

## Energy — **Waste**

Energy extracted from waste can produce useful power and reduces landfill, which is good news for Scotland's economy and environment.

Scotland produces its fair share of waste each year. But we also produce our share of another valuable resource — trained and highly skilled staff.

It's this resource that can help us turn our waste into energy.

SQA offer a wide range of relevant Waste Management qualifications all developed in association with the industry. Qualifications are awarded jointly in Scotland with the Waste Management Industry Training & Advisory Board (WAMITAB). WAMITAB award waste qualifications throughout the UK.

These vocational qualifications are ideal for people seeking entry or those already working in the waste industry who wish to improve their competence.

# Energy – Waste Qualifications

Qualification Name
SVQ 2 Waste Operations: Waste Collection Driver
SVQ 2 Waste Operations: Waste Collection Operative
SVQ 2 Waste Operations: Waste Site Operative
