aware of the impact your behaviour may have on others; developing ways to manage your feelings; developing positive attitudes and resilience; practising assertive behaviours; building confidence; and, based on an understanding of any risks, making informed decisions.</p>	<p>Where appropriate, learners could develop emotional wellbeing by:</p> <ul style="list-style-type: none"> ◆ identifying ways to manage feelings, eg developing confidence through participation in the individual activity ◆ developing awareness of resilient approaches during learning and teaching activities, eg persevering with the individual activity
<p>3.3 Physical wellbeing</p> <p>Recognising the importance and benefits of healthy and active living and practising skills to make the most of positive aspects of activity, such as enjoyment and challenge.</p>	<p>Where appropriate, learners could develop physical wellbeing by:</p> <ul style="list-style-type: none"> ◆ developing an awareness of the importance and benefits of a healthy lifestyle, eg taking part in individual physical activity ◆ enjoying individual physical activity

It is important that learners have opportunities to develop these broad general skills as an integral part of their learning experience.

There will be opportunities for the development of additional skills for learning, skills for life and skills for work throughout this Unit. These will vary from centre to centre depending on the approaches being used to deliver the Unit.

Equality and inclusion

The additional support needs of learners should be taken into account when planning learning experiences or when considering any reasonable adjustments that may be required. Assessment methods should offer all learners an equal opportunity to demonstrate their achievement. This should be reflected in the language used, the use of different assessment presentation methods and the use of appropriate illustrative materials that reflect an inclusive view.

Learners undertaking qualifications at SCQF level 1 are likely to require more support with their learning than at other levels, and learners should be given as much support as they need to engage with learning, teaching and assessment activities whilst maintaining the integrity of the Outcome and Assessment Standards.

Examples of support might include:

- ◆ allowing extra time to complete activities
- ◆ support ranging from prompting to full support from a responsible person
- ◆ the use of specialised and adapted equipment
- ◆ the use of ICT and other assistive technologies
- ◆ visual prompts

It is recognised that centres have their own duties under equality and other legislation and policy initiatives. The guidance given in these Unit Support Notes is designed to sit alongside these duties but is specific to the delivery and assessment of the Unit.

Alternative approaches to Unit assessment to take account of the specific needs of learners can be used. However, the centre must be satisfied that the integrity of the assessment is maintained and how the alternative approach to assessment will generate the necessary evidence of achievement.

Appendix 1: Reference documents

The following reference documents will provide useful information and background.
