General Marking Principles for National 5 Cantonese Listening

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this Paper. These principles must be read in conjunction with the specific Marking Instructions for each question. The marking schemes are written to assist in determining the 'minimal acceptable answer' rather than listing every possible correct and incorrect answer.

- (a) Marks for each candidate response must always be assigned in line with these General Marking Principles and the specific Marking Instructions for the relevant question.
- (b) Marking should always be positive, ie marks should be awarded for what is correct and not deducted for errors or omissions.
- (c) For live Listening Marking Instructions, there will be a process of illustrating other acceptable answers.
- (d) The utmost care must be taken when entering and totalling marks. Where appropriate, all summations for totals must be carefully checked and confirmed.
- (e) The Marking Instructions indicate the essential idea that a candidate should provide for each answer.
- (f) The answers for each question must be based on the listening item.
- (g) The assessment of overall purpose is always a supported question (for example, a grid) in Item 1.
- (h) There are two or three supported marks across the two items. Where there are supported marks in the form of checklists, award zero marks if a candidate ticks all boxes.
