

# NQ Verification 2021–22 Round 2

## Qualification Verification Summary Report

### 01 Section 1: Verification group information

Verification group name:	Design and Manufacture
Verification event/visiting information	Visit
Date published:	June 2022

#### National Courses/Units verified:

C819 75 National 5 Design and Manufacture Course Assessment Task — practical.

### 02 Section 2: Comments on assessment

#### Assessment approaches

All centres correctly used the 2022 Assignment task issued by SQA.

#### Assessment judgements

The assessment judgements of almost all centres were in line with national standards, were reliable and were accepted.

The assessment judgements from one centre were too lenient and the judgements from another centre were slightly severe.

### 03 Section 3: General comments

Verification was carried out by visiting verifiers.

All accepted centres made good use of the exemplar materials provided by SQA.

Almost all candidates had completed the task and had demonstrated good skills in applying a finish.

Candidates made use of all three assessment tasks, the most popular being the condiment holder.

All three tasks allowed candidates to demonstrate appropriate practical skills.
