Welcome

Welcome to the Word Processing Advanced course. The Student Workbook for this course is designed to teach the topics required for the assessment of this Unit. The companion Exercise Booklet contains practical exercises that will reinforce the topics taught in the Workbook as well as Summary Tasks for each Learning Outcome. It is expected that the tutor leading the learner will supplement these materials with some practical assignments that are appropriate to their group.

This Instructor's Guide explains the layout and use of these manuals and gives the answers to the questions and tasks included in the Exercise Booklet.

Exercise 2.1	4
Exercise 2.2	4
Exercise 2.11	5
Learning Outcome 2 — Summary Tasks	5
Learning Outcome 3	5
Learning Outcome 3 — Summary Tasks	5

Using the Student Workbook

The workbook has been organised into the three Learning Outcomes for this Unit. Each of these ‘sections’ contains the topics to be covered along with references to the practical exercises that the learner should complete at specific points. At the end of the ‘section’ there is a reference to that Learning Outcome’s *Summary Tasks*, which usually take the form of small projects, to help the learner consolidate what they’ve learned.

The references to the exercise booklet look like this:

Exercise 1.1

Now do Exercise 1.1 in the Exercise Booklet.

Summary Tasks

Now do the Learning Outcome 1 Summary Tasks in the Exercise Booklet.

Using the Exercise Booklet

The Exercise Booklet contains the practical sessions that the learners should undertake to consolidate their learning. Throughout each of the Learning Outcomes there are a number of exercises that will cover the topics most recently taught, and at the end of each Learning Outcome there is a Summary Tasks section. Here is a sample Summary Task from this Unit:

Task 5

Create a blank document then use the **Fleet Companies** data source from the previous task to run a mailing labels mail merge. Use the default labels setup for your system. Print the merged labels with your name in the footer then close the merged document without saving it.

Exercise Files

Most of the practical exercises and Summary Tasks in the Student Exercise Booklet ask the learner to open specific files. These files are supplied with this pack. If possible, a copy of these files should be placed on the hard disk on the system the learner will use. However, the exercises instruct the learner to find out where these files have been placed if they do not have access to the hard drive.

A copy of the Unit exercise folder with the practical sessions completed has been supplied for the use of teaching staff. This folder is named **WP — Int 2 — Completed Versions**.

Answers to Written Exercises

Learning Outcome 1

Exercise 1.1

Question 1

- ◆ .rtf: Rich Text format
- ◆ .txt: Plain Text format
- ◆ .htm: Hyper Text Markup language
