Further information

Call SQA's Customer Contact Centre on 44 (0) 141 500 5030 or 0345 279 1000.
Alternatively, complete our [Centre Feedback Form](#).

History of changes

It is anticipated that changes will take place during the life of the qualification and this section will record these changes. Centres are advised to check SQA Connect to confirm they are using the up to date qualification structure.

NOTE: Where a unit is revised by another unit:

- ◆ No new centres may be approved to offer the unit which has been revised.
- ◆ Centres should only enter students for the unit which has been revised where they are expected to complete the unit before its finish date.

Version number	Description	Date
02	Revision of Unit: HR16 47 - Managing and Working with People (finish date 31/07/2021) has been replaced by J1NG 47 Managing and Working with People	15/03/19

1 Introduction

This is the arrangements document for the SQA Advanced Certificate in Contracting Management. This document includes background information on the group award, its aims, details of the group award structure, and guidance on delivery.

The SQA Advanced Certificate is designed to equip candidates with the knowledge, understanding and skills required for success in current and future employment or progression to further academic and/or professional qualifications.

2 Nature and purpose of the award

The SQA Advanced Certificate in Contracting Management is a unique award, catering for the specific development and skills enhancement needs, principally for a sector of the construction industry which has no alternative programme. Organisations working within the contracting sector require skills such as: managing a project, and competence in the legal procedures (applied universally within the construction industry) with which they must comply. Managers should also understand the cashflow implications when negotiating contracts and be aware that costs will start escalating from the commencement of the contract, but revenue will be received at pre-determined times. Many of the firms working in the contracting sector may be relatively small and so lack the knowledge or skill to develop plans for long-term development of the organisation. This qualification will help to bridge that gap by including the study of corporate strategy, which introduces candidates to aspects of matching an organisation to its environment and long-term planning techniques.

3 Aims of the award

The aims of the SQA Advanced Certificate in Contracting Management reflect the specialist nature of the group award to the contracting sector of the construction industry. The aims also address the need to develop competent professionals who can respond positively to the rapidly changing environment of the contracting sector of the construction industry.

3.1 General aims of the award

The general aims of the SQA Advanced Certificate in Contracting Management are:

- 1 to develop the transferable skills, including core skills, required to meet the demands of employers and/or progression to higher education
- 2 to develop candidates' knowledge and skills in planning, developing and evaluating
- 3 to enable progression within the SCQF
- 4 to develop study and research skills

3.2 Specific aims of the award

The specific aims of SQA Advanced Certificate in Contracting Management are:

- 5 to prepare candidates for employment in a managerial role within the contracting industry
- 6 to enable candidates to utilise personal and teamwork competences for effective self-performance and the performance of the team and organisation
- 7 to enable candidates to respond to the environment in which the organisation operates
- 8 to explore the practical issues of project management in the contracting industry

3.3 Target groups

The SQA Advanced Certificate in Contracting Management is suitable for:

- ◆ candidates who wish to enter operational management positions with employers in the contracting industry
- ◆ experienced managers seeking a nationally recognised qualification

3.4 Employment opportunities

The SQA Advanced Certificate in Contracting Management is particularly suited to those candidates employed, or aspiring to employment, in the following roles:

- ◆ contracts manager
- ◆ facilities manager
- ◆ project manager
- ◆ estimators

4 Access to the qualification

As with all SQA qualifications, access to this group award will be at the discretion of the centre. All prospective candidates must be treated fairly in regard to access. The qualification should be open to all candidates, irrespective of their current employment status, provided they have a realistic chance of achievement.

The SQA Advanced Certificate in Contracting Management is designed for candidates who want to enter into operational management positions within the contracting industry. The award is also intended for experienced managers seeking a nationally recognised qualification. Candidates with relevant work experience will be particularly well equipped for this award by being able to relate theories and concepts into the appropriate context. This applies in particular to conducting investigations for the graded unit, which is a work-based report.

Examples of appropriate entry requirements are given below. These are not exhaustive or mutually exclusive and may be considered in a variety of combinations.

4.1 Formal qualifications

- ◆ Any relevant National Certificate Group Award at National 5 or Higher
- ◆ Any two National Qualifications at Higher together with three Standard Grade passes at 3 or above
- ◆ An SVQ at level 3 in a relevant area
- ◆ Different combinations of relevant and equivalent qualifications from other awarding bodies

As the qualification is aimed at those aspiring to, or already in a management level post within the contracting industry, it would be beneficial if one of the above qualifications was in electrical skills, electrical engineering, plumbing or construction skills.

4.2 Work experience

- ◆ Candidates should have experience of working within the contracting industry, preferably with some time in the contracting sector or in controlling the operations of sub-contractors
- ◆ Relevant work experience in a supervisory role is desirable

4.3 Core skills

The recommended core skills entry profile is:

Core Skill	SCQF level
Communication	5
Using Numbers	5
IT	5
Problem Solving	5
Working with Others	5

4.4 English as an additional language

For candidates for whom English is not their first language it is recommended that they possess English for Speakers of other Languages (ESOL) level 5 or a score of 5.5 in International English Language Testing System (ILETS).

5 Award structure

The group award has been designed in accordance with SQA's design principles for SQA Advanced Awards, ie:

- ◆ SQA Advanced Certificates shall be designed to be at SCQF level 7 and shall comprise 96 SCQF credit points, with at least 48 credit points at SCQF level 7. The SQA Advanced Certificate should include a mandatory section of at least 48 SCQF credit points and include one graded unit of 8 SCQF credit points at SCQF level 7.
- ◆ SQA Advanced Certificate and SQA Advanced Diploma programmes shall incorporate opportunities for candidates to develop core skills to levels required by the occupations or progression pathways the SQA Advanced Qualifications support.

5.1 Framework

To attain the SQA Advanced Certificate in Contracting Management 12 SQA Advanced credits are required:

Unit title	Code	SCQF credit points	SCQF level	SQA credit
Mandatory units — 10 credits				
Contracting Procedures	HV2A 47	16	7	2
Contracting Industry Project Management: Practical Issues	HV28 47	16	7	2
Contracting Industry: An Introduction to Strategic Management	HV29 47	8	7	1
Management: Developing Self-management Skills	HT5H 47	8	7	1
Managing and Working with People	J1NG 47*	16	7	2
Financial Studies for the Construction Industry	HT11 48	8	8	1
Contracting Management: Graded Unit 1	HV26 47	8	7	1
Optional units — 2 credits are required				
Management: Leadership at Work	HV2C 47	8	7	1
Developing the Individual within a Team	HR13 47	8	7	1
Management: Plan, Lead and Implement Change	HV37 48	8	8	1

5.1.1 Graded unit

The purpose of the graded unit is to assess the candidate's ability to integrate and apply the knowledge and/or skills gained in the individual units, to demonstrate that they have achieved the principal aims of the qualification, and to grade candidate achievement. The graded unit will be assessed and a grade of A, B or C will be awarded.

The graded unit is a project-based graded unit taking the form of a practical assignment. This will assess the candidate's ability in the application and integration of knowledge and skills in the planning, developing and evaluating of a given task. The skills developed in the practical assignment (including planning/investigating, identifying issues for research, selecting and devising research methods, gathering, interpreting and analysing information, presenting findings and conclusions and evaluating the investigation effectively) test whether the aims of the SQA Advanced Certificate in Contracting Management have been achieved. This is also appropriate preparation for candidates for employment, in that the format relates to the complex environment that candidates are likely to be employed in.

5.1.2 Recommended core skills entry and exit profile

The recommended entry and exit profile for the SQA Advanced Certificate Contracting Management is detailed below:

Core Skill	Entry level	Exit level
Communication	SCQF level 5	SCQF level 6
Numeracy	SCQF level 5	SCQF level 6
IT	SCQF level 5	SCQF level 6
Problem Solving	SCQF level 5	SCQF level 6
Working with Others	SCQF level 5	SCQF level 6

5.2 Mapping information

5.2.1 Mapping of award aims to SQA Advanced Units

Appendix 1 shows how the group award aims, as given in Section 3, are met by the individual units.

5.2.2 National Occupational Standards

The National Occupational Standards (NOS) for management and leadership are developed by the Management Standards Centre. These standards describe the level of performance expected in employment for a range of management and leadership function/activities. Appendix 2 shows how the SQA Advanced units link to the NOS.

5.3 Articulation

5.3.1 Articulation

Articulation arrangements exist between a number of Scottish, UK and international universities where SQA Advanced Certificates and Diplomas will be accepted as advanced entry to either the second or third year of a related degree programme. Depending on the specific degree programme, certain units may be required as part of the SQA Advanced Certificate/Diploma. The optional section of the framework is sufficiently broad to ensure that centres are able to comply with reasonable articulation requests. A high proportion of our candidates have articulated to degree programmes and successfully completed them

Candidates achieving the SQA Advanced Certificate in Contracting Management award may progress to the Chartered Management Institute's Executive Diploma in Management offered by the Andrew Carnegie Business School. Graduates of the Executive Diploma in Management may apply for entry to the final year of Edinburgh Napier University's Master in Business Administration.

The SQA Advanced Certificate in Contracting Management also prepares candidates for progression to degree programmes in Management, Facilities Management and Project Management.

5.3.2 Professional bodies

SQA Advanced Certificates and Diplomas are recognised by many professional bodies. Candidates achieving an SQA Advanced Certificate/Diploma may meet the professional body entry requirements. Candidates may also gain partial and full exemptions to professional body exams.

Candidates gaining the SQA Advanced Certificate in Contracting Management followed by post-graduate level study may apply for membership of the Chartered Management Institute. Candidates may then elect to progress onto an MSc in Facilities Management to gain membership of the British Institute of Facilities Management.

6 Approaches to delivery and assessment

6.1 Mode of delivery

It is anticipated that the delivery of this group award will be on a part-time basis with the main delivery modes taking the form of fortnightly half-day, evening and open learning. The preferred mode of delivery maybe through an open or ‘blended’ approach, which utilises a series of workshops with IT support offered through a virtual learning environment (VLE).

6.2 Sequence of delivery

While the delivery of the qualification is at the discretion of the centre, Appendix 4 gives a suggested sequence of delivery over two years.

The mandatory unit *Management: Developing Self-management Skills* (HT5H 47) develops management competences, which may be evidenced by candidates producing a portfolio of evidence. It is recommended that centres commence with this unit to allow candidates to display enhancement of management competences across the first twelve months of their programme of study. The SCQF level 8 units may be satisfactorily left to year two as candidates gain in competence and confidence from successful completion of year one of the award.

The importance of core skills has been recognised and these are developed throughout the award. A core skills signposting is given in Appendix 6 — this shows which core skills may be developed within individual units.

6.3 Assessment strategy

The design principles for SQA Advanced Qualifications encourage a more holistic approach to assessment and this has been adopted in the SQA Advanced Certificate in Contracting Management. The SQA Advanced Unit Specification places an emphasis on assessing whole outcomes or a combination of outcomes. Some of the units can be assessed holistically rather than on an individual outcome basis. This has the effect of reducing the assessment burden on both the candidate and awarding centre. Candidates may practise the integration of relevant concepts and theories, and/or the evaluation of a task conducted to meet the requirements of earlier outcomes. Further guidance on holistic assessment can be located within the relevant unit specifications.

A summary of the assessment methods used within the individual units is given in Appendix 6.

6.4 The graded unit

The graded unit is project-based, and takes the form of a practical assignment designed to provide candidates with the opportunity to demonstrate that they possess the competences needed to operate effectively as a manager in the contracting industry. It is designed to enable candidates to apply some of the theories of management to tackle a particular work-based situation and to deal with issues arising from it. Candidates should be given a date for completion of the graded unit, with information issued between three months and four months prior to the completion date. During this time the assessor may answer questions, provide clarification, guidance and reasonable assistance.

Upon completion, the submission should be marked as soon as possible with a grade being given, which will reflect the quality of the evidence at the completion date. Reference should be made to the graded unit specification for details on the minimum evidence requirements and full graded-related criteria.

The evidence for the graded unit project is generated over time and involves three distinct stages, where each stage has to be achieved before the next is undertaken. Thus any re-assessment of stages must be undertaken before proceeding to the next stage. If a candidate fails the project overall or wishes to upgrade, then this must be done using a *substantially different* project, ie all stages are undertaken using a new project. At this level, candidates should work independently. Centres may wish to informally question candidates at various stages on their knowledge and understanding of the project on which they have embarked to ensure that the project is the work of the candidate. Centres should ensure that where research etc, is carried out in other establishments or under the supervision of others that the candidate does not receive undue assistance.

6.5 Re-assessment

The way that centres re-assess candidates is integral to the way they manage assessment as a whole and as such, will be subject to internal verification. In order to ensure that the assessment is as holistic as possible and that assessors are able to effectively judge candidates' performance in the outcome or unit as a whole, it may not always be possible to assess only those parts of the performance in which candidates have not satisfactorily demonstrated competence. Scenarios where candidates may require to undertake the whole assessment include:

- ◆ assessment which tests knowledge and other cognitive skills and where it may not be possible to extract some of the items for re-assessment
- ◆ where parts of several outcomes are involved
- ◆ where a project has been designed as an integrated assessment and where there is a requirement to complete the project as a single complex task

Candidates may require to do only part of an assessment where their evidence has been generated over a period of time and/or a discrete part of the unit, such as an outcome, has been assessed originally.

6.6 Prior verification of unit assessments

Where a centre intends to create their own assessment instruments they may wish to have these prior verified before use. While it is not mandatory that prior verification takes place it is strongly recommended that centres take advantage of this service with any new instruments of assessment that are devised, particularly graded units.

6.7 Open learning

Open, distance or mixed modes of learning will be the main delivery options for the SQA Advanced Certificate in Contracting Management. This is useful for candidates due to the lack of local centres for study.

Overall, aspects of many units can be delivered on an open-learning basis, but arrangements may be required to ensure that any assessments are candidates' own work. Full details on the suitability of individual units for open learning are contained in each individual unit specification.

Candidates may be asked to attend and participate in a bi-annual residential meeting, which comprises a series of workshops designed to cover a number of key elements of underpinning knowledge. In addition, candidates should be given access to centres' virtual learning environments (VLEs).

The VLEs can:

- ◆ act as a repository of learning resources, a source for extended-learning resources and links to internet-based reference material
- ◆ standardise delivery
- ◆ act as a means of communication between the tutor/assessor and candidate
- ◆ provide a means of communication between candidates utilising chat rooms, forums, or similar, thereby offering the opportunity for peer-group support for distance learning candidates
- ◆ act as a conduit for passing on assessments and for receiving feedback and marking
- ◆ provide an opportunity for interaction when completing or participating in course-based activities

To ensure the veracity of candidate submissions, it is recommended that a mix of authentication tools be used. These may include:

- ◆ questioning — personal, telephone or online interview
- ◆ personal logs or personal statements
- ◆ witness testimony
- ◆ summative assessment under supervision
- ◆ signing and counter signing of candidates' work, using 'statements of authenticity'

7 General information for centres

Equality and inclusion

The unit specifications making up this group award have been designed to ensure that there are no unnecessary barriers to learning or assessment. The individual needs of learners will be taken into account when planning learning experiences, selecting assessment methods or considering alternative evidence.

Further advice can be found on our website

www.sqa.org.uk/assessmentarrangements.

Internal and external verification

All instruments of assessment used within this/these group award(s) should be internally verified, using the appropriate policy within the centre and the guidelines set by SQA.

External verification will be carried out by SQA to ensure that internal assessment is within the national guidelines for these qualifications.

Further information on internal and external verification can be found in *SQA's Guide to Assessment and Quality Assurance for Colleges of Further Education* (www.sqa.org.uk).

8 General information for candidates

The award of SQA Advanced Certificate in Contracting Management has been designed to meet the demands and requirements of today's modern working environment. It will provide you with the opportunity to develop the skills and knowledge required for employment within the contracting sector of the construction industry.

Whether you are an aspiring or practising manager you will have the opportunity to develop generic management skills which will enable you to progress within the industry or articulate to higher education courses. The award is well respected by employers and is highly valued by graduates of the qualification as it provides the opportunity to become a qualified and competent manager in the contracting industry.

The award contains contemporary knowledge and skills, which are matched to the National Occupational Standards for management.

The SQA Advanced Certificate in Contracting Management will normally be delivered over two years on a part-time basis or via an open-learning or blended mode of delivery.

To attain the SQA Advanced Certificate in Contracting Management you must achieve 12 SQA Advanced credits — 10 mandatory and 2 optional credits. The credits will take the form of SQA Advanced units which may be one or two credit units.

1 credit = approximately 40 hours of study and 40 hours of self-study

You may be expected to attend and participate in a bi-annual residential, which comprises a series of workshops designed to assist you grasp some of the key elements covered by the appropriate unit(s). You may also be given access to your centre's virtual learning environment (VLE). This is an IT-based resource, which may be accessed remotely, at a time and place that is suitable to you. The VLE can act as:

- ◆ a repository of learning resources, a source for extended-learning resources and provide links to internet-based reference material
- ◆ a way to ensure standardised delivery
- ◆ a means of communication between the tutor/assessor and candidate
- ◆ a means of communication between candidates utilising chat rooms, forums, or similar, thereby offering the opportunity for peer-group support for distance learning candidates
- ◆ a conduit for passing on assessments and for receiving feedback and marking
- ◆ an opportunity for inter-activity when completing or participating in course-based activities

One of the mandatory credits within the SQA Advanced Certificate is the graded unit, which is designed to assess your ability to integrate and apply your knowledge and skills, and to demonstrate that you have achieved the principal aims of the group award. This will take the form of a practical assignment. It will enable you to apply some of the theories of management to tackle a particular work-based situation and to deal with issues arising from it. You will be given a date for completion of the graded unit project. However, you shall receive instructions between three months

and four months prior to the completion date. During this time your assessor may answer questions, provide clarification, guidance and reasonable assistance. Upon completion, your submission will be marked and a grade given. This is the only unit within the award which is graded.

By undertaking the SQA Advanced Certificate Contracting Management award, you will have opportunities to develop core skills in:

- ◆ Communication
- ◆ Numeracy
- ◆ Working with Others
- ◆ Problem Solving
- ◆ IT

On completion of the SQA Advanced Certificate in Contracting Management you may progress to a variety of higher education programmes, either through a higher education institution or with a professional body.

9 Glossary of terms

SCQF: This stands for the Scottish Credit and Qualification Framework, which is a new way of speaking about qualifications and how they inter-relate. We use SCQF terminology throughout this guide to refer to credits and levels. For further information on the SCQF visit the SCQF website at www.scqf.org.uk

SCQF credit points: One SQA credit is equivalent to 8 SCQF credit points. This applies to all SQA Advanced units, irrespective of their level.

SCQF levels: The SCQF covers 12 levels of learning. SQA Advanced units will normally be at levels 6–9. Graded units will be at level 7 and 8.

Subject Unit: Subject units contain vocational/subject content and are designed to test a specific set of knowledge and skills.

Graded Unit: Graded units assess candidates' ability to integrate what they have learned while working towards the units of the group award. Their purpose is to add value to the group award, making it more than the sum of its parts, and to encourage candidates to retain and adapt their skills and knowledge.

Dedicated unit to cover core skills: this is a non-subject unit that is written to cover one or more particular core skills.

Embedded core skills: this is where the development of a core skill is incorporated into the unit and where the unit assessment also covers the requirements of core skill assessment at a particular level.

Signposted core skills: this refers to the opportunities to develop a particular core skill at a specified level that lie beyond automatic certification.

Qualification Design Team: The QDT works in conjunction with a Qualification Manager/Development Manager to steer the development of the SQA Advanced Certificate/SQA Advanced Diploma from its inception/revision through to validation. The group is made up of key stakeholders representing the interests of centres, employers, universities and other relevant organisations.

Consortium-devised SQA Advanced Certificates and SQA Advanced Diplomas are those developments or revisions undertaken by a group of centres in partnership with SQA.

Specialist single centre and specialist collaborative devised SQA Advanced Certificates and SQA Advanced Diplomas are those developments or revisions led by a single centre or small group of centres who provide knowledge and skills in a specialist area. Like consortium-devised SQA Advanced Certificates and SQA Advanced Diplomas, these developments or revisions will also be supported by SQA.

10 Appendices

- Appendix 1: Mapping of award aims to SQA Advanced units
- Appendix 2: Mapping to National Occupational Standards
- Appendix 3: Progression pathways within the SCQF
- Appendix 4: Credit transfer arrangements
- Appendix 5: Suggested delivery schedule
- Appendix 6: Core skills signposting
- Appendix 7: Summary of assessment methods

Appendix 1: Mapping of award aims to SQA Advanced units

The table identifies how the aims identified in Section 3 are met by the mandatory and optional units.

Unit code	Unit title	Aims
HV26 47	Contracting Management: Graded Unit 1	1, 2, 3, 4, 5, 6, 7, 8
HT5H 47	Management: Developing Self-management Skills	1, 2, 3, 5, 6
HV2A 47	Contracting Procedures	1, 2, 3, 4, 5, 6, 7
HR16 47	Managing and Working with People	1, 3, 6, 7
HT11 48	Financial Studies for the Construction Industry	1, 3
HV29 47	Contracting Industry: An Introduction to Strategic Management	1, 2, 3, 4, 5, 6, 7
HV28 47	Contracting Industry Project Management: Practical Issues	1, 2, 3, 4, 5, 7, 8
HV2C 47	Management: Leadership at Work	1, 2, 3, 5, 6
HR13 47	Developing the Individual within a Team	1, 2, 3, 5, 6, 7
HV37 48	Management: Plan, Lead and Implement Change	1, 2, 3, 4, 5, 6, 7

Appendix 2: Mapping to National Occupational Standards

The Management Standards Centre (MSC) is the recognised Standards Setting Body for the management and leadership sector. The current National Occupational Standards (NOS) were developed following extensive research and describe the level of performance expected in employment for a range of management and leadership functions/activities.

There are six functional areas of management and leadership. Within each function, areas of competence were identified that have become the units of competence.

To attain the award of SQA Advanced Certificate in Contracting Management a candidate must achieve all mandatory units totalling 10 credits and optional units worth 2 credits. The table overleaf identifies how appropriate National Occupational Standards map against the units comprising the SQA Advanced Certificate in Contracting Management.

Not all units/outcomes are directly mapped against the NOS due to the specialised subject content of Contracting Management.

Mandatory Units — 10 credits needed

Mgt Std ID	Unit title	Code	SQA credit value
A1 + A2	Management: Developing Self-management Skills	HT5H 47	1
B11, D1, D3 + D6	Managing and Working with People	HR16 47	2
E2	Financial Studies for the Construction Industry	HT11 48	1
C5	Contracting Industry: An Introduction to Strategic Management	HV29 47	1
B8 +D2	Contracting Procedures	HV2A 47	2
D4, F1 + E6	Contracting Industry Project Management: Practical Issues	HV28 47	2
HV26 47	Contracting Management: Graded Unit 1	HV26 47	1

Optional Units — 2 credits needed

A3, B5, B6, D2 + D6	Management: Leadership at Work	HV2C 47	1
D1	Develop the Individual within a Team	HR13 47	1
C4, C5 + C6	Plan, Lead and Implement Change	HV37 48	1

Appendix 3: Progression pathways within the SCQF

The chart outlines the main qualifications in the general management area. Candidates may progress vertically from one qualification to another or diagonally from one level to a higher level.

SCQF level	School, Further Education and Higher Education Qualification Awards		Type of job	Work-based Award
12	Doctorate			
11	MBA / MSc		Departmental Manager	SVQ 5
	And	CMI Executive Diploma in Management		
	Honours degree			
10				
9	Undergraduate Degree	CMI Diploma in Management	Senior Projects Mgr	SVQ 4
8				
7	Courses at Advanced Higher		Project / Contracts Mgr Estimator	SVQ 3
		SQA Advanced Certificate in Contracting Management		
		SQA Advanced Certificate in Electrical Engineering or similar		
6	Courses at Higher Level		Final Year apprentice	
5	Standard Grade	Courses at Nat 5 level		SVQ 2
4	Credit	Courses at Nat 4 level		
3	General	Clusters at ACC 3		
2	Foundation	Clusters at ACC 2		

Appendix 4: Suggested delivery schedule

Year	Sequence of unit delivery					SQA Advanced Credits
	A	B	C	D	E	
1	Management: Developing Self-management Skills (1 credit)	Managing and Working with People (2 credits)	Contracting Procedures (2 credits)	Option 1 (1 credit)	_____	6
2	Contracting Industry Project Management: Practical Issues (2 credits)	Contracting Industry: An Introduction to Strategic Management (1 credit)	Financial Studies for the Construction Industry (1 credit)	Option 2 (1 credit)	Contracting Management: Graded Unit 1 (1 credit)	6

Appendix 5: Core Skills signposting

Unit code	Unit title	Communication		Numeracy		IT	Problem Solving			Working with Others
		Oral	Written	Using Graphical Information	Using Number		Critical Thinking	Planning & Organising	Reviewing & Evaluating	
HV26 47	Contracting Management: Graded Unit 1		S6	S6	S6	S6	S6	S6	S6

HR13 47	Developing the Individual within a Team									E6
HV37 48	Management: Plan, Lead and Implement Change	S6	S6			S6	S6	S6	S6	S6

S = Signposted; E = Embedded; 6 = SCQF level

Appendix 6: Summary of assessment methods

Unit title	Code	Outcome(s)	Assessment method
Contracting Management: Graded Unit 1	HV26 47	All	Practical assignment
Management: Developing Self-management Skills	HT5H 47	All	Integrated portfolio of evidence
Managing and Working with People	HR16 47	1	Case study
		2, 3	Combined case study using pro forma documentation
Financial Studies for the Construction Industry	HT11 48	All	Each outcome should be assessed on a summative basis or the centre may wish to develop a holistic approach
Contracting Industry: An Introduction to Strategic Management	HV29 47	All	A single instrument of assessment based on a real organisation would be the preferable choice
Contracting Procedures	HV2A 47	1, 2	Report identifying contractual arrangements and standard forms of contract for specific project situations
		3	Report identifying significant clauses in a contract and can demonstrate the correct procedures for their use
		4	Report requires evidence to show the candidate understands sub-contracts
Contracting Industry Project Management: Practical Issues	HV28 47	1	Extended response describing project documentation and start up
		2, 3, 4	Holistic report relating to management of project (s)
		5	Report evaluating the process of evaluating a project
