I am ~~writing~~ <sup>writing</sup> today about the advantages and disadvantages of group work.

I ~~recom~~ <sup>recom</sup> some students, people like <sup>to</sup> working in groups and others like to work alone.

Firstly ~~mainly~~ - advantages. In my opinion first advantage is <sup>fact</sup> that some people in group can know something more than you, so it is easy to help each other. Also in group you can have more ideas, one person can be a ~~leader~~ leader and push team. First advantage is that you have preparation for your future work. Almost everywhere we need <sup>to</sup> work with people. Also a lot of companies are looking for employers <sup>which</sup> like to work in groups and they have good communication skills.

Moving to disadvantages of group work.

First, I think a lot of people ~~do not~~ do not like loud people because they can not concentrate. Second problem is that people are on different levels. I mean one person can <sup>love</sup> something and does it with passion and rest of group need just pass exams and subject. Future more <sup>the</sup> few person in group can <sup>work</sup> harder than <sup>the</sup> rest of group and then all of them have the same scores.

This fact ~~can~~ demotivated students <sup>which</sup> work hard.

Sum up everything and using also my experiences I think <sup>two</sup> skills are very important and useful. Work ~~alone~~ <sup>alone</sup> and in groups give us a lot of experiences. Of course ~~every~~ everything depends. I <sup>tolly</sup> with <sup>fact</sup> that people are lazy and sometimes is better work alone and be independent, but also we are human and we were born to be in groups. That's why even we do not like it we need to try.
