## General marking principles for National 5 Philosophy

*This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this Paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.*

- (a) Marks for each candidate response must **always** be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (d) The term ‘or any other acceptable answer’ allows for the possible variation in candidate responses. Credit should be given according to the accuracy and relevance of the candidate’s answers. The skill of using appropriate philosophical terminology is reflected in exemplar responses, however at this level, candidates may be awarded marks where the answer is accurate but expressed in their own words.
- (e) Refer to the glossary of terms provided in the course support notes. Different text books may use terms in different ways, and should candidates use a definition or explanation, or use language that is different from that given in the glossary, their response will be positively marked provided that the information given is correct.
- (f) Questions that ask the candidate to ‘name’, ‘give’, ‘state’ or ask ‘what is’ or ‘what are’ are straightforward questions requiring candidates to recall key points of knowledge or to give examples. Marks available for these questions reflect the number of points the candidate needs to make. For example, if one mark is available, the candidate needs to give one correct point. If three marks are available, the candidate needs to make three correct key points in their response.
- (g) Questions that ask the candidate to ‘describe’ require the candidate to make a point and then develop this point by giving further information about it. For example, if two marks are available, the candidate should get a mark for making the main point and a further mark for developing the point by giving additional or related information.
- (h) Questions that ask the candidate to ‘explain’ or ‘use’ require the candidate to give reasons or show connections. This may include giving reasons why an argument is valid. For example, if three marks are available for an ‘explain’ question, the candidate should get one mark for making a key point of explanation and a further mark for each additional correct key point of explanation.
- (i) Questions that ask the candidate to ‘evaluate’ or ‘apply’ require the candidate to use their knowledge and understanding of a theory or argument to examine its validity or its usefulness in a given situation. For example, if a scenario is provided, candidates need to apply their knowledge and understanding of a theory or argument to a given situation. Evaluation can occur when asked to give information about strengths and weaknesses of a theory.

	(d)	(i)	1	Evil pleasures. <b>(1 mark)</b>
		(ii)	2	Someone may derive great pleasure from the suffering of others. This is a problem for Utilitarianism because most people would view inflicting suffering on others as wrong. <b>(1 mark)</b>  Any suitable example. <b>(1 mark)</b>
		(iii)	1	Difficulties of predicting consequences. <b>(1 mark)</b>
		(iv)	2	This is a problem for Utilitarianism because events can turn out differently from what is expected. We have no control over anything but our own actions, so unexpected consequences can happen. <b>(1 mark)</b>  Any suitable example. <b>(1 mark)</b>
		(v)	1	Tyranny of the majority. <b>(1 mark)</b>
		(vi)	2	This is a problem for Utilitarianism because the majority's interests are served and those of a minority are suppressed. What the majority want is not necessarily right as it ignores justice/rights of the minority. <b>(1 mark)</b>  Any suitable example. <b>(1 mark)</b>  Any other relevant criticisms may be credited.
