# Welcome to the Google plex!

*Internet giant to build futuristic headquarters*

### **INTRODUCTION**

Google plc, the internet giant, has planned a massive expansion of its Californian headquarters (HQ). The million square foot headquarters, commonly referred to as the “Googleplex”. This is the first time the company has commissioned a building to be designed from scratch rather than modifying premises built by others. Google will have a building designed exactly for its own purpose and one which takes staff needs into account.

### **CORPORATE SOCIAL RESPONSIBILITY (CSR)**

Google’s HQ plans to have solar panels and charging stations for employees’ electric cars or indeed Google’s own “driverless” cars that transport employees around the district. A low-energy heating and cooling system will allow Google to supply 100 percent fresh air economically. Most existing buildings introduce only a small percentage of fresh air. The company also seeks to eliminate potentially harmful chemicals in building materials. Google also have their own charity called “Google.org” and one of their commitments is to encourage the use of renewable energy in the United States of America.

## **GOOGLE'S PRODUCT PORTFOLIO**

The need for a new HQ comes as Google has grown by developing many new products. It has also acquired other technology companies over the years (see Exhibit 1). Products range from the original Google search engine to the Android mobile operating system for smartphones and tablets. Google's product portfolio can be seen in more detail in Exhibit 2.

## **CORPORATE CULTURE**

Google has a very relaxed corporate culture and this has been taken into account in the planning of the building. Although employees can work from outwith the office, the new HQ has been designed to encourage employees to want to be there so that they benefit from regular communication and idea sharing. Most Google employees have flexible working hours, adding to the general feeling of wellbeing.

The design will also allow employees to meet up easily and chat. Employees can wear their own casual clothes and pedal on free bicycles or walk to informal meetings in the roof gardens or coffee shops. The Googleplex will continue to use the preferred Google colour scheme of primary colours currently used in the existing HQ and will house impressive facilities. Google's offices are well-known for their perks such as gourmet cafes, sleep pods, laptops attached to gym equipment and even pool tables and bowling alleys!

## **RECRUITMENT AND SELECTION**

Google's new employees are called "Nooglers". It may soon face competition in employing the very best potential "Nooglers" because other technology giants are also improving their offices. These rival businesses wish to ensure that they, like Google, can attract the best talent in the competitive job market.

Google and their competitors recruit for vacancies outwith their current staff from the same pool of University graduates and the wider workforce. Apple, its main competitor, is currently building an even bigger environmentally friendly campus. Meanwhile, Facebook is trying to tempt the next generation of IT graduates by creating a "Main Street" of stores, restaurants and facilities at the centre of its headquarters.
