National 5 Accounting Assignment

Assessment task

Coursework Finalised Marking Instructions

General marking principles

This information is provided to help you understand the general principles you must apply when marking candidate responses in this assignment. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must **always** be assigned in line with these general marking principles and the specific marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) Candidates are awarded marks for showing workings and demonstrating that accounting processes have been followed, even when incorrect figures are presented.
- (d) **Printouts**
Candidates are clearly directed, within the instructions, as to the printing requirements. If the formulae printout is missing, no formula marks can be awarded. If value view printout is missing, markers should award as many marks as possible based on the formulae view printout.

Absolute cell references are not required. Named cells are acceptable. Each time a formula is truncated, the mark cannot be awarded.

If formulae marks are grouped and the candidate has not made an attempt at some component part - still award the formulae mark providing the formulae that have been attempted are correct.

- (e) **Formatting**
Accept if candidates have changed formatting to different decimal places.
- (f) **Extra Cells Added**
Candidates may have inserted data in extra cells in order to help them construct formulae. This is acceptable providing the extra data is using cell references. If the extra data has not used cell references, then do not award formula marks each time. Markers should pay close attention as to how formulae are constructed if the candidate has inserted extra cells.
- (g) **Treatment of errors**
Guidance on the treatment of errors, for example extraneous items, arithmetic errors and consequential errors, is provided in the specific marking instructions.
- (h) **Consequential errors**
Consequential errors are taken account of and candidates receive credit for following the correct accounting processes and spreadsheet formulae.

| 35 | | | | | | | | | | | | | |
| 36 | | | | | | | | | | | Total = 10 marks | | |

Task 1 - Additional Guidance

- Watch for consequentiality throughout.
- If Balance has 2 separate inventories, it needs to show a total value of both inventories to gain the Balance mark. If candidate repeats this, treat as consequential. (Do not award (DNA) maximum of 1 mark).
- Where 2 separate inventories and total value are shown but individual totals are not – accept, eg 3 March only has £1158 in balance.
- Issues do not need totals.
- If Issues are entered in Receipts, DNA mark each time.
- If done as LIFO, DNA the 4 Issue marks.
- If done as AVCO, DNA the 5 Balance marks.
- If Balance column done as running balance – mark balances box as per solution.
- If candidate has gone wrong, Value in the Balance Box MUST BE Units x CPU.
(There are differing ways to get to the Value in the Balance which give differing answers. In this instance, mark the box as stand-alone).
- For 8 March Issues, although question requires an issue of 400kg, DNA in Issues column if this figure is higher than the 7 March balance. However, if candidate does this and Balance goes into negative due to earlier error - treat as consequential in Balance column. If candidate issues all the balance available on 7 March to take balance of 8 March to 0, then accept as consequential in both the Issues and Balance columns.
- If 7 March is treated as a receipt, the balance may contain 2 or 3 groups of inventories (candidate may have added 50 onto 450, or shown the 50 on a third line). Both are acceptable.

| TOTAL OVERHEADS | | | | £67,110 | £84,330 | £67,060 | £77,460 * |
| Re-apportionment of Service | £77,460 | Number of Employees | £1,291 | £38,730 | £23,238 | £15,492 | (2) |
| TOTAL PRODUCTION OVERHEADS | | | | £105,840 | £107,568 | £82,552 | *(1) for both |

Total = 8 marks

Additional Guidance

- Candidates do not need to have completed Basis of Apportionment or Rate columns, therefore do not penalise incorrect information in these columns in Value View.
- If the number 1 appears in the rate column for Indirect Materials - Ignore in both Value and Formula View.
- For the re-apportionment of Service Dept, if one error - award 1 mark. If two errors - award 0 marks.
- If Service Dept has re-apportionment figure, DNA 1 of the 2 re-apportionment marks but do not penalise inclusion in Final Total.
- If re-apportionment split correct but candidate shows £77,460 in final line - DNA Subtotal/Total mark.
- If no re-apportionment done (and thus no final total) award mark for subtotal as being final total (accept if Service Dept not subtotalled/totalled).

NOTE - Employee Supervision rate was set to 0 decimal places. If wrong basis used - decimal places will not show in printout.

| | | 6,244.00 | ‡ |
| VAT | | 1,248.80 | (1) |
| SELLING PRICE | | 7,492.80 | ‡ (1) ‡ for all 3 subtotals/totals |

10 Marks

Additional Guidance

- If candidate has applied VAT and Mark-Up to each subtotal - accept for 1 mark each. (In this instance - it doesn't matter if VAT is before Profit in the formula)
Final Selling Price may also be awarded if candidate shows this separately.
- If candidate has used kg or percentage figure when calculating Onions, DNA awards but accept subtotal with or without these figures.
(Common figures are £1608.20, £1,723.20, £1813.20)
- Accept labour subtotal as either, subtotal copied from Labour worksheet OR a subtotal calculated in Job Cost worksheet
- Watch for consequentiality on Preparation and Baking Overheads. For Baking OH - accept candidate using either basic hours given or the basic hours they worked out.
- For Packaging Department Overhead, accept £120 for 1 mark. Any other figure - 0 marks.
- If Total Cost label missing/wrong (eg Prime Cost) - Ignore
- If Profit and VAT not labelled, DNA 1 of the 2 marks.
- If Profit or VAT subtracted - DNA subtotal/final total mark
- If VAT before Profit - DNA the VAT mark.
- If final total not labelled Selling Price/Sales Value/Cost to Customer etc - DNA award
- Ignore any extra data below final Selling Price.
