

# E-assessments and learning resources

SQA, in partnership with Scotland's Colleges, have developed a range of e-assessments and web-based learning and teaching resources, which are available for all SQA centres. These resources are designed to enhance the delivery of National Certificates and National Progression Awards by making the learning and assessment process more engaging for Scotland's learners.

This development was funded by the European Social Fund (ESF), through the TranSETT project, and over the past four years we have developed more than 30,000 e-assessment questions and 96 units of interactive, web-based learning and teaching resources, across 34 qualification areas. By working in partnership with subject specialists from across Scotland we have provided valuable CPD opportunities for all those involved.

We have collated these resources into groupings reflecting the sectors they support and we have resources in the following areas:

**Digital Technologies**

**Care**

**Enterprise and Employability**

**Energy**

**Construction and Engineering**

**Efficient Business**

**Leisure Industries**

**Language and Culture**

**Essential Skills**

**Applied Science**
