General marking principles for Higher English: Reading for Understanding, Analysis and Evaluation

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (d) We use the term “possible answers” to allow for the possible variation in candidate responses. Credit should be given according to the accuracy and relevance of the candidates answers.

Areas of Agreement		Passage 1	Passage 2
1.	Music lacks originality/interest/ is of poor quality	The mostly computer-generated music lacks creativity and is incredibly dull, monotonous	The muzak Self is subjected to in hotels and restaurants is clichéd
2.	Omnipresent/Inescapable	The music is played in such a great variety of public places that it is more or less inescapable	Everywhere Self goes - from unremarkable to beautiful/sophisticated places - he is disturbed by background music
3.	Accepted norm	People accept that the background to life will be a wash of electronic sounds instead of natural sounds/silence	People are so used to this music that very few complain about it, including Self's eating companions
4.	Powerlessness	Reasonable requests for silence are met with hostility and regarded as strange	Self's various efforts to silence this music are regarded as either criminal behaviour or deeply unusual
5.	Spoils events	Music in public places is deeply annoying, makes everyday events a trial and makes conversation difficult	Eating in public places is ruined for Self by this intrusive music
6.	Mind control	The repetitive music has addictive qualities, which affect our mental processes	Muzak's original purpose was as a form of mind control and this is still a feature of its use today
7.	Silence undervalued	To fully appreciate music as an art form we must first cherish silence as the natural backdrop to life	When Self is momentarily in a quiet room, he finds it comforting and a relief from the usual noise
8.	Imposition	Customers have no choice but to endure music played in restaurants	Nearly all buildings have music playing in them

General marking principles for Higher English: Critical Reading

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (d) We use the term “possible answers include” to allow for the possible variation in candidate responses. Credit should be given according to the accuracy and relevance of the candidates answers.
- (e)
 - (i) For questions that ask candidates to “**identify...**”, candidates must present in brief form/name.
 - (ii) For questions that ask candidates to “**explain...**” or ask “**in what way...**”, candidates must relate cause and effect and/or make relationships between things clear.
 - (iii) For questions that ask candidates to “**analyse**”, candidates must identify features of language/filmic techniques and discuss their relationship with the ideas of the text as a whole. Features of language might include word choice, imagery, tone, sentence structure, punctuation, sound techniques, versification, and so on. Filmic techniques might include mise-en-scène, lighting, framing, camera movement and sound, and so on.
 - (iv) For questions that ask candidates to “**evaluate**”, candidates must make a judgement on the effect of the language and/or ideas of the text(s).

Marking instructions for each question

The marking instructions indicate the essential idea that a candidate should provide for each answer.

1. Scottish Texts

- Candidates should gain credit for their understanding, analysis and evaluation of the extract and either the whole play or novel, or other poems and short stories by the writer.
- In the final 10-mark question the candidate should answer the question in either a series of linked statements, or in bullet points.

2. Critical Essay

- If minimum standards have been achieved, then the supplementary marking grid will allow you to place the work on a scale of marks out of 20.
- The essay should first be read to establish whether it achieves minimum requirements for technical accuracy, and whether it is relevant to the question. There may be a few errors, but they should not impede understanding. If minimum standards are not achieved, the maximum mark which can be awarded is 9. To access the full range of marks the essay should communicate clearly at first reading.
- Assessment should be holistic. There may be strengths and weaknesses in the essay; assessment should focus as far as possible on the strengths, taking account of weaknesses only where they significantly detract from the overall essay.

- Candidates may display ability across more than one band descriptor. Assessors should recognise the closeness of the band descriptors and consider carefully the most appropriate overall band for the candidate's performance.

Once the appropriate band descriptor has been selected, the assessor should follow this guidance:

- If the evidence almost matches the level above, award the highest available mark from the range
- If the candidate's work just meets the standard described, award the lowest mark from the range
- Otherwise the mark should be awarded from the middle of the range

For band descriptors of 4 marks, for example 9-6, assessors should reconsider the candidate's abilities in the three main areas: knowledge and understanding; analysis; and evaluation.

If the candidate just misses a 9, award an 8. If the candidate is slightly above a 6, award a 7.
