**Katie Millar**

Qualifications Officer

## Diet 2019

### Course reports

Please read the annual course report for Higher Photography. We produce these reports following the exam diet and they provide information on how candidates performed in course assessment for National Qualifications.

Course reports include a summary of areas candidates performed well in and areas candidates found demanding. They also contain advice on preparing candidates for future assessment, and statistical data relating to grade boundaries. Course reports are available from the [subject pages](#) of our website.

## Coursework

### Submitting coursework

Please ensure candidates use the current, published coursework assessment task.

Ahead of the uplift of the Higher Photography project assessment task in May, we would like to remind you that there is a 500 word limit for the evaluation. If the word count exceeds the maximum by more than 10%, a penalty will be applied.

Further information can be found in our [Coursework for External Assessment](#) document and the [subject pages](#) of our website.

# Information and guidance

## Candidate evidence

New candidate evidence and commentary materials will be published in due course on our Understanding Standards website for the:

- ◆ question paper
- ◆ project

These materials contain examples of candidate assessment evidence and a commentary that explains why the evidence has, or has not, met the required assessment standards. You will be able to access them via the 'Understanding Standards' tab on the [Photography subject page](#). Centres will be notified via Centre News once these materials have been published.

## Videos

We have published videos that have been created to help support teachers, lecturers and candidates with their understanding of basic camera concepts. There will be twelve videos available altogether, and we will notify centres when more videos have been published. The videos are available under the 'Photography Resources' tab on the [Higher Photography subject page](#).
