Total marks — 80

Attempt ALL questions.

All dimensions are in mm.

All technical sketches and drawings use third angle projection.

You may use rulers, compasses or trammels for measuring.

In all questions you may use sketches and annotations to support your answer if you wish.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use **blue** or **black** ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

1. A knife and chopping board storage system is shown below. The body is made from sheet metal. A CAD technician produced the rendered 3D CAD illustration and the pictorial line drawing shown below.

A 3D CAD model rather than a physical model of the storage system was created during the development stage.

- (a) State two reasons why a 3D CAD model was more suitable than a physical model.

2

To produce the CAD model the CAD technician was given information about the storage system. One dimension stated: A/F 300mm.

- (b) State the meaning of A/F.

1

1. (continued)

The CAD technician has been asked to produce an appropriate surface development for the storage system and identify where key features will be placed.

- (c) Indicate, on the graphic below, where the Text, Entry hole and Exit hole would be located.

3

Use **A** to indicate on the panel where the Text would be located.

Use **B** to indicate on the panel where the Entry hole would be located.

Use **C** to indicate on the panel where the Exit hole would be located.

1. (continued)

To aid the production of the storage system the CAD technician was asked to complete the orthographic drawing shown below.

Hidden detail and slots removed for clarity.

(d) Identify, using a tick (✓), the correct elevation. Ignore wall thickness.

1

A true shape of surface X-X was required.

(e) Identify, using a tick (✓), the correct true shape. Use a ruler or trammel to measure.

1

* X 8 3 5 7 5 0 1 0 4 *

1. (continued)

A true shape of surface Y–Y was required.

- (f) Identify, using a tick (✓), the correct true shape. Use a ruler or trammel to measure.

1. (continued)

The CAD technician was then asked to provide surface developments of the body of the knife block, without the top.

- (g) Identify the two correct surface developments, shown opposite, of the knife block when opened out at surface generators 'A' and 'B'.

You should refer to the orthographic drawing below.

- (i) When opened out at generator A, the correct surface development is view. 1

Insert number

- (ii) When opened out at generator B, the correct surface development is view. 1

Insert number

1. (continued)

The range of surface developments are show below.

1.

2.

3.

4.

5.

6.

A number of the knife blocks are to be produced from a single sheet of material.

- (h) Explain, in terms of environmental impact, why it is important to carefully consider the layout of multiple parts.

1

* X 8 3 5 7 5 0 1 0 9 *

2. A recipe app has been produced. The graphic artist was asked to ensure that the graphic layout was easy to follow.

- (a) Describe three ways, other than the numbering system, that the graphic artist has graphically communicated the **sequence** of the recipe shown above.

3

- (b) Describe two benefits that producing a recipe app, rather than physically printing a recipe book, would have for the environment.

2

2. (continued)

The app also contains an additional feature that analyses individual ingredients and calculates the overall health rating of the recipe.

- (c) Name the type of graph or chart that was used in the graphic shown above.

1

- (d) Describe one way that the graphic artist has graphically communicated the health rating of the individual ingredients.

2. (continued)

Two different sets of statistics that have been provided are shown below.

Statistics A		Statistics B	
Nutritional Data – Nuts		Healthy diet plan	
Cashew	170 Calories, 13g Fat, 8g Carb, 5g Protein, 1g Fibre	Fruit and Vegetables	33%
Hazelnut	180 Calories, 18g Fat, 4g Carb, 4g Protein, 2g Fibre	Carbohydrates	33%
Peanut	170 Calories, 14g Fat, 6g Carb, 7g Protein, 2g Fibre	Protein	12%
Walnut	210 Calories, 20g Fat, 6g Carb, 5g Protein, 2g Fibre	Milk and Dairy	15%
		Fats and sugars	7%

- (e) (i) State the most suitable type of informational graphic to present the data shown in **Statistics A**. 1

- (ii) Explain why this is an appropriate type of informational graphic to present. 1

- (f) (i) State the most suitable type of informational graphic to present the data in **Statistics B**. 1

- (ii) Explain why this is an appropriate type of informational graphic to present. 1

Three line types that will be used to complete the 2D CAD drawings to British Standard conventions are shown below.

(f) State the uses of the following line types.

(i) A chain thin line

1

(ii) A continuous thick line

1

(iii) A long dash dotted thin line, thick at ends.

1

— · — · — · — · — · — · —

The 2D CAD drawings are to be drawn using a scale.

(g) Explain what is meant by the term scale 2:1.

4. A speaker has been designed using 3D CAD software. A rendered illustration is shown below.

A pictorial view of one of the speaker components is shown below.

- (a) State the type of pictorial view shown above.

1

* X 8 3 5 7 5 0 1 2 2 *

4. (continued)

A working drawing of the speaker assembly is shown below.

Five pieces of information in the working drawing do not adhere to British Standard conventions.

(b) State the five errors found in this drawing.

5

You may annotate the orthographic drawing to support your answer.

* X 8 3 5 7 5 0 1 2 3 *

4. (continued)

Rubber feet are to be added to the base. Orthographic views and 3D illustrations of a rubber foot are shown below.

4. (continued)

- (c) Describe, using the correct dimensions and 3D CAD modelling terms, how the rubber foot, shown opposite, would be produced.

3

You may use sketches to support your answer.

* X 8 3 5 7 5 0 1 2 5 *

4. (continued)

The orthographic drawings of the speaker were shared online.

- (d) Describe two benefits of sharing these orthographic drawings online.

2

- (e) Explain why it would be useful to adhere to British Standard conventions and protocols when sharing these types of drawings.

2

- (f) Explain the purpose of the following types of production drawings.

- (i) Sectional views _____

1

- (ii) Assembly drawings _____

5. Many companies now specialise in applying promotional graphic posters, to advertise services to the public, around commercial vehicles.

A finished layout for a small building company is shown below.

5. (continued)

The design work for the layout was produced by a graphic designer.

- (a) Describe two ways in which the graphic designer used the following design elements and principles to enhance the layout.

(i) Line

2

(ii) Dominance

2

(iii) Colour

2

(iv) Unity

2

[Turn over

5. (continued)

Vehicles were traditionally hand painted to include information about a company. Modern processes involve printing promotional graphics which are then applied to a vehicle.

Traditional painting technique

Modern printed technique

- (b) Describe two advantages to the client of modern printing techniques over traditional painting techniques.

2

* X 8 3 5 7 5 0 1 3 1 *

6. A graphic designer submitted a draft layout for an architectural magazine article to the editor. The draft is shown below.

The editor provided some feedback to the graphic designer on how to improve the layout.

- (a) Describe, using the feedback shown below, four improvements the graphic designer should make to the layout using **Desktop Publishing techniques**.

(i) *The word 'house' in the heading is difficult to see*

1

(ii) *The large column of extended text makes it difficult to read*

1

(iii) *The bottom image would look better without the sky in the background*

1

(iv) *The body text is too close to the edge of the paper*

1

6. (continued)

The graphic designer used a sans serif font for the heading.

- (b) State two reasons why the graphic designer has chosen a sans serif font for the heading.

2

When inserting an image, the graphic designer used the handles of the image to increase its size. This resulted in the image being out of proportion, shown below.

- (c) Describe how the graphic designer could have resized the image without altering the proportions.

1

6. (continued)

During the production of the layout, using desktop publishing software, the graphic designer used **guidelines**.

- (d) Describe two advantages of using guidelines in the creation of promotional layouts.
