

**National Qualifications 2016
Internal Assessment Report
Engineering Systems**

The purpose of this report is to provide feedback to centres on verification in National Qualifications in this subject.

National Qualifications (NQ) units

Titles/levels of NQ units verified:

F5DE 11	Engineering Project	Level 5
F5D5 12	Engineering Project	Level 6

General comments

Three verification visits took place this session, the overall outcome for each was 'significant strengths'.

Unit specifications, instruments of assessment and exemplification materials

In each case the appropriate unit specifications was being used and assessment instruments were valid.

Evidence requirements

All evidence requirements, log book, artefacts and reports, were met for each of these project units.

The use of assessment grids provided useful guidance to candidates.

Administration of assessments

Candidates undertook their project work in accordance with the unit specifications, supported and monitored by centre staff.

Areas of good practice

The following good practice was reported:

- ◆ Inter-disciplinary project topics.
- ◆ Team-working to reflect industrial practice.
- ◆ The use of a marking grid.
- ◆ The integration of a Personal Development unit into project delivery.
- ◆ Attributing labour charges and costs to the 'project budget'.

Specific areas for improvement

Candidates should be encouraged to make use of spell-check and grammar-checking tools when word-processing their reports.
