

## NQ 2015 MALPRACTICE STATISTICS

### 2015 National Qualifications – Malpractice Statistics

On Friday 12 February 2016, under its statutory duty as the regulator for National Qualifications in Scotland, the Scottish Qualifications Authority (SQA) publishes information on malpractice in the 2014-15 academic session.

The statistics show the number of reported incidents of malpractice investigated in the 2015 diet of examinations for National Courses at National 5, Intermediate 1, Intermediate 2, Higher, new Higher and Advanced Higher. They also provide information on the outcome of the investigations.

The number of candidates accused of cheating while sitting SQA examinations in 2015 remains extremely low. Penalties were applied in 163 cases - 0.031 per cent of the total number of entries (523,445).

Any kind of malpractice is totally unacceptable. The number of reported cases sends a strong message that each and every instance will be investigated thoroughly. SQA will continue to work with schools, colleges and the teaching profession to ensure that our zero tolerance approach is applied everywhere and every time.
