General Marking Principles for Higher Business Management

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the specific Marking Instructions for each question. The marking schemes are written to assist in determining the 'minimal acceptable answer' rather than listing every possible correct and incorrect answer.

- (a) Marks for each candidate response must always be assigned in line with these General Marking Principles and the Specific Marking Instructions for the relevant question.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed Marking Instructions, and you are uncertain how to assess it, you must seek guidance from your Team Leader.
- (d) For each candidate response, the following provides an overview of the marking principles. Refer to the specific Marking Instructions for further guidance on how these principles should be applied. Marks will be awarded as follows for:
 - (i) Questions that ask candidates to "Describe ..."

Candidates must make a number of relevant factual points, which may be characteristics and/or features, as appropriate to the question asked. These points may relate to a concept, process or situation.

Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question:

 - 1 mark should be given for each relevant factual point.
 - 1 mark should be given for any further development of a relevant point, including exemplification when appropriate.
 - (ii) Questions that ask candidates to "Explain..."

Candidates must make a number of accurate relevant points that relate cause and effect and/or make the relationships clear. These points may relate to a concept, process or situation.

Candidates may provide a number of straightforward points of explanation or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question:

 - 1 mark should be given for each relevant point of explanation.
 - 1 mark should be given for a further development of a relevant point, including exemplification when appropriate.
 - (iii) Questions that ask candidates to "Compare ..."

Candidates must demonstrate knowledge and understanding of the similarities and/or differences between things, methods or choices, for example. The relevant comparison points could include theoretical concepts.

Up to the total mark allocation for this question:

 - 1 mark should be given for each accurate point of comparison.
 - (iv) Questions that ask candidates to "Discuss ..."

Candidates must make a number of points that communicate issues, ideas, or information about a given topic or context that will make a case for and/or against. It is not always necessary to give both sides of the debate in responses.

Up to the total mark allocation for this question:

 - 1 mark should be given for each accurate point of knowledge that is clearly relevant.

- **1 mark** should be given for any further development of a relevant point, including exemplification or a conclusion when appropriate.
