

# SQA Qualifications in Construction

SQA is an experienced awarding organisation with an international reputation for quality and service. We are experts in qualification and assessment design. We are Ofqual and Qualifications Wales recognised and have a growing range of qualifications on regulated frameworks.

We offer an extensive portfolio of construction qualifications to support the sector. SQA qualifications provide the skills and knowledge needed to build a successful industry.

We offer a comprehensive portfolio of competence and knowledge based qualifications, with new developments in progress.

Our portfolio includes:

- Construction Awards, Certificates and Diplomas
- Streetworks Assessment and Re-Assessment qualifications

We are experts in developing relevant qualifications delivering the real skills, knowledge and progression routes in demand by employers and learners alike.

## Working with SQA

*We have years of experience and success working with colleges, training providers, employers and schools throughout the UK and worldwide.*

*If you are a private company, public or third sector organisation, our qualifications can be delivered to your staff by SQA approved colleges or training providers or by becoming an approved SQA centre in your own right.*

## SQA qualifications in Construction

SQA's construction portfolio includes an extensive range of qualifications in the following areas:

- Craft
- Operative and Specialisms
- Technical, Supervisory and Management

SQA offers a range of Awards, Certificates and Diplomas; both knowledge-based training programmes, and competence workplace assessed qualifications. Our knowledge-based programmes are designed to provide learners with an opportunity to learn either in a training centre environment or in a real workplace environment. Learners can then demonstrate their workplace competence using our competence based qualifications.

There are various entry levels and progression opportunities within our programmes which learners can take advantage of.

### Streetworks

SQA offers a complete suite of Street Works qualifications for operatives and supervisors working on the roads/highways. These Street Works qualifications meet the requirements of the New Roads and Street Works Act 1991 (NRSW) which requires work involving the installation, renewal, maintenance and inspection of underground apparatus in the highway to be under the control of competent persons who are in possession of a valid Street Works card.
