

Unit Summary

This Unit is about preparing base doughs for lamination by incorporating pastry fat and then laminating pastry in a bakery production environment. Pastry types typically include; puff pastry, Danish pastry and Croissant pastry.

You need to show that you can incorporate pastry fat using recognised preparation methods. You will need to produce laminated pastry using specified methods, meet final specifications and store pastry for processing. Complying with health and safety, food safety and organisational requirements are essential features of this Unit.

In order to be assessed as competent you must demonstrate to your assessor that you can consistently perform to the requirements set out below. Your performance evidence must include at least one observation by your assessor.

Achievement of this Unit will provide you with opportunities to develop the following SOA Core Skills:

Communication Access 3

• Read and understand simple written communication.

Numeracy Intermediate 1

• Apply a range of straightforward numerical skills in everyday contexts.

Problem Solving Access 3

- ♦ Analyse a simple situation or issue.
- Plan, organise and complete a simple task.

I have completed the requirements of this Unit.

		In order to be assessed as competent you	
You n	nust be able to	must demonstrate to your assessor that you can consistently perform to the requirements set out below. Your performance evidence must include at least one observation by your assessor.	Evidence/ Activity Ref No.
		Your evidence must be work-based,	
		simulation alone is only allowed where	
		shown in bold italics	
P	repare dough for lamination	Evidence of preparing dough for lamination	
		according to workplace procedures.	
T	his means you:	TT1:	
1 /		This must include two different methods	
1 (a) Check the condition and quantity of	for incorporating fat eg Scotch, English,	
	the base dough in accordance with your instructions and specifications	French and high-speed.	
	and take prompt action on		
	discovering any discrepancy.		
0	b) Select and prepare the correct		
	quantity of pastry fat for		
	incorporating fat.		
(6	c) Incorporate fat into the base pastry		
	dough correctly using the specified		
	method, tools and equipment.		
(6	d) Work with practice which minimises		
	waste and you correctly deal with		
	scrap material.		
(6	e) Position and maintain prepared pastry		
	correctly for further processing.		
(1	Comply with health, safety, food		
	safety and organisational		
	requirements throughout fat		
	incorporation operations.

			Evidence Requirements (cont)	
	Lam	iinate pastry	Evidence of lamination pastry using two	
			different methods for lamination eg half	
	This	s means you:	turns, block turns in accordance with	
			workplace procedures.	
2	(a)	Check the condition and quantity of		
		the prepared pastry in accordance		
		with your instructions and		
		specifications and take prompt action		
	4.	on discovering any discrepancy.		
	(b)	Identify and prepare work area, tools		
	(c)	and equipment for lamination. Laminate prepared pastry correctly		
	(c)	using the specified method, tools and		
		equipment.		
	(d)	Work with practice which minimises		
	(4)	waste and you correctly deal with		
		scrap material.		
	(e)	Place laminated pastry in the correct		
		condition and location, and label		
		where required, for further		
		processing.		
	(f)	Comply with health, safety, food		
		safety and organisational		
		requirements throughout lamination		
		operations.		
	(g)	Operate within the limits of your own		
		authority and capabilities.

Evidence of Performance

Evidence of performance may employ examples of the following assessment:

- ♦ observation
- written and oral questioning
- evidence from company systems (eg Food Safety Management System)
- reviewing the outcomes of work
- checking any records of documents completed
- checking accounts of work that the candidate or others have written

You r	need to know and understand	
Evidence of knowledge and understanding should be collected during observation of performance in the workplace. Where it cannot be collected by observing performance, other assessment methods should be used.		Evidence
K1	To what standards of health and safety and food safety you are required to work, why it is important that you do so, and what might happen if they are not met.	
K2	Requirements of bread weight regulations and the importance of accurate dividing and check weighing of fermented dough to comply with these regulations.	
K3	Why it is important to follow work instructions and product specifications or recipes throughout dough processing to ensure successful dough processing.	
K4	How to seek advice and make process adjustments to dough, to take into account minor changes in ingredient performance, production timing and environmental conditions, necessary to keep a dough within specification.	
K5	Common sources of dough contamination during processing.	
K6	How to avoid contamination during dough processing and what might happen if this is not done.	
K7	How to recognise and report dough that do not meet specification during processing.	
K8	The procedure for rejecting and isolating failed dough and dough portions.	
K9	What the lines and methods of effective communication during processing are and why it is important to use them correctly.	
K10	What the documentation requirements during processing are and why it is important to meet them.	
K11	Personal protective clothing/equipment and working practices which are useful in combating the potentially harmful effects of dust and allergies resulting from breathing or skin contact with ingredients or dough.	
K12	How to maintain dough condition and deal with time constraints and variations to conditions throughout processing.	
K13	The correct method for loading and unloading trays in racks.
