Finalised Marking Instructions

© Scottish Qualifications Authority 2019

These marking instructions have been prepared by examination teams for use by SQA appointed markers when marking external course assessments.

The information in this document may be reproduced in support of SQA qualifications only on a non-commercial basis. If it is reproduced, SQA must be clearly acknowledged as the source. If it is to be reproduced for any other purpose, written permission must be obtained from permissions@sqa.org.uk.

General marking principles for Advanced Higher Health and Food Technology

Always apply these general principles. Use them in conjunction with the specific marking instructions, which identify the key features required in candidates' responses.

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or specific marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) Award marks only where points relate to the question asked. Where candidates give points of knowledge without specifying the context, award marks unless it is clear that they do not relate to the context of the question.
- (d) The following command words are used in the question paper
 - A Identify
 - B Select
 - C Describe
 - D Explain
 - E Discuss
 - F Evaluate
 - G Analyse

For each command used, the following provides an example of applying the marking principles. For **identify** questions, candidates must list a number of relevant items or facts. These must relate to the context of the question and do not need to be in any particular order.

Up to the total mark allocation for this question

- award **1 mark** for each accurate relevant point of knowledge linked to the context of the question.

Example question: Identify two features of smart fabrics that would be desirable in textiles to be used for a hillwalking jacket.

Example answer: Breathability.

(1 mark for correct identification of a feature of a performance fabric to be used for a hillwalking jacket)

For **select** questions, candidates must identify a number of relevant items or facts from a given source. These must relate to the context of the question and do not need to be in any particular order.

Up to the total mark allocation for this question

- award **1 mark** for each accurate item or fact identified from the given source(s), linked to the context of the question.

Example question: Select three key features from the images shown.

Example answer: Triangle shapes, from the roof of the bandstand, the roof of the birdcage and the panels on the parasols. (1 mark for correct identification of a key feature related clearly to the images)

For **describe** questions, candidates must define or give an account of points which must relate to the question. They do not need to be in any particular order. Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question

- award 1 mark for each accurate relevant point of knowledge linked to the context of the question.

Example question: Describe two benefits to consumers of including fabric content information on the fashion/textile item label.

Example answer: Details of the fibre content might give an indication of how hardwearing the fabric is likely to be. (1 mark for correct description of one use of fabric content information)

For **explain** questions, candidates must make the relationship between points clear, for example by giving accurate relevant points, showing connections between these and the context of the question. Candidates may provide a number of straightforward explanations or a smaller number of developed explanations, or a combination of these.

Up to the total mark allocation for this question

- award 1 mark for each accurate relevant point.

Example question: Explain the importance of each of the symbols on the pattern piece shown.

Example answer: Place on the straight grain symbol – the arrow should be placed parallel to the selvedge, so this will ensure that the item hangs correctly. (1 mark for accurate relevant point linked to the symbols on the pattern piece)

For **discuss** questions, candidates must make the relationship between things clear, for example by giving accurate relevant comments showing connections between these and the subsequent potential impact related to the context of the question.

- award 1 mark for each accurate relevant point linked to the context of the question.

Example question: Discuss the ways these images can influence a spring fashion collection.

Example answer: Key feature: Triangle shapes, from the roof of the bandstand, the roof of the birdcage and on the parasols – triangle shapes used to form the sections of a panelled skirt. (1 mark for accurate relevant point showing the impact on fashion design)

For **evaluate** questions, candidates must make a number of evaluative comments which make a judgement based on the information provided, related to the context of the question.

Up to the mark allocation for this question

- award 1 mark for each relevant evaluative comment linked to the context of the question.

Example question: Evaluate the suitability of using a knitted fabric for a school sweatshirt.

Example answer: Knitted fabrics have stretch so the sweatshirt will be comfortable to wear for a whole school day. (1 mark for evaluative comment linked to the requirements for a school sweatshirt)

For **analyse** questions, candidates must make a number of comments related to the context of the question. Candidates should identify appropriate pieces of information, the relationship between the identified information and their significance when taken together.

Up to the mark allocation for this question

- award 1 mark for each relevant point of analysis linked to the context of the question.

Example question: Analyse the impact of the properties and characteristics of the textiles and the construction techniques used in the design of this hillwalking jacket.

Example answer for construction technique: taped seams.

Example explanation: once the seam has been stitched, the stitching is covered with fusible waterproof tape. This seals the holes made by the needle when the seam was stitched.

Example impact on the item: this is a suitable seam finish as it will prevent water passing through to the inside of the jacket, so keeping the wearer dry. (1 mark for an appropriate explanation of a correctly identified construction technique, linked to the requirements for a hillwalking jacket)

Marking instructions for each question

Section 1

Question		Expected response	Max mark	Additional guidance
1.	(a)	<p>Potential key features (from the images) could include</p> <ul style="list-style-type: none"> • Nature <ul style="list-style-type: none"> – sea, sky, sunset, sunrise, weather, palm trees, flower, birds, stars • Colour palette <ul style="list-style-type: none"> – bright – coral, yellow, orange, blue, purple, lilac, pink, green – neutrals – cream, beige – dark – black, charcoal, dark blue, dark brown – combination of pale/pastel colours with bold/bright colours • Shapes <ul style="list-style-type: none"> – triangle – boat sail, tree trunk, roof on hut, stairs on hut – circular – curve on tree, sunset, shadow on water, palm leaves, flower petals – curve – birds, tree trunk, movement in sky – stripes – palm leaves, ripple on sea, sky – ripple effect – sea – fan shape – leaves/tree top – swirls: reflection on sea – rectangle – beach hut window, spaces under beach hut, beach hut banister – zig-zag – tree reflection on water – dots – on petals – cross – beach hut banister – feather shape on palm tree 	10	<p>Candidates are required to explore ideas about a fashion collection and the impact of an influence on fashion design.</p> <p>From the sources provide, candidates must consider a range, select key features which inspire fashion design, and discuss how each feature could influence aspects of the design for the fashion items in the summer holiday collection.</p> <p>Selection of key features (up to 3 marks) Award 1 mark for identification of an appropriate key feature from the source.</p> <p>Discussion of identified key features (up to 7 marks) Award 1 mark for each response that demonstrates how a source of inspiration (correctly identified from the images) could inspire fashion items designed for this collection.</p> <p>Award marks where</p> <ul style="list-style-type: none"> • the candidate; demonstrates a clear link to possible inspiration from identified key feature • identifies an appropriate design feature that can be clearly visualised • clearly links the way the specified design feature is applied in an item suitable for this collection.

Question	Expected response	Max mark	Additional guidance
	<ul style="list-style-type: none"> • Textures <ul style="list-style-type: none"> – rough – palm leaves, palm tree trunk – smooth – sea, sky, beach – ripple – sea – soft – clouds, water. <p>Possible design features for fashion items for this collection could include</p> <ul style="list-style-type: none"> • style features for example shape, sleeve type, cuff style, waist style, waist finish, neck style, neck finish, fastenings, pockets, embellishments • fabric(s) used for example colour, pattern, fibre content, method of fabric construction, weight • embellishments for example construction details, surface decoration techniques. <p>Possible impact of key features identified from the images on the fashion items designed for the summer holiday collection could include</p> <p>Nature</p> <ul style="list-style-type: none"> • sea <ul style="list-style-type: none"> – use of coral/orange/cream/beige printed fabric – swirl shape, scalloped on neck-line, hems – use of coral/orange/cream/beige embellishments • sky/birds <ul style="list-style-type: none"> – use of coral, yellow, orange, blue, purple, lilac, pink, black, dark blue plain fabrics/printed fabrics • sunrise/sunset <ul style="list-style-type: none"> – use of yellow or cream buttons for fastenings – use of sheer fabrics, for example chiffon/organza 		<p>Do not award marks for responses that cite inspiration from themes that do not appear in the images.</p> <p>Candidates can choose to answer in bullet points or write a number of linked statements.</p>

Question	Expected response	Max mark	Additional guidance
	<ul style="list-style-type: none"> • weather <ul style="list-style-type: none"> – short sleeve/sleeveless – low/strapless necklines – length of item/short – use of cool fabrics, for example cotton/linen – loose fitting styles/floaty designs • palm trees/flower <ul style="list-style-type: none"> – use of printed fabrics with palm tree/flower background – use of flower design for embellishment, for example beading in the shape of a flower – use of feathers for embellishments – use of beads for embellishment to mimic shapes/patterns • colour palette <ul style="list-style-type: none"> – use of colours for example coral, yellow, orange, purple, lilac, pink dot (one colour of the background, the other colours for the spots/checks/wavy lines) <p>Shapes</p> <ul style="list-style-type: none"> • triangle <ul style="list-style-type: none"> – use of handkerchief points at hem of item/sleeve/cuff – panelled skirt (for example godets) – triangle shape embellishments – triangle shaped fastening for bag – use of patch pockets on a shirt/skirt • circle <ul style="list-style-type: none"> – circle shaped skirt, cape, sleeve, hat – use of circle shape for base of handbag/beach bag • ripple effect – gathers on sleeve, side seam/hem (ruffle effect) <ul style="list-style-type: none"> – use of high/low hem effect – shirring used to create ripple effect – effect of dye to create ripple on fabric (tie dye) • fan shape <ul style="list-style-type: none"> – use of fan shape for clutch bag – use of fan shape for fishtail hem, sleeve – scalloped shape on collars, hem lines 		

Question	Expected response	Max mark	Additional guidance
	<ul style="list-style-type: none"> • swirls <ul style="list-style-type: none"> – use of lightweight fabrics – gathers at waist/cuff/sleeve head/hem (puffball effect) – scalloped hems • rectangle <ul style="list-style-type: none"> – use of rectangle shape for base of handbag/beach bag • zig-zag <ul style="list-style-type: none"> – use of zig-zag shape for trimmings/embellishment, zig-zag hem – embroidery stitching used on hem/edge of item that is herringbone/blanket stitch • dots <ul style="list-style-type: none"> – use of multi-coloured polka dot fabric – use of beading/sequins/buttons. <p>Or any other valid response.</p>		

Question		Expected response	Max mark	Additional guidance
	(b)	<p>Fabric finishes: Crease resistance</p> <p>Description</p> <ul style="list-style-type: none"> the finish makes laundering the summer holiday items easier, so it will be less time consuming to keep them looking good/save time as there will be less need to iron the summer holiday items will shed creases more easily, so it will look smarter the summer holiday items will be folded and packed for vacation, therefore the items will shed creases easily, saving time/keeping a good appearance the items are more likely to crease easily in a humid climate, so the items will easily shed creases, needing less ironing/keeping a good appearance. 	2	<p>Candidates must describe the benefits of applying each of the finishes to the fabrics to be used for the holiday collection.</p> <p>Award 1 mark for each description that</p> <ul style="list-style-type: none"> is relevant to the fabric finish and links to the requirements of a fabric to be used for a holiday collection. <p>Do not award marks for descriptions that are simply descriptions of the function of the fabric finish.</p>

Question	Expected response	Max mark	Additional guidance
(c)	<p>Possible candidate responses could include</p> <ul style="list-style-type: none"> • suitable as social media has a large audience, so information about the collection will reach many customers • suitable as it is free to post on most of the largest platforms, so it won't cost the designer any more to advertise • suitable as posts can be shared easily, so details of the collection will have a global reach than just the designer's followers • suitable as social media is interactive, so positive comments may boost sales of the collection • suitable as followers will automatically receive details of the collection, so may be more likely to buy • suitable as followers can provide feedback on the collection, so it may be adapted to meet customers preferences • suitable as social media is used by many celebrities with large followings, so any comments made by them may encourage sales • less suitable as followers may make negative comments about the collection, so potentially reducing sales • less suitable as any mistakes in the post will reach a large audience, so may reflect badly on potential sales • less suitable as maintaining a social media presence can be time consuming, so it may be difficult to keep up with the comments giving a poor impression of the designer's business. <p>Or any other valid response.</p>	3	<p>Candidates may provide a number of straightforward evaluations or a smaller number of developed evaluations or a combination of these.</p> <p>Candidates must make evaluative comments on the suitability of the use of social media to promote the summer holiday collection.</p> <p>Award 1 mark for each relevant evaluative comment linked to the context of the question.</p> <p>Award a further mark for any evaluation that is developed.</p> <p>Candidates may gain credit in a number of ways.</p> <p>Award a maximum of 3 marks for valid evaluative comments relating to the use of social media to promote the summer holiday collection.</p> <p>Award a maximum of 2 marks for developed evaluations relating to the same identified aspect of the use of social media to promote the summer holiday collection.</p> <p>Award marks for each response that</p> <ul style="list-style-type: none"> • identifies a relevant feature of social media • includes an appropriate judgement about the identified feature • is specifically linked to the requirements of the promotion of the summer holiday collection. <p>Do not award marks for general comments about features of social media.</p>

Section 2

Question	Expected response	Max mark	Additional guidance				
2.	<p>Possible candidate responses could include</p> <p>Properties and characteristics of cotton: 65% cotton</p> <p>Property: Durable/abrasion resist/strong when wet/strong</p> <table border="1" data-bbox="353 472 1240 1310"> <thead> <tr> <th data-bbox="353 472 701 507">Explanation</th> <th data-bbox="701 472 1240 507">Impact</th> </tr> </thead> <tbody> <tr> <td data-bbox="353 507 701 1310"> <ul style="list-style-type: none"> • durable/withstand wear and tear • withstand frequent washing • withstand agitation • withstand machine washing • will not rip easily. </td> <td data-bbox="701 507 1240 1310"> <ul style="list-style-type: none"> • suitable as uniform will worn every day so will remain smart • suitable as uniform is likely to get stained, so will withstand agitation required to remove stains and will remain smart • suitable as uniform can be machine washed which will save staff time, so uniform will be ready for next shift • suitable as uniform will be worn everyday so will withstand wear and tear well • suitable as the uniform may not need to be replaced often, so will be cost effective for the medical centre • suitable as fabric is unlikely to shrink so uniform will fit properly after laundering • suitable as fabric is unlikely to rip when worn so will be value for money/retain a good appearance. </td> </tr> </tbody> </table>	Explanation	Impact	<ul style="list-style-type: none"> • durable/withstand wear and tear • withstand frequent washing • withstand agitation • withstand machine washing • will not rip easily. 	<ul style="list-style-type: none"> • suitable as uniform will worn every day so will remain smart • suitable as uniform is likely to get stained, so will withstand agitation required to remove stains and will remain smart • suitable as uniform can be machine washed which will save staff time, so uniform will be ready for next shift • suitable as uniform will be worn everyday so will withstand wear and tear well • suitable as the uniform may not need to be replaced often, so will be cost effective for the medical centre • suitable as fabric is unlikely to shrink so uniform will fit properly after laundering • suitable as fabric is unlikely to rip when worn so will be value for money/retain a good appearance. 	10	<p>Up to the mark allocation for this question, candidates must analyse the impact of</p> <ul style="list-style-type: none"> • at least four properties and characteristics of the textile used • at least four construction techniques used to make the item • up to the total mark allocation for this question. <p>Award 1 mark for each relevant point of analysis linked to the context of the question.</p> <p>Features of a point of analysis must include</p> <ul style="list-style-type: none"> • an explanation of how the textile property/construction technique is used in the item • an evaluation of the impact on the requirements of the design for the staff.
Explanation	Impact						
<ul style="list-style-type: none"> • durable/withstand wear and tear • withstand frequent washing • withstand agitation • withstand machine washing • will not rip easily. 	<ul style="list-style-type: none"> • suitable as uniform will worn every day so will remain smart • suitable as uniform is likely to get stained, so will withstand agitation required to remove stains and will remain smart • suitable as uniform can be machine washed which will save staff time, so uniform will be ready for next shift • suitable as uniform will be worn everyday so will withstand wear and tear well • suitable as the uniform may not need to be replaced often, so will be cost effective for the medical centre • suitable as fabric is unlikely to shrink so uniform will fit properly after laundering • suitable as fabric is unlikely to rip when worn so will be value for money/retain a good appearance.
