

Candidate Guidance and Portfolio for the SVQ2 Demolition (Construction) SCQF level 5

Award Codes:

Demolition (GF5C 22) Plant (GF5D 22)

Candidate name:

Publication code: Z0357

Note

The National Occupational Standards which form the basis of this award were developed by constructionSkills. This document is for candidate use only and should not be used as a substitute for the National Occupational Standards.

Section 1 — General information about SVQs

Introducing SVQs

The qualification you are undertaking is a Scottish Vocational Qualification (SVQ).

SVQs are work-based qualifications which assess the skills and knowledge people have and need to perform their job role effectively. The qualifications are designed using National Occupational Standards.

For each industry sector there is a Sector Skills Council (SSC) which is made up of representatives from the industry or profession and it is the SSC's responsibility to develop the National Occupational Standards.

These standards define what employees, or potential employees, must be able to do, how well and in what circumstances to show they are competent in their work.

The Sector Skills Council for Demolition (Construction) is ConstructionSkills.

Access to SVQs is open to all and you can be assessed either against a particular Unit(s) or against the full SVQ. There are no entry requirements, no prescribed method of delivery, and no time constraints for completion or age limits.

SVQs are available at five levels of achievement which reflect the various technical and supervisory skills, knowledge, and experience which employees should have as they progress in their industry.

Who offers SVQs?

An organisation which offers SVQs is called a centre. This may be a school, college, university, employer, training provider or a combination of these. The centre has responsibility for the quality of the qualification and is required to work within an awarding body's policies and guidelines.

The Scottish Qualifications Authority (SQA) is your awarding body for this SVQ. This means that we are an organisation approved by government to design qualifications and awards. An awarding body endorses candidates' certificates so that an employer can be sure the qualification has gone through a rigorous and effective assessment process. SQA provides qualifications throughout the world and was formed by the merger of the Scottish Examination Board (SEB) and the Scottish Vocational Education Council (SCOTVEC).

What is the structure of an SVQ?

All SVQs have a common structure and consist of standards which can be broken down into various parts:

Units and Elements	Units define the broad functions carried out in your particular job and are made up of a number of Elements. Each Element describes a specific work activity which you have to perform and may relate to skills or to the demonstration of Knowledge and Understanding.
Performance Criteria	The level and quality of how you should carry out these activities is determined by a number of statements called Performance Criteria . Performance Criteria are used to judge your competence.
Range/Scope Statements	A Range Statement tells you in what circumstances you must be able to prove your competence and allows you to demonstrate that you can carry out tasks in different circumstances. Items included in the Range Statements must not be treated as optional. Range Statements are also called Scope in some National Occupational Standards.
Evidence Requirements	The Evidence Requirements specify the amount and type of evidence which you will need to provide to your assessor to show that you have met the standards specified in the Performance Criteria and in all the circumstances defined in the Range Statements.
Knowledge and Understanding	The section on Knowledge and Understanding states what you must know and understand and how this knowledge applies to your job.

If you are not yet clear about how we define standards — just remember that the standards have been developed by experts within your industry or profession and that all candidates aiming for this particular SVQ are being assessed against the same standards.

You will find an example of an SVQ Element overleaf.

An example of an SVQ Element

UNIT: (1) Working safely in an engineering environment

This is the **UNIT** title — it describes a role and task.

Element 1 Comply with statutory regulations and organisational requirements

This is the **ELEMENT** title. It describes part of the main role and task.

Performance Criteria

You must ensure that you

PERFORMANCE CRITERIA set out the standard of performance you need to demonstrate consistently to claim competence in a particular **Element**.

- Describe your duties describe the described and Safety at Work Act 1974.
- 2 Comply with Statutory Regulations at all times.
- 3 Comply with organisational safety policies and procedures at all times.

Range

This means you need to cover:

1 Relevant sections of the Health and Safety at Work Act 1974 (eg with regard to your duties to work in a safe manner, not to interfere with remove or misuse equipment provided for the safety of yourself and others, not to endanger others by your acts or omissions).

The **RANGE** defines the various circumstances in which you must be able to prove you are competent.

You must cover all of the items in the Range Statement.

Evidence Requirements

The things you must prove that you can do:

You need to demonstrate that you understand your duties and obligations under both statutory regulations and organisational requirements and you can do this by:

- 1 Giving an adequate explanation of the duties and responsibilities of every individual as described in the Health and Safety at Work Act 1974.
- 2 Ensuring that whilst carrying out your work and/or visiting other areas of the working environment you are aware of the specific safety requirements and regulations governing your activities.

Knowledge and Understanding

You must prove that you know and understand:

- 1 The roles and responsibilities of yourself and others under the Health and Safety at Work Act 1974.
- 2 The general regulations that apply to you being at work.
- The specific regulations which govern your work activities.

The **KNOWLEDGE AND UNDERSTANDING** Requirements state what you must know and understand and how this knowledge applies to your job.

How are SVQs achieved?

When you consistently meet the standards described in the Elements and show that you have the required skills and knowledge across the Range, you can then claim that you are *competent* in each Unit. You can claim certification for single Units or whole awards. Your centre will register your claim to competence through the awarding body. The awarding body you are registered with for this SVQ is the Scottish Qualifications Authority (SQA).

The process of gaining an SVQ is flexible and depends on your needs. At the beginning of the process your assessor will review your existing competence in relation to the standards and identify the most suitable SVQ. The level you start at will depend on the type and breadth of your current job role together with your past experience, skills and any relevant prior learning.

To achieve an SVQ, or a Unit of an SVQ, you must:

Demonstrate you meet the requirements of the Performance Criteria by collecting appropriate evidence as specified by the Evidence Requirements. This evidence is assessed against the national standards by a qualified assessor, who will be allocated to you by your centre. This will usually be someone who knows you, such as a manager or supervisor.

Evidence may come from:

- the accreditation of prior learning where evidence relates to past experience or achievements
- **current practice** where evidence is generated from a current job role
- a programme of development where evidence comes from assessment opportunities built into a learning/training programme whether at or away from the workplace
- a combination of these

How are SVQs assessed?

Assessment is based on what you can do and involves you, your assessor, an internal verifier and an External Verifier — see 'Who does what in SVQs' on the following page.

You will be asked to prove you are competent by providing evidence which shows:

- you can perform all the specified tasks consistently to the required standard (Performance Criteria)
- you understand why you are doing things (Knowledge and Understanding)
- you can apply the required skills in different ways (Range)

Assessment is flexible and you can be certificated for each Unit you successfully achieve, even if you do not complete the full SVQ. There is no set period of time in which you need to complete a Unit. However, you and your assessor should still set target dates for completing each Unit; otherwise your qualification could go on forever. Be realistic though, as there are many factors such as your previous experience, demands within your workplace and an availability of resources which will affect how quickly you are able to achieve the qualification.

Who does what in SVQs?

A number of individuals and organisations have parts to play in SVQ assessment. Their roles have been designed to guarantee fair, accurate and consistent assessment.

	Who are they?	What is their role?
Candidates	The person who wants to achieve the SVQ — in this case, you.	Need to show they can perform to National Occupational Standards in order to be awarded an SVQ or Unit(s).
Assessors*	An experienced person in the same area of work as the candidate, eg supervisor.	Judge the evidence of a candidate's performance, knowledge and understanding against the National Occupational Standards.
		Decide whether the candidate has demonstrated competence. Provide guidance and support to the candidate. Assist with planning assessments, giving feedback and recording candidate progress.
Internal verifiers	Individuals appointed by an approved centre to ensure the quality of assessment within the centre.	Advise assessors and maintain the quality of assessment in a centre.
		Systematically sample assessments to confirm the quality and consistency of assessment decisions.
Approved centres	Organisations approved by awarding bodies to coordinate assessment	Manage assessment on a day-to-day basis.
	arrangements for SVQs.	Must have effective assessment practices and internal verification procedures.
		Must meet criteria laid down by awarding bodies and be able to provide sufficiently competent assessors and internal verifiers.

	Who are they?	What is their role?
External Verifiers*	Individuals appointed by the awarding body to ensure that standards are being applied uniformly and consistently across all	Check the quality and consistency of assessments, both within and between centres, by systematic sampling.
	centres offering the SVQ.	Make regular visits to centres to ensure they still meet the criteria to deliver SVQs.

^{*} Assessors and internal and External Verifiers are required to have occupational expertise in the SVQs which they are assessing/verifying. They must also have, or be working towards, an appropriate qualification in assessment and verification.

What is evidence?

To claim competence for an SVQ Unit you need to gather evidence which shows you have met the standards. It is important that your evidence is easily understood so that it can be checked against the standards, by your assessor, your centre and the awarding body.

Evidence can take many forms including:

- direct observation of your performance by your assessor
- products of your work
- authenticated statement witness testimony
- personal statement
- outcomes from questioning
- outcomes from simulation
- case studies
- assignments or projects
- ♦ Accreditation of Prior Learning (APL) evidence from the past

It is important that your evidence is:

- valid it relates to the SVQ standard you are trying to prove
- authentic the evidence, or an identified part of it (eg a report) was produced by you
- consistent achieved on more than one occasion
- current usually not more than two years old
- ◆ sufficient covers all the performance and knowledge requirements laid down in the standards

Your evidence may be collected through a range of sources, such as employment, voluntary work, training programmes and interests/activities which you perform outside your work. It can also be produced in various formats, eg your own reports; testimonies from colleagues, supervisors or members of the public; projects; models; audio tapes, photographs; videos.

When you first begin your SVQ, you and your assessor should identify all the Units and Elements where you can use **integration of assessment**. Further details about integration of assessment can be found on page 10.

Demonstrating knowledge, understanding and skills

In order to meet the standards, you may also be required to prove Knowledge and Understanding. Each Unit contains a list summarising the knowledge, understanding and skills a candidate must possess. Evidence of how these have been achieved and applied could be included in the performance evidence as one or all of the following:

- descriptions of why a particular approach was used
- personal reports about the learning process
- reflective reports which include how a theory or principle was applied
- assessment interviews
- assessment tests
- responses to questioning

These should be included in your portfolio.

How will my assessor check I have the knowledge and understanding listed in the standards?

For some Units, it will be clear to your assessor that you have the required knowledge and understanding from how you carry out your work. This is often referred to as *knowledge and understanding apparent from performance*. There will be other occasions though, when your assessor will be unsure if you know why, for example, it is important to give information to clients in certain situations. This could be because your assessor has not had the opportunity to observe all the Performance Criteria and Range during assessment. In these situations, your assessor may wish to assess your knowledge and understanding by asking you some questions. These questions can be given orally or in writing, but will be recorded in your portfolio as evidence.

Your assessor could also check you have the required level of knowledge and understanding by asking you to produce personal statements or to complete a project or assignment.

What if I have previous experience and knowledge and understanding from work and other qualifications?

If you have previous work experience, skills, and knowledge and understanding which you feel is relevant to your SVQ, you should tell your assessor about it. Your assessor may ask you for more proof in the form of letters from previous employers/training providers or details about any courses you have completed.

For example, you may have achieved an HNC in a relevant subject in which case your assessor may feel that you already have some of the knowledge and understanding required for the SVQ.

The process of matching your previous experience and learning is often referred to as the Accreditation of Prior Learning (APL). The purpose of this process is to try and give you some credit towards your SVQ for things you can already do to the national standard. Your assessor judges the evidence available and matches it against the requirements of the SVQ. This means that your assessor should not have to assess you for these things all over again.

However, the success of this process depends on **you** telling **your assessor** what previous work experience or knowledge and understanding you have and how you think it is relevant to your SVQ. The more information you can supply to support your claims, the easier it should be to convince your assessor that you are competent.

When can simulation be used?

Throughout your SVQ, the emphasis is on you being able to carry out real work activities so assessment will normally be carried out in the workplace itself. There may be times, however, when it might not be appropriate for you to be assessed while you are working. For example your SVQ might require you to carry out emergency or contingency procedures (for safety or confidentiality reasons) or your job role may not cover all aspects of the qualification. In such instances, when you have no other means of generating evidence, **simulation** might be appropriate.

Simulation is any structured exercise involving a specific task which reproduces reallife situations. Care must be taken though to ensure that the conditions in which you are assessed *exactly* mirror the work environment ie it is a **realistic working environment**.

You and your assessor should check the assessment strategy for your SVQ carefully to find out the Sector Skills Council (SSC's) view of what constitutes a realistic working environment. Some SSC's stipulate the specific elements which are suitable for this approach.

Integration of assessment

It is not necessary for you to have each Element assessed separately — doing so could result in assessment which takes too long and places too great a burden on you and your assessor.

There will be instances when you will be able to use one piece of evidence to prove your competence across different Elements or Performance Criteria. You may even find that evidence is relevant for different Units — this is called **integration of assessment**.

When you first begin your SVQ, you and your assessor will spend time looking at the standards, planning how much time you are both able to devote to the qualification and drawing up an action plan.

At this stage, you should identify any activities which relate to more than one Unit or Outcome and arrange for the best way to collect a single piece of evidence which satisfactorily covers all the Performance Criteria.

If you are going to integrate assessments, make sure that the evidence is crossreferenced to the relevant Units. Details of how to cross reference your evidence can be found in Section 2 'How to compile your portfolio'.

Section 2 — How to compile your portfolio (with worked examples)

General information

A portfolio, like a log book, is a way of recording evidence of your achievements. It is a collection of different items of evidence which indicates that you have the required skills, knowledge and understanding to support your claim to a qualification.

The production of a well organised, clearly labelled portfolio which relates each piece of evidence to the relevant Outcomes and Performance Criteria requires a careful methodical approach. When your assessor looks through your portfolio, they will find the task of making judgements about your competence much easier if the information in it is presented in a logical sequence.

You will need to present your evidence in a format that is easy to read and in which materials can be added or taken away. This section gives suggestions on how to lay out and present your evidence and includes worked examples. There are also forms and matrices which will assist you to chart your progress through the award.

You do not have to lay out your evidence in the way suggested but you may find it helpful to do so. Each portfolio will be different in content but all should include information about you (the candidate), the organisation where you are undertaking your qualification, the assessor and so on.

Evidence collection process

Assessment plan	You and your assessor
Collect evidence	You and your assessor if observation/questioning is required
Present evidence	You and your assessor
Reference acceptable evidence	Assessor will judge evidence and give you feedback on which evidence meets the standards
Record evidence in Element achievement record	You
Store evidence in portfolio	You

Planning your portfolio

Start by carefully reading through the standards and, together with your assessor, decide which Units you might like to work on first. You do not have to do the Units in order. There may be some Units that relate to tasks which you carry out on a regular basis, therefore making it easier to collect evidence right away. Alternatively, there may be activities in other Units which you only undertake now and again, these can be left until the opportunity arises for you to collect evidence.

Before you start looking for different kinds of evidence and deciding if they should be included in your portfolio, you will find it helpful to plan how you will carry out the tasks and how long they are going to take.

The plan is usually referred to as an 'assessment plan'. It should be produced in discussion with your assessor and will set out the different stages in developing your portfolio. You will probably want to produce a plan for each Unit.

It is unlikely that you will be able to complete all of the Units straightaway and you should therefore think about starting with those Units where you have a lot of experience and in which you work well. You should also remember to identify any opportunities for **integration of assessment**.

We have provided you with a 'Unit progress record' — see Example 2. Each time you complete a Unit; your assessor should sign and date the relevant section on the form. At this stage, it might be a good idea to check that all your evidence and recording documents have been completed correctly and can easily be located. You can then circle the reference number of that Unit in the checkboxes at the top of the form so that you can see at a glance what stage you are at in your SVQ.

Starting your portfolio

Make sure that you clearly label your portfolio (or disk if you are recording your evidence electronically) with your name together with the title and level of the award.

Your portfolio will need a *title page* and a *contents page*. You should also complete a *Personal Profile* which records details about yourself and your job as well as providing information about your employer, training provider or college. Blank samples of these forms are provided in Section 4.

We recommend that you compile your portfolio in the following order:

Title page
Contents checklist
Personal profile
Unit progress record
Completed Element achievement records
Index of evidence
Pieces of evidence
Glossary of terms
Standards

Contents checklist

You might also find it useful to complete the following checklist as you work your way through your portfolio. This will help you to see if you have included all the relevant items. Once you have completed your portfolio, you will be able to use this checklist again as a contents page, by inserting the relevant page or section numbers in the right hand column.

Section	Completed	Page/Section number
Title page for the portfolio		
Personal profile		
Your own personal details		
A brief CV or career profile		
A description of your job		
Information about your employer/training provider/college		
Unit assessment plans		
Unit progress record		
Completed Element achievement records for each Unit		
Signed by yourself, your assessor and the internal verifier (where relevant)		
Evidence reference numbers included		
Index of evidence (with cross-referencing information completed)		
Evidence (with reference numbers)		
Observation records		
Details of witnesses (witness testimony sheets)		
Personal statements		
Products of performance		

Collecting your evidence

All of the evidence which you collect and present for assessment must be relevant to your SVQ. Your assessor will help you choose which pieces of evidence you should include.

We have provided blank forms in Section 4 of this document, which you can photocopy to help you record and present your evidence. Although we have provided you with sample forms, your centre may have their own recording documents which they would prefer you to use.

Some of these forms, eg **observation records** and the **record of questions and answers** will be completed by your assessor. Other forms (**witness testimonies**) will be used by people other than your assessor to testify that they have observed you doing your job, and there is one for you to complete called a **personal statement**.

Explanations are given below about how and when these forms should be used.

Observation record — Example 5

The observation record is used by your assessor to record what tasks you have performed and to what standard. There is also a section for your assessor to note which other Units or Outcomes are covered by this evidence ('integration of assessment').

The assessor will discuss with you which Performance Criteria and Range you have successfully achieved and give you feedback. This form should then be given a reference number and included in your portfolio as part of your evidence.

Witness testimony — Example 6

There may be occasions when your assessor is not available to observe you carrying out certain aspects of your job. In such instances, it may be appropriate for another person to comment about your performance by completing a statement called a 'witness testimony'.

Witness testimony should only be used as supporting evidence and should:

- be provided by a person, not related to you, who is in a position to make a valid comment about your performance, eg supervisor, line manager or possibly a client/customer
- contain comments which specifically relate your performance to the standards
- ♦ be authenticated by the inclusion of the witness's signature, role, address, telephone number and the date

It is unlikely that your assessor would make an assessment decision based on witness testimony alone. They would normally supplement this type of evidence with questioning.

Record of questions and candidate's answers — Example 7

This form is used to record any questions which your assessor may ask, to establish whether you have the required level of Knowledge and Understanding associated with each Unit. There is also space on the form for your answers to be noted.

Personal statement — Example 4

There will be times when you need to put a piece of your evidence in context for your assessor so that they can decide if it is relevant to your SVQ. You can complete personal statements to help you do this — these can relate either to the pieces of evidence or to each Outcome or Unit.

For example, you may refer to paperwork which is often used in your organisation to help you pass on information to a colleague. It may not be clear to an assessor why you are communicating to your colleague in this way and a brief explanation of the paperwork and why it is relevant to a particular part of your SVQ may be required.

A personal statement might also be used to record your experience of something, such as, how you handled a specific situation. This can be documented in your personal statement and should be a description of what you did, how you did it and why you did it. It will also allow you to include the people who were present and either assisted you or witnessed your actions. This, in turn, might identify who you should approach for 'witness testimony'. In your personal statement you could also refer to product evidence that you have produced (eg reports, notes, completed forms), these can also be included as evidence in your portfolio.

The personal statement can be a piece of evidence in itself and should therefore be included in your portfolio.

Presenting your evidence

It is important to present all of your evidence in a clear, consistent and legible manner. Your assessor will then find it much easier to make appropriate judgements about the quality, sufficiency and currency of the materials you are putting forward for consideration.

It is not necessary to produce all of your evidence in typewritten format — some hand-written pieces of evidence, such as notes, will be perfectly acceptable.

There may also be items of evidence which you cannot physically include in your portfolio. This might be for confidentiality reasons or it could be that something which you have produced as part of your day-to-day work is normally kept in a filing cabinet or stored electronically in a PC.

In compiling your portfolio, we suggest that anything you produce as part of your day-to-day work is kept in its normal location, but those pieces of evidence which have been produced specifically for your SVQ, eg witness testimony statements or personal statements, are filed in your portfolio.

However, assessors and verifiers should be able to locate and access your evidence at all times. It is, therefore, very important that you clearly reference every item of evidence.

Referencing your evidence

Your assessor, as well as the internal and External Verifiers, will need to find their way around your portfolio, so you should give each piece of evidence a number.

Remember, that where you have used 'integration of assessment', you need to give details of all the Units and Elements which are linked to a specific piece of evidence. The links should be noted on the pieces of evidence themselves as well as on the index of evidence (cross-referencing).

How to complete the Index of evidence — Example 1

You should complete an index of evidence sheet and file it immediately before the actual pieces of evidence in your portfolio.

The index of evidence should be completed by:

- entering the evidence number in the first column
- giving a brief description of each piece of evidence in the second column
- explaining where the evidence can be found in the third column

You must make sure that the information contained in the evidence index is accurate when you give your portfolio to your assessor, particularly in relation to where the evidence can be located.

Completing the Element achievement records — Example 3

There is an Element achievement record for every Element within this portfolio. These records have been designed to allow you to record the evidence you have gathered for each Element. Each record has boxes across it which represents the Performance Criteria, Range Statement, Evidence Requirements and Knowledge and Understanding statement, these will differ from Element to Element so it is important to make sure you are using the right one. Whilst collecting your evidence you should use these grids to display the Performance Criteria, Range, Knowledge and Understanding and Evidence Requirement that piece of evidence relates to. In the first box write the evidence index number you have given to that piece of evidence. In the second box give a brief description of the evidence, then tick against the relevant Performance Criteria, Range, Evidence Requirements and Knowledge and Understanding.

Worked examples

To give you a clearer picture of how to compile your portfolio, you will find worked examples of the various forms over the next few pages. You should ask your assessor for further advice and support if you are still unsure about how to use the forms and who should complete them.

Index of evidence — Example 1

SVQ title and level Using IT at level 3

Evidence number	Description of evidence	Included in portfolio (Yes/No) If no, state location	Sampled by the IV (initials and date)

Witness name	Ian Cummings
Designation/relationship to candidate	Line manager
Details of testimony	I can attest that I observed Anne Thomas following company and national regulations in the use of software. She understands and has knowledge of these regulations and I observed her following them when selecting and configuring software.

I can	an confirm the candidate's performance was satisfactory.

Section 3 — The Units and recording documents for your SVQ

Unit progress record

Qualification and level	
Candidate's name	

SVQ2 Demolition (Construction): Demolition SCQF level 5 (GF5C 22)

To achieve the whole qualification, you must prove competence in all **eight mandatory** Units.

Please note the table below shows the SSC identification codes listed alongside the corresponding SQA Unit numbers. It is important that the SQA Unit numbers are used in all your recording documentation and when your results are communicated to SQA. SSC identification codes are **not valid** in these instances.

Unit checklist — circle the reference number of each Unit as you complete it.

Mandatory	VR641	VR642	VR643	VR154	VR155	VR156	VR157	VR158
Optional								

Mandatory Units — all Units should be completed

SQA Unit Number	SSC Unit Number	Title	Assessor	Internal Verifier	Date
FN2J 04	VR641	Conform to General Workplace Health, Safety and Welfare			
FW0J 04	VR642	Conform to Productive Work Practices			
FN2V 04	VR643	Move, Handle or Store Resources			
H1NW 04	VR154	Remove and Segregate Components Prior to Demolition			
H1NX 04	VR155	Demolish/Dismantle Masonry and Concrete Structures			
H1NY 04	VR156	Demolish/Dismantle Roofs and Cladding			
H1P0 04	VR157	Demolish/Dismantle Timber-framed Structures

Glossary of terms

Advisor A person who carries out, either singly or in combination, the

functions of advising a candidate, collecting evidence of his or her competence on behalf of the assessor and authenticating the work candidates have undertaken. A mentor might also provide witness

testimony.

Assessment The process of generating and collecting evidence of a

candidate's performance and judging that evidence against

defined criteria.

Authentication The process by which an advisor or assessor confirms that an

assessment has been undertaken by a candidate and that all regulations governing the assessment have been observed.

Candidate The person enrolling for an SQA qualification.

Centre The college, training organisation or workplace where SQA

qualifications are delivered and assessed.

Element of competence

Statements which define the products of learning. The statements describe the activities that the candidate needs to perform in order

to achieve the Unit. They contain Performance Criteria and sometimes statements on Range and evidence. (see Outcome).

Evidence Materials the candidate has to provide as proof of his or her

competence against specified Performance Criteria.

Evidence Requirements

Specify the evidence that must be gathered to show that the candidate has met the standards laid down in the Performance

Criteria.

External Verifier

The person appointed by the SQA who is responsible for the quality assurance of a centre's provision. An External Verifier is often appointed on a subject area basis or for cognate groups of

Units.

Instrument of Assessment

A means of generating evidence of the candidate's performance.

Internal verifier

The person appointed from within the centre who ensures that

assessors apply the standards uniformly and consistently.

Observation A means of assessment in which the candidate is observed

carrying out tasks that reflect the Performance Criteria given in

Outcomes.

Outcome Statement which defines the products of learning. They describe

the activities the candidate has to perform to achieve the Unit, and

contain Performance Criteria and sometimes, statements on

Range and evidence (see Elements of Competence).

Performance Criteria Statements which describe the standard to which candidates must perform the activities which are stated in the Outcome.

Portfolio A compilation of evidence which can form the basis for

assessment. The portfolio is commonly used in SVQ awards and in alternative routes to assessment such as APL and credit

transfer.

Product evaluation

A means of assessment which enables the quality of a product produced by the candidate, rather than the process of producing it,

to be evaluated.

Range/Scope A statement in the Unit which specifies the different contexts in

which the activities described in the Outcome have to be

demonstrated. Where they appear, Range/Scope Statements are

mandatory.

Units for the SVQ2 Demolition (Construction) SCQF level 5

UNIT VR641 (FN2J 04) Conform to General Workplace Health, Safety and Welfare

Unit Summary

This standard is about:

- 1 awareness of relevant current statutory requirements and official guidance
- 2 responsibilities, to self and others, relating to workplace health, safety and welfare
- 3 personal behaviour in the workplace
- 4 security in the workplace

Key words

Hazards; Safety; Welfare; Regulations; Security; Signs; Control Equipment; PPE; RPE; LEV; Legislation; Risk assessment

UNIT VR641 (FN2J 04) Conform to General Workplace Health, Safety and Welfare

Performance Criteria

You must be able to:

- 1 comply with all workplace health, safety and welfare legislation requirements at all times
- recognise hazards, associated with the workplace, that have not been previously controlled, and report them in accordance with organisational procedures
- 3 accept responsibility for, and comply with, organisational policies and procedures in order to contribute to health, safety and welfare
- 4 comply with and support all organisational security arrangements and approved procedures

Scope/range related to Performance Criteria

- 1 avoidance of risk by complying with given information relating to the following
 - 1.1 induction
 - 1.2 briefings
 - 1.3 application of prior training (safe use of health and safety control equipment)
- adherence to statutory requirements and/or safety notices and warning signs displayed in the workplace or on equipment
- 3 hazards created by changing circumstances in the workplace are reported
- 4 show personal behaviour which demonstrates active responsibility for general workplace health, safety and welfare
- 5 comply with organisational policies and procedures relating to the following
 - 5.1 consideration of others
 - 5.2 interpretation of given instructions to maintain safe systems of work
 - 5.3 contributing to discussions (offer and provide feedback)
 - 5.4 maintaining quality working practices
 - 5.5 contributing to the maintenance of workplace welfare facilities
 - 5.6 storage and use of equipment provided to keep people safe
 - 5.7 disposal of waste and/or consumable items
- 6 comply with organisational procedures for maintaining the security of the workplace
 - 6.1 during the working day
 - 6.2 on completion of the day's work
 - 6.3 from unauthorised personnel (other operatives and/or the general public)
 - 6.4 from theft

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1

Workplace health, safety and welfare

- K1 what and why health, safety and welfare legislation is relevant to the occupational area
- K2 what health, safety and welfare legislation notices and warning signs are relevant to the occupational area and associated equipment
- K3 how to comply with control measures identified by risk assessments and safe systems of work
- K4 why, when and how health and safety control equipment should be used

Performance Criteria 2

Recognition of hazards

- K5 the **hazards** associated with the work environment
- K6 how changing circumstances can create hazards
- K7 the method of **reporting** hazards in the workplace

Performance Criteria 3

Organisational policies and procedures

- K8 what the organisational **policies and procedures** are for health, safety and welfare
- K9 how to take active **responsibility** for health, safety and welfare
- K10 how individual actions and behaviour may affect others
- K11 what the types of **fire extinguishers** are and how and when they are used

Knowledge and Understanding (cont)

Performance Criteria 4 Security arrangements

K12 how security arrangements are implemented in the workplace

Scope/range relating to Knowledge and Understanding

Fire extinguishers

1 water, CO₂, foam, powder, vaporising liquid and their uses

Hazards

- 2 associated with the occupational area
 - 2.1 resources, workplace, environment, substances, asbestos, equipment, obstructions, storage, services and work activities
 - 2.2 current Health and Safety Executive top ten safety risks
 - 2.3 current Health and Safety Executive top five health risks

Health and safety control equipment

- 3 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment
 - 3.1 collective protective measures
 - 3.2 personal protective equipment (PPE)
 - 3.3 respiratory protective equipment (RPE)
 - 3.4 local exhaust ventilation (LEV)

Notices and warning signs

4 statutory requirements and/or official guidance for the occupation and the work area

Scope/range relating to Knowledge and Understanding (cont)

Policies and procedures

- 5 in accordance with organisational requirements
 - 5.1 dealing with accidents and emergencies associated with the type of work being undertaken and the work environment
 - 5.2 methods of receiving or sourcing information
 - 5.3 reporting
 - 5.4 stopping work
 - 5.5 evacuation
 - 5.6 fire risks and safe exit procedures
 - 5.7 consultation and feedback

Reporting

6 organisational recording procedures and statutory requirements

Responsibility

- 7 behaviour that affects health, safety and welfare
 - 7.1 recognising when to stop work in the face of serious and imminent danger
 - 7.2 contributing to discussions and providing feedback
 - 7.3 reporting changed circumstances and incidents in the workplace
 - 7.4 adhering to the environmental requirements of the workplace

Security

8 organisational procedures relating to the workplace, general public, site personnel and resources

Unit Summary

This standard is about:

- 1 productive communication with line management, colleagues and customers
- 2 interpreting information
- 3 planning and carrying out productive work practices
- 4 working with others or as an individual

Key words

Communication; Colleagues; Customer; Procedures; Records; Relationships; Zero/low carbons

Performance Criteria

You must be able to:

- 1 communicate with others
- follow organisational procedures to plan the sequence of work in order to conform to productive work practices and maintain records
- 3 maintain good work relationships

Scope/range related to Performance Criteria

- 1 communicate with line management, colleagues or customers to ensure work is carried out productively
- 2 respect the needs of others when communicating
- 3 interpret procedures and use resources to plan the sequence of work, so that it is completed productively
- 4 complete documentation as required by the organisation
- work productively with line management, colleagues, customers or other people
- 6 apply the principles of equality and diversity

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1

Communicate with others

- K1 how to use methods of **communication** with other workplace personnel and customers
- K2 how to communicate to ensure work is productive

Performance Criteria 2

Follow procedures

- K3 how organisational **procedures** are applied to plan and carry out productive work
- K4 how to maintain **documentation** in accordance with organisational procedures
- K5 how to contribute to zero/low carbon outcomes in the built environment

Performance Criteria 3

Work relationships

- K6 how to maintain good work **relationships**
- K7 how to apply the principles of equality and diversity

Scope/range relating to Knowledge and Understanding

Communication

1 listening, written, oral, visual and electronic

Documentation

job cards, worksheets, material/resources lists and time sheets

Procedures

- 3 use of resources for own and other's work requirements
- 4 allocation of appropriate work to employees
- 5 organisation of work sequence
- 6 reduction of carbon emissions

Relationships

- 7 individuals, workplace groups (customer and operative, operative and line management, own occupation and allied occupations)
- 8 show consideration for the needs of individuals by applying the principles of equality and diversity

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting aids or equipment to move, handle or store occupational resources
- 4 moving, handling and storing occupational resources to maintain useful condition

Key words

Storage; Handling; Kinetic lifting, Lifting aids

Performance Criteria

You must be able to:

- 1 comply with the given information to move, handle or store resources
- 2 comply with the given relevant legislation and official guidance to move, handle or store occupational resources and maintain safe work practices
- 3 select the required quantity and quality of resources for the method of moving, handling or storing occupational resources
- 4 prevent damage to the occupational resources and surrounding environment
- 5 comply with the given occupational resource information to carry out the work efficiently to the required guidance
- 6 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpret given information to move, handle or store occupational resources, and use and store lifting aids and equipment
- 2 avoidance of risk by complying with the given information relating to at least two of the following
 - 2.1 methods of work
 - 2.2 safe use of health and safety control equipment
 - 2.3 safe use of lifting aids
 - 2.4 protection of the environment

Scope/range related to Performance Criteria (cont)

- 3 selection of resources associated with moving, handling or storing
 - 3.1 lifting and handling aids
 - 3.2 container(s)
 - 3.3 fixing, holding and securing systems
- 4 protect the occupational resources and their surrounding area from damage
- 5 dispose of waste and packaging in accordance with legislation
- 6 maintain a clean work space
- 7 work skills to move, position, store, secure and/or use lifting aids and kinetic lifting techniques
- move, handle or store occupational resources to meet product information and organisational requirements relating to at least three of the following
 - 8.1 sheet material
 - 8.2 loose material
 - 8.3 bagged or wrapped material
 - 8.4 fragile material
 - 8.5 tools and equipment
 - 8.6 components
 - 8.7 liquids
- 9 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or customer

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1

Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed
- K4 how to obtain information to use and store lifting aids and equipment

Performance Criteria 2

Safe work practices

- K5 the level of understanding operatives must have of information for relevant current legislation and official guidance and how it is applied
- K6 the types of **fire extinguishers** and how and when they are used
- K7 how **emergencies** should be responded to and who should respond
- K8 the organisational security procedures for tools, equipment and personal belongings
- K9 what the accident reporting procedures are and who is responsible for making the report
- K10 why, when and how health and safety control equipment should be used

Knowledge and Understanding (cont)

Performance Criteria 3

Selection of resources

- K11 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified
- K12 how the **resources** should be handled and how any **problems** associated with the **resources** are reported
- K13 the organisational procedures to select **resources**, why they have been developed and how they are used
- K14 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 4

Prevent damage

- K15 how to **protect work** from damage and the purpose of protection
- K16 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

Comply with occupational resource information

K17 how **methods of work**, to meet the specification, are carried out and **problems** reported

Performance Criteria 6

Allocated time

K18 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- operative's response to situations in accordance with organisational authorisation and personal skills when involved with:
 - 2.1 fires, spillages, injuries etc
 - 2.2 emergencies relating to occupational activities

Fire extinguishers

3 water, CO₂, foam, powder and their uses

Hazards

4 those identified by method of work, manufacturers' technical information, statutory regulations and official guidance

Health and safety control equipment

- 5 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment
 - 5.1 collective protective measures
 - 5.2 personal protective equipment (PPE)
 - 5.3 respiratory protective equipment (RPE)
 - 5.4 local exhaust ventilation (LEV)

Scope/range relating to Knowledge and Understanding (cont)

Information

6 technical, product and regulatory: oral, written, graphical presentation

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, in confined spaces, below ground level, at height, with tools and equipment, with materials and substances, with movements/storage of materials and by manual handling and mechanical lifting

Methods of work

- 8 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used for moving, handling and storing occupational resources
- 9 needs of other occupations associated with the resources

Problems

- those arising from information, resources and methods of work 10.1 own authority to rectify
 - 10.2 organisational reporting procedures

Programme

- 11 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Scope/range relating to Knowledge and Understanding (cont)

Protect work

against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- types, quantity, quality, sizes and sustainability of standard and/or specialist:
 - 14.1 occupational resources
 - 14.2 lifting and handling aids
 - 14.3 containers
 - 14.4 fixing, holding and securing systems

Security procedures

15 site, workplace, company and operative

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting equipment
- 4 removing and segregating materials and components by hand, prior to demolition, for recycling and/or disposal

Key words

Segregate; Disposal; Recycle

Performance Criteria

You must be able to:

- 1 interpret the given information relating to the work and resources to confirm its relevance
- 2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe work practices
- 3 select the required quantity and quality of resources for the methods of work
- 4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 5 comply with the given contract information to carry out the work efficiently to the required specification
- 6 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements, and risk assessments related to the work to be carried out
- 2 avoidance of risk by following the given information relating to the following
 - 2.1 methods of work
 - 2.2 safe use of health and safety control equipment
 - 2.3 safe use of access equipment
 - 2.4 segregation and safe storage of materials
 - 2.5 safe use and storage of tools and equipment

Scope/range related to Performance Criteria (cont)

- 3 selection of resources associated with own work
 - 3.1 demolition tools and equipment
 - 3.2 waste and/or recycling containers
- 4 protection of the work and its surrounding area from damage
- 5 minimise damage and maintain a clean work space
- 6 disposal of waste in accordance with legislation
- 7 demonstration of work skills to disconnect, dismantle, segregate and remove
- 8 use and maintain (checks) demolition tools and equipment and ancillary equipment
- 9 remove and segregate the following materials and components by hand for disposal and/or recycling to given working instructions
 - 9.1 timber
 - 9.2 metal
 - 9.3 bricks and/or blocks
 - 9.4 glass
 - 9.5 sanitary ware
 - 9.6 fixtures and fittings
 - 9.7 mechanical and electrical equipment
- 10 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Safe work practices

- K4 the level of understanding operatives must have of information for relevant, current legislation and official guidance and how it is applied
- K5 the types of **fire extinguishers** and how and when they are used
- K6 how **emergencies** should be responded to and who should respond
- K7 the organisational security procedures for tools, equipment and personal belongings
- K8 what the accident reporting procedures are and who is responsible for making the report
- K9 why, when and how health and safety control equipment should be used

Knowledge and Understanding (cont)

Performance Criteria 3 Selection of resources

- K10 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified
- K11 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K12 the organisational procedures to select **resources**, why they have been developed and how they are used
- K13 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 4 Minimise the risk of damage

- K14 how to protect work from damage and the purpose of protection
- K15 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

- Meet the contract specification
- K16 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K17 how **maintenance** of tools and equipment is carried out

Knowledge and Understanding (cont)

Performance Criteria 6
Allocated time

K18 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Disposal of waste

environmental responsibilities, organisational procedures, statutory regulations and official guidance relating to segregation and recycling procedures

Emergencies

- operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 2.1 fires, spillages, injuries
 - 2.2 emergencies relating to occupational activities

Fire extinguishers

3 water, CO₂, foam, powder and their uses

Hazards

4 those identified by risk assessment, method of work, technical information, statutory regulations and official quidance

Health and safety control equipment

- 5 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment
 - 5.1 collective protective measures
 - 5.2 personal protective equipment (PPE)
 - 5.3 respiratory protective equipment (RPE)
 - 5.4 local exhaust ventilation (LEV)

Scope/range relating to Knowledge and Understanding (cont)

Information

drawings, specifications, schedules, method statements, risk assessments, site inductions, tool box talks, statutory regulations and official guidance relating to segregation and recycling or disposal of waste

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

8 operative checks of demolition tools hand tools and/or portable power tools, access equipment and ancillary equipment

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 9.1 remove and segregate materials, components and/or recyclable items: timber, metal, bricks and/or blocks, glass, sanitary ware, fixtures and fittings, mechanical and electrical equipment
 - 9.2 use demolition, tools and equipment
 - 9.3 work at height
 - 9.4 use access equipment
- 10 team work and communication

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

11 needs of other occupations associated with removal and segregation of materials and components

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Resources

- tools and equipment relating to types, quantity, quality, sizes and sustainability of standard and/or specialist
 - 16.1 demolition tools and equipment
 - 16.2 waste and/or recycling containers

Security procedures

17 site, workplace, company and operative

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting plant, machinery and equipment
- 4 demolishing/dismantling masonry and concrete structures using demolition tools and equipment
- 5 segregate all arisings for recycling or disposal

Key words

Disposal; Waste materials; Segregate; Recycle

Performance Criteria

You must be able to:

- 1 interpret the given information relating to the work and resources to confirm its relevance
- 2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe work practices
- 3 select the required quantity and quality of resources for the methods of work
- 4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 5 comply with the given contract information to carry out the work efficiently to the required specification
- 6 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- 1 interpretation of drawings, specifications, schedules, method statements and risk assessments related to the work to be carried out
- 2 avoidance of risk by following the given information relating to the following
 - 2.1 methods of work
 - 2.2 safe use of health and safety control equipment
 - 2.3 safe use of access equipment
 - 2.4 segregation and safe storage of materials
 - 2.5 safe use and storage of demolition tools and equipment
- 3 selection of resources associated with own work
 - 3.1 demolition tools and equipment
 - 3.2 plant and machinery
 - 3.2 waste and/or recycling containers
- 4 protection of the work and its surrounding area from damage
- 5 minimise damage and maintain a clean work space
- 6 disposal of waste in accordance with legislation
- 7 demonstration of work skills to release, handle, lower, sort, stack/store, break and load
- 8 use and maintain (checks) demolitions tools and equipment
- 9 demolish and/or dismantle, remove and segregate masonry and concrete structures for disposal and/or recycling to given working instructions
- 10 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1

Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Safe work practices

- K4 the level of understanding operatives must have of information for relevant, current legislation and official guidance and how it is applied
- K5 the types of **fire extinguishers** and how and when they are used
- K6 how **emergencies** should be responded to and who should respond
- K7 the organisational security procedures for tools, equipment and personal belongings
- K8 what the accident reporting procedures are and who is responsible for making the report
- K9 why, when and how health and safety control equipment should be used

Knowledge and Understanding (cont)

Performance Criteria 3 Selection of resources

- K10 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified
- K11 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K12 the organisational procedures to select **resources**, why they have been developed and how they are used
- K13 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 4 Minimise the risk of damage

- K14 how to **protect work** from damage and the purpose of protection
- K15 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

Meet the contract specification

- K16 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K17 how **maintenance** of tools and equipment is carried out

Knowledge and Understanding (cont)

Performance Criteria 6 Allocated time

K18 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Disposal of waste

environmental responsibilities, organisational procedures, statutory regulations and official guidance relating to segregation and recycling procedures

Emergencies

- 2 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 2.1 fires, spillages, injuries
 - 2.2 emergencies relating to occupational activities

Fire extinguishers

3 water, CO₂, foam, powder and their uses

Hazards

4 those identified by risk assessment, method of work, manufacturers' technical information, statutory regulations and official guidance

Health and safety control equipment

- 5 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment
 - 5.1 collective protective measures
 - 5.2 personal protective equipment (PPE)
 - 5.3 respiratory protective equipment (RPE)
 - 5.4 local exhaust ventilation (LEV)

Scope/range relating to Knowledge and Understanding (cont)

Information

drawings, specifications, schedules, method statements, risk assessments, site inductions, tool box talks and statutory regulations and official guidance relating to segregation and recycling or disposal of waste

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

8 operative checks of demolition tools and equipment

Methods of work

- 9 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 9.1 erect barriers and warning notices
 - 9.2 demolish and/or dismantle masonry and concrete structures
 - 9.3 segregate all arisings for recycling or disposal
 - 9.4 use demolition tools and equipment
 - 9.5 work at height
 - 9.6 use access equipment
- 10 team work and communication

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

11 needs of other occupations associated with demolishing/dismantling masonry and concrete structures

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- tools and equipment relating to types, quantity, quality, sizes and sustainability of standard and/or specialist
 - 16.1 demolition tools and equipment
 - 16.2 waste/recycling containers

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting equipment
- 4 demolishing/dismantling steel framed structures
- 5 releasing and separating components using hot cutting equipment
- 6 removing and segregating materials and components for recycling and/or disposal using demolition tools and equipment

Key words

Hot cutting equipment; Dismantle; Segregate; Disposal; Recycle

Performance Criteria

You must be able to:

- 1 interpret the given information relating to the work and resources to confirm its relevance
- 2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe work practices
- 3 select the required quantity and quality of resources for the methods of work
- 4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 5 comply with the given contract information to carry out the work efficiently to the required specification
- 6 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- 1 interpretation of drawings, specifications, schedules, method statements and risk assessments related to the work to be carried out
- 2 avoidance of risk by following the given information relating to the following
 - 2.1 methods of work
 - 2.2 safe use of health and safety control equipment
 - 2.3 safe use of access equipment
 - 2.4 segregation and safe storage of materials
 - 2.5 safe use and storage of tools and equipment
- 3 selection of resources associated with own work
 - 3.1 demolition tools and equipment
 - 3.2 waste and/or recycling containers
- 4 protection of the work and its surrounding area from damage
- 5 minimise damage and maintain a clean work space
- 6 disposal of waste in accordance with legislation
- 7 demonstration of work skills to release, cut, hot cut, separate and segregate
- 8 use and maintain (checks) demolition tools and equipment and hot cutting equipment.
- 9 demolish and/or dismantle and segregate steel-framed structures and components to given working instructions
- 10 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

drawings, specifications, schedules, method statements, risk assessments, site inductions, tool-box talks and statutory regulations and official guidance relating to segregation and recycling or disposal of waste

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

3 operative checks of demolition tools, equipment and hot cutting equipment

Methods of work

- 9 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 9.1 erect barriers and warning notices
 - 9.2 identify and report hazards
 - 9.3 use hot cutting equipment to form drop cuts, sit cuts, holding cuts and hinge cuts
 - 9.4 demolish/dismantle steel-framed structures and components
 - 9.5 segregate steel-framed structure components and/or arisings for recycling or disposal

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

- 9.6 use demolition tools, equipment and hot cutting equipment
- 9.7 work at height
- 9.8 use access equipment
- 10 team work and communication
- 11 needs of other occupations associated with demolishing/dismantling steel-framed structures

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- 16 tools and equipment relating to types, quantity, quality, sizes and sustainability of standard and/or specialist
 - 16.1 demolition tools and equipment
 - 16.2 hot cutting equipment
 - 16.3 waste/recycling containers

Scope/range relating to Knowledge and Understanding (cont)

Security procedures

17 site, workplace, company and operative

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting materials, components and equipment
- 4 erecting and dismantling access equipment suitable for the work operations

Key words

Erecting access-platforms; Dismantling access-platforms; Scaffolding; Access-platforms; Ladders; Working-platforms; Step-ladders; Proprietary-towers; Trestle-platforms; Mobile-towers; Protective-screens

Performance Criteria

You must be able to:

- 1 interpret the given information relating to the work and resources to confirm its relevance
- 2 comply with the given, relevant legislation and official guidance to carry out your work and maintain safe work practices
- 3 select the required quantity and quality of resources for the methods of work
- 4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 5 comply with the given contract information to carry out the work efficiently to the required specification
- 6 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of method statements, risk assessments, specifications and manufacturers' information related to the work to be carried out
- 2 avoidance of risk by complying with the given information relating to the following
 - 2.1 methods of work
 - 2.2 safe use of personal protective equipment (PPE)
 - 2.3 safe use of access equipment
 - 2.4 safe use and storage of materials, tools and equipment
- 3 selection of resources associated with own work
 - 3.1 materials and components
 - 3.2 tools and equipment
- 4 protection of the work and its surrounding area from damage
- 5 minimise damage and maintain a clean work space
- 6 demonstration of work skills to move, position/erect, secure, check, dismantle and remove
- 7 use and maintain hand tools and ancillary equipment
- erect, dismantle and store at least two of the following access equipment to given access regulations
 - 8.1 ladders/crawler boards
 - 8.2 stepladders/platform steps
 - 8.3 proprietary towers
 - 8.4 trestle platforms
 - 8.5 mobile scaffold towers
 - 8.6 proprietary staging/podiums
- 9 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Safe work practices

- K4 the level of understanding operatives must have of information for relevant, current legislation and official guidance and how it is applied
- K5 how **emergencies** should be responded to and who should respond
- K6 the organisational **security procedures** for tools, equipment and personal belongings
- K7 what the accident reporting procedures are and who is responsible for making the report
- K8 why, when and how **personal protective equipment (PPE)** should be used

Knowledge and Understanding (cont)

Performance Criteria 3 Selection of resources

- K9 the characteristics, quality, uses, sustainability, limitations and defects associated with the **resources** and how defects should be rectified
- K10 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K11 the organisational procedures to select **resources**, why they have been developed and how they are used
- K12 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 4

Minimise the risk of damage

- K13 how to **protect work** from damage and the purpose of protection
- K14 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

Meet the contract specification

- K15 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K16 how maintenance of tools and equipment is carried out

Performance Criteria 6

Allocated time

K17 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Emergencies

- operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 1.1 fires, spillages, injuries
 - 1.2 emergencies relating to occupational activities

Hazards

2 those identified by risk assessment, method of work, manufacturers' technical information, statutory regulations and official guidance

Information

3 specifications, method statements, risk assessments, current legislation and manufacturers' information

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, in confined spaces, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

5 operative care of hand tools and ancillary equipment

Scope/range relating to Knowledge and Understanding (cont)

Methods of work

- application of knowledge for safe work practices, procedures and skills relating to the method/area of work and materials used to:
 - 6.1 provide protection to the work area
 - 6.2 establish a base for equipment
 - 6.3 erect proprietary access equipment to manufacturer's instructions suitable for the work
 - 6.4 erect non-proprietary access equipment suitable for the work
 - 6.5 place protective screens and notices
 - 6.6 check/monitor equipment during the period of use
 - 6.7 dismantle and store access equipment
 - 6.8 use tools and equipment
 - 6.9 work at height
 - 6.10 use access equipment
- 7 team work and communication
- 8 needs of other occupations associated with erecting and dismantling access/working platforms

Personal protective equipment (PPE)

9 occupational use, types, purpose of each type and work situations

Problems

- 10 those arising from information, resources and methods of work
 - 10.1 own authority to rectify
 - 10.2 organisational reporting procedures

Scope/range relating to Knowledge and Understanding (cont)

Programme

- 11 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality, sizes and the sustainability of standard and/or specialist:
 - 14.1 ladders/crawler boards
 - 14.2 stepladders/platform steps
 - 14.3 trestles
 - 14.4 proprietary staging/podiums
 - 14.5 proprietary towers
 - 14.6 mobile scaffold towers
 - 14.7 protection equipment and notices
 - 14.8 tools and ancillary equipment
- 15 methods of calculating quantity of equipment required for the method/procedure to erect and dismantle access/working platforms

Security procedures

16 site, workplace, company and operative

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and preparing specialised powered tools and/or ancillary equipment
- 4 operating specialised powered tools and equipment

Key words

Specialised-tools; Powered-tools; Power-units

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 3 request resources to sustain plant or machinery operations to complete the programme of work
- 4 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 5 carry out pre-use preparation inspections on powered tools and/or equipment in accordance with given procedures
- operate powered tools and/or equipment in accordance with safe working practices to achieve the work outcome

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, risk assessments, method statements, legislation, Codes of Practice, operating instructions and manufacturers' information related to the work to be carried out
- 2 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements

Scope/range related to Performance Criteria (cont)

- 3 safe use and security of powered tools and equipment
- 4 safe use of fire extinguishers, as appropriate to the fire
- 5 request resources to sustain powered tools and/or equipment associated with own work:
 - 5.1 fuel/power source
 - 5.2 lubricants
 - 5.3 consumables
- 6 protection of the work and its surrounding area from damage
- 7 minimise damage and maintain a clean work space
- 8 disposal of waste in accordance with legislation
- demonstration of work skills to measure, align, assemble, fit, level, position, check, secure, connect and adjust
- 10 use and maintain power units, tools and ancillary equipment
- 11 prepare the power unit tool(s) and/or ancillary equipment to given working instructions
- demonstration of work skills to start, stop, replenish, control and clean
- use and maintain power units, tools and ancillary equipment
- operate and monitor power unit and associated equipment to given working instructions, relating to
 - 14.1 continual running
 - 14.2 closing down
 - 14.3 cleaning
- return powered tools and equipment to a safe operational condition on completion of work
- disassemble power unit, tools and ancillary equipment

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the operating **information** and legislation appropriate to the powered tools and/or equipment
- K2 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K3 the types of **information**, their source and how they are interpreted
- K4 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Safe work practices

- K5 the level of understanding operatives must have of information for relevant, current legislation and official guidance and how it is applied
- K6 the types of **fire extinguishers** and how and when they are used
- K7 how **emergencies** should be responded to and who should respond
- K8 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings
- K9 what the accident reporting procedures are and who is responsible for making the report
- K10 why and when **personal protective equipment (PPE)** should be used

Knowledge and Understanding (cont)

Performance Criteria 3

Request resources

- K11 the organisational procedures for requisitioning consumables and other resources, why they have been developed and how they are used
- K12 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 4

Minimise the risk of damage

- K13 how to **protect work** from damage and the purpose of protection
- K14 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 5

Pre-use preparation

- K15 the **methods of work** for pre-use checks needed before operating powered tools and/or equipment
- K16 the **method of work** preparation required before using powered tools and/or equipment

Performance Criteria 6

Use tools and equipment

K17 how **methods of work** are carried out and **problems** reported

Scope/range relating to Knowledge and Understanding

Disposal of waste

1 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- 2 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 2.1 fires, spillages, injuries
 - 2.2 emergencies relating to occupational activities

Fire extinguishers

water, CO₂, foam, powder and their uses

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, risk assessments, method statements, legislation, Codes of Practice, manufacturers' information and operating instructions

Legislation and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Scope/range relating to Knowledge and Understanding (cont)

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 7.1 prepare, position and set up for work
 - 7.2 secure accessories and tool attachments
 - 7.3 carry out pre-use checks to manufacturers' and suppliers' information/procedures
 - 7.4 operate, use and control
 - 7.5 monitor and maintain
 - 7.6 close down and secure
 - 7.7 disassemble
 - 7.8 transport and/or store
- 8 team work and communication
- 9 needs of other occupations associated with operating power units, tools and/or equipment

Personal protective equipment (PPE)

10 occupational use, types, purpose of each type and work situations

Problems

- 11 those arising from information, resources and methods of work
 - 11.1 own authority to rectify
 - 11.2 organisational reporting procedures

Protect work

12 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Scope/range relating to Knowledge and Understanding (cont)

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 13.1 power source/fuels
 - 13.2 consumables, lubricants

Security procedures

14 site, workplace, company and operative

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting materials, components and equipment
- 4 preparing for and slinging and signalling the movement of loads

Key words

Radio communication; Lifting equipment

Performance Criteria

You must be able to:

- 1 interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 select plant or machinery resources for the methods of work and operations to be carried out
- 5 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 6 comply with the given contract information to carry out the work efficiently to the required specification
- 7 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- 1 interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out
- avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of tools and equipment
- 6 selection of resources associated with own work
 - 6.1 attachments, slinging equipment, lifting aids, hand tools and ancillary equipment
 - 6.2 signalling and communication equipment
- 7 protection of the work and its surrounding area from damage
- 8 minimise damage and maintain a clean work space
- disposal of waste in accordance with legislation
- demonstration of work skills to measure, gauge, estimate, fit, fix, test, balance, interpret, judge, explain, prepare, indicate, inform, instruct, sign, position, adjust, configure, move, secure, signal and relay
- use and maintain hand tools, ancillary equipment, slinging equipment and signalling and communication equipment
- slinging and signalling for the lifting and movement of loads by plant or machinery operations to given working instructions
- completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond

Knowledge and Understanding (cont)

- K9 the organisational security procedures for plant and/or machinery, tools, equipment and personal belongings
- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4 Selection of resources

- K12 the characteristics, quality, uses, limitations and defects associated with plant resources and how defects should be rectified
- K13 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K14 the organisational procedures to select **resources**, why they have been developed and how they are used
- K15 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 5 Minimise the risk of damage

- K16 how to **protect work** from damage and the purpose of protection
- K17 why **disposal of waste** should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 6

Meet the contract specification

- K18 how methods of work, to meet the specification, are carried out and problems reported
- K19 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 7 Allocated time

K20 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

discussions, sketches, briefings, signalling and radio communication

Disposal of waste

2 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information, approved procedures and Codes of Practice

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Scope/range relating to Knowledge and Understanding (cont)

Maintenance

7 operative care of hand tools, ancillary equipment, slinging equipment and signalling and communication equipment

Methods of work

- 8 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 confirm method of communication
 - 8.2 determine method of slinging
 - 8.3 select and use suitable slinging equipment and lifting accessories
 - 8.4 sling loads securely and balance with correct weight distribution
 - 8.5 signal and communicate following recognised/agreed operational procedures
 - 8.6 position loads safely and securely
 - 8.7 remove and store lifting accessories
 - 8.8 use hand tools and ancillary equipment
- 9 team work and communication
- 10 needs of other occupations associated with slinging and signalling the movement of loads

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Scope/range relating to Knowledge and Understanding (cont)

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 lifting accessories
 - 16.2 signalling and communication equipment
 - 16.3 hand tools and ancillary equipment
- 17 methods of calculating weight, bearing pressure, quantity, length and area associated with the method/procedure for slinging and signalling the movement of loads

Security procedures

18 site, workplace, company and operative

Skills

19 own occupation and occupations related to the work

Candidate	Date	
Assessor	Date	
Internal Verifier	Date	

Unit Summary

This standard is about:

- 5 interpreting information
- 6 adopting safe and healthy working practices
- 7 selecting materials, components and equipment
- 8 carrying out operator maintenance tasks on plant or machinery

Key words

Replenish-fuels; Lubricants; Fluids; Coolants

Performance Criteria

You must be able to:

- work safely at all times, complying with health and safety and other relevant regulations and guidelines
- 2 follow the relevant maintenance schedules to carry out the required work
- 3 carry out maintenance activities within the limits of your personal authority
- 4 carry out the maintenance activities in the specified sequence and in an agreed timescale
- report any instances where the maintenance activities cannot be fully met or where there are identified defects outside the planned schedule
- 6 complete relevant maintenance records accurately and pass them on to the appropriate person
- 7 dispose of waste materials in accordance with safe working practices and approved procedures

Scope/range related to Performance Criteria

- 1 follow current legislation, approved Codes of Practice and organisational procedures
- 2 avoid hazards by following given health and safety information, including the use of personal protective equipment (PPE)
- 3 use, store and secure tools and equipment when not in use
- 4 interpretation of schedules, specifications, manufacturers' information and organisational procedures related to the maintenance work to be carried out

Scope/range related to Performance Criteria (cont)

- 5 level and extent of responsibility extends to carrying out operator maintenance tasks as directed by your employer and/or supervisor/authorised person
- demonstration of work skills to replenish, replace, apply, lubricate, clean, secure
- 7 use and maintain hand tools and ancillary equipment
- 8 carry out operator maintenance tasks on standard or specialised plant or machinery to given working instructions which could include equipment that
 - 8.1 lifts and/or transfers
 - 8.2 extracts and/or excavates
 - 8.3 constructs and/or forms
 - 8.4 receives and/or transports
 - 8.5 accesses
 - 8.6 lays and/or compacts
 - 8.7 demolishes and/or processes
- 9 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client
- 10 work completed to the required quality standards and accuracy in accordance with manufacturer's requirements and organisational procedures
- 11 problems and defects that are beyond your area of responsibility are reported
- 12 record and report maintenance tasks in accordance with manufacturer's requirements and organisational procedures
- protection of the work and its surrounding area from damage
- 14 minimise damage and maintain a clean work space
- 15 waste disposal procedures in accordance with legislation

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Work safely

- K1 the level of knowledge operatives must have of information for relevant, current health and safety legislation, regulations and safe work practices and procedures including documents with special legal status and official quidance
- K2 how safe work practices and procedures are applied, including how you are expected to respond to hazards and emergencies
- K3 **organisational procedures** including the security of tools, equipment and personal belongings
- K4 what the accident reporting procedures are and who is responsible for making the report
- K5 the application of given risk and COSHH assessments for hazards and how this encourages safe work practices.
 Why and when personal protective equipment (PPE) should be used
- K6 how to protect others

Knowledge and Understanding (cont)

Performance Criteria 2

Follow schedules

- K7 the types of maintenance schedules and related specifications that will provide you with information, their source and how they are interpreted including
 - K7.1 the organisational procedures used to report and rectify inappropriate information and unsuitable resources, and how they are implemented
 - K7.2 the organisational procedures to solve **problems** with the information and why it is important they are followed

Performance Criteria 3

Maintenance activities

- K8 how maintenance methods and procedures will meet the specification including equipment operating and care and control procedures
- K9 the level and extent of your responsibility
- K10 Maintenance authorisation procedures or the level of authority you have as directed by your employer, supervisor/authorised person and/or client
- K11 how to follow maintenance authorisation procedures and how problems are reported
- K12 how maintenance of tools and equipment is carried out

Knowledge and Understanding (cont)

Performance Criteria 4

Timescale

- K13 the **hazards** associated with the **resources** and **maintenance methods and procedures** and how they are overcome
- K14 what the **sequence** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept
- K15 the characteristics, quality, uses, limitations and defects associated with the **resources** and how defects should be rectified
- K16 the **organisational procedures** to select **resources** and how they are used

Performance Criteria 5 Reporting

- K17 how maintenance methods and procedures will meet the specification and how problems are reported
- K18 how any **problems** associated with the **resources** that may affect the quality standards and accuracy are reported
- K19 how to complete **maintenance records** by following **documentation procedures**

Knowledge and Understanding (cont)

Performance Criteria 6

Records

- K20 how maintenance records and documentation procedures are to be followed to complete records and reports of maintenance tasks in accordance with manufacturer's requirements and organisational procedures
- K21 what the **reporting lines and procedures** are within the organisation

Performance Criteria 7 Dispose of waste

- K22 what the **waste disposal procedures** are and how to ensure disposal of waste is carried out safely
- K23 why waste disposal should be carried out safely and how it is achieved

Scope/range relating to Knowledge and Understanding

Emergencies

- operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 1.1 fires, spillages, injuries
 - 1.2 emergencies relating to occupational activities

Equipment operating and care and control procedures

2 manufacturer and organisational procedures to be followed when completing functional checks

Hazards

3 those identified by maintenance methods and procedures, manufacturers' technical information, statutory regulations and official guidance

Health and safety legislation, regulations and safe work practices and procedures

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools, plant or machinery and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

5 operative care of hand tools and/or portable power tools and ancillary equipment

Scope/range relating to Knowledge and Understanding (cont)

Maintenance authorisation procedures

direction from employer and/or supervisor in accordance with manufacturer's specifications, maintenance authorisation procedures and organisational procedures

Maintenance methods and procedures

- 7 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 7.1 clean and prepare areas and components for maintenance
 - 7.2 replenish fuels, lubricants, fluids and coolants
 - 7.3 replace parts
 - 7.4 recycle components
 - 7.5 fit fastening systems, pins, bolts, nuts, washers and consumable items
 - 7.6 complete functional checks in accordance with equipment operating and care and control procedures
 - 7.7 complete reports and records
 - 7.8 use hand tools and ancillary equipment
- 8 team work and communication
- 9 needs of other occupations associated with operator maintenance tasks on plant or machinery

Maintenance records and documentation procedures

10 completed and maintained using appropriate media

Maintenance schedules and related specifications

1 specifications, schedules, manufacturer's information, organisational procedures

Scope/range relating to Knowledge and Understanding (cont)

Organisational procedures

for safety, quality standards, accuracy, obtaining resources, recording, reporting and security applicable to site, workplace, company and operative

Personal protective equipment

13 occupational use, types, purpose of each type and maintenance tasks

Problems

14 problems outside the operators level of authority are reported in accordance with organisational procedures

Reporting lines and procedures

- where maintenance activities cannot be fully met or where there are identified defects outside the planned schedule and arising from information, resources and maintenance methods and procedures
 - 15.1 own authority to rectify
 - 15.2 organisational reporting procedures

Resources

- how resources should be used to meet the quality standards and accuracy to be achieved
- 17 materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 17.1 items of plant or machinery
 - 17.2 consumables
 - 17.3 hand and/or powered tools and equipment
- methods of calculating quantity and/or length and/or area and/or wastage associated with the method/procedure to complete operator maintenance tasks

Scope/range relating to Knowledge and Understanding (cont)

Sequence

- 19 types of schedule, specification and estimated times
- 20 organisational procedures for reporting circumstances which will affect the work sequence

Waste disposal procedures

21 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

UNIT VR385

Operate Plant or Machinery to Demolish

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment for plant or machinery operations
- 4 setting up, operating and shutting down plant or machinery for carrying out demolition of structures and segregation work

Key words

Functional checks; Setting-up; Demolish; Segregate; Stockpile; Load

Operate Plant or Machinery to Demolish

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements, risk assessments and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoidance of risk by following the given information relating to the following
 - 4.1 methods of work
 - 4.2 safe use of health and safety control equipment
 - 4.3 segregation and safe storage of materials
 - 4.4 safe use and storage of plant or machinery tools and equipment
- follow organisational procedures for the requisition of consumables, materials and other resources
- 6 selection of resources associated with own work:
 - 6.1 attachments, tools and ancillary equipment
- 7 protection of the work and its surrounding area from damage
- 8 minimise damage and maintain a clean work space
- 9 disposal of waste in accordance with legislation
- demonstration of work skills to check, adjust, communicate, manoeuvre, position, demolish, segregate, stockpile, remove and load
- 11 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery to demolish structures and segregate, stockpile, remove and load materials to given working instructions
- 13 shut down and secure plant or machinery
- 14 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Operate Plant or Machinery to Demolish

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work

Performance Criteria 3

Safe work practices

- K6 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K7 how **emergencies** should be responded to and who should respond
- K8 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings
- K9 what the accident reporting procedures are and who is responsible for making the report

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Safe work practices

K10 why, when and how **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K11 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5

Selection of resources

- K12 the characteristics, quality, uses, sustainability, limitations and defects associated with plant **resources** and how defects should be rectified
- K13 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K14 the organisational procedures to select **resources**, why they have been developed and how they are used
- K15 the **hazards** associated with the **resources** and **methods of work** and how they are overcome

Performance Criteria 6

Minimise the risk of damage

- K16 how to **protect work** from damage and the purpose of protection
- K17 why **disposal of waste** should be carried out safely and how it is achieved

Operate Plant or Machinery to Demolish

Knowledge and Understanding (cont)

Performance Criteria 7

Meet the contract specification

- K18 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K19 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8

Allocated time

K20 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Operate Plant or Machinery to Demolish

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Health and safety control equipment

- 5 identified by the principles of protection for occupational use, types and purpose of each type, work situations and general work environment
 - 5.1 collective protective measures
 - 5.2 personal protective equipment (PPE)
 - 5.3 respiratory protective equipment (RPE)
 - 5.4 local exhaust ventilation (LEV)

Scope/range relating to Knowledge and Understanding (cont)

Information

drawings, specifications, schedules, method statements, risk assessments, manufacturers' information and regulations governing the operation of plant or machinery

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

8 operative care of plant or machinery, hand tools, ancillary equipment and/or accessories

Methods of work

- 9 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 9.1 identify the characteristics of the plant and machinery appropriate to the demolition and segregation operation
 - 9.2 carry out performance checks for the demolition and segregation operation
 - 9.3 identify the area to be demolished
 - 9.4 carry out pre-operational checks for obstructions, safety and security of the work and surrounding area
 - 9.5 check ground conditions to ensure the stability of plant or machinery during demolition activities
 - 9.6 avoid damage to surrounding structures and utilities
 - 9.7 demolish structures
 - 9.8 segregate and safely remove materials into stockpiles and/or containers

Operate Plant or Machinery to Demolish

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

- 9.9 shut down and secure plant or machinery
- 9.10 fit and remove attachments using direct and quick-hitch type couplers
- 9.11 use hand tools, ancillary equipment and accessories
- 10 team work and communication
- 11 needs of other occupations associated with operating plant or machinery to demolish

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- 14 organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions associated with the method/procedure

Scope/range relating to Knowledge and Understanding (cont)

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants, fuels
 - 16.2 spill kits
 - 16.3 demolition plant, machinery or attachments
 - 16.4 hand tools, ancillary equipment and/or accessories
- 17 methods of estimating weight, quantity, length and area associated with the method/procedure to operate plant or machinery to demolish structures and segregate, stockpile, remove and load materials

Security procedures

18 site, workplace, company and operative

Operate Plant or Machinery to Extract

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment for plant or machinery operations
- 4 setting up, operating and shutting down plant or machinery for carrying out extraction work

Key words

Extraction; Excavators; Loading-shovels; Skid steer loaders; Motorised-scrapers; Trenchers; Draglines

Operate Plant or Machinery to Extract

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant or machinery, tools and equipment
- follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work7.1 attachments, tools and ancillary equipment
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- demonstration of work skills to check, adjust, communicate, manoeuvre, position, extract, form, remove and load
- 12 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery to extract ground, face and loose materials to given working instructions relating to one of the following categories of plant or machinery
 - 13.1 excavators
 - 13.2 loading shovels
 - 13.3 skid steer loaders
 - 13.4 motorised scrapers
 - 13.5 trenchers
 - 13.6 draglines
- 14 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Operate Plant or Machinery to Extract

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Safe work practices

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5 Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant **resources** and how defects should be rectified
- K14 how the **resources** should be used and how any problems associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the **hazards** associated with the **resources** and **methods of** work and how they are overcome

Operate Plant or Machinery to Extract

Knowledge and Understanding (cont)

Performance Criteria 6

Minimise the risk of damage

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 7

Meet the contract specification

- K19 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8

Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Operate Plant or Machinery to Extract

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery for extraction work

Scope/range relating to Knowledge and Understanding (cont)

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

operative care of plant or machinery, hand tools, ancillary equipment and/or accessories

Methods of work

- 8 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 identify the characteristics of the plant and machinery appropriate to the extraction operation
 - 8.2 carry out performance checks for the extraction operation
 - 8.3 identify the area to be extracted
 - 8.4 carry out pre-operational checks for obstructions, stability, safety and security of the work and surrounding area
 - 8.5 check to avoid damage to structures and utilities service apparatus
 - 8.6 extract, remove and load materials safely and securely
 - 8.7 form stockpiles
 - 8.8 shut down and secure plant or machinery
 - 8.9 use hand tools, ancillary equipment and accessories
- 9 team work and communication
- needs of other occupations associated with operating plant or machinery to extract ground and loose materials

Operate Plant or Machinery to Extract

Scope/range relating to Knowledge and Understanding (cont)

Personal protective equipment (PPE)

occupational use, types, purpose of each type and work situations

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants, fuels
 - 16.2 attachments and extraction aids
 - 16.3 hand tools, ancillary equipment and/or accessories
- 17 methods of calculating weight, bearing, pressure, quantity, length and area associated with the method/procedure to operate plant or machinery to extract ground and loose materials

Security procedures

18 site, workplace, company and operative

Scope/range relating to Knowledge and Understanding (cont)

Skills

19 own occupation and occupations related to the work

UNIT VR388 Operate Plant or Machinery to Extract

Notes/Comments		
The candidate has satisfied the Assessor and Internal Verifier that the perfo.	rmance evidence ha	as been met.
Candidate	Date	
Assessor	Date	
Internal Verifier	Date	

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment
- 4 setting up, operating and shutting down plant or machinery for lifting and transferring loads

Key words

Lift-trucks; Cranes; Knuckle boom cranes; Excavator cranes; Crawler tractor/side booms; Skip handlers; Hoists; Container-handlers; Self-propelled motorised trailer

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant, machinery and tools
- 6 follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work
 - 7.1 tools and ancillary equipment and/or accessories
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- demonstration of work skills to check, adjust, communicate, operate, manoeuvre, position, lift, transfer and set down
- 12 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery to lift and transfer loads to given working instructions relating to one of the following categories of plant or machinery
 - 13.1 lift trucks
 - 13.2 cranes
 - 13.3 knuckle boom cranes
 - 13.4 excavator cranes
 - 13.5 crawler tractor/side booms
 - 13.6 skip handlers
 - 13.7 hoists
 - 13.8 container handlers
 - 13.9 self-propelled motorised trailer
- 4 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Safe work practices

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5

Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant **resources** and how defects should be rectified
- K14 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 6

Minimise the risk of danger

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 7

Meet the contract specification

- K19 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8

Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

2 environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery to lift and transfer loads

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Scope/range relating to Knowledge and Understanding (cont)

Maintenance

7 operative care of plant or machinery, hand tools, ancillary equipment and/or accessories

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 identify the characteristics of the plant or machinery appropriate for the lifting operation
 - 8.2 carry out performance checks for lifting and transferring loads
 - 8.3 carry out pre-operational checks for obstructions, stability, safety and security of the work and surrounding area
 - 8.4 identify characteristics, type, weight, position of loads for lifting and transferring
 - 8.5 secure and balance loads for lifting
 - 8.6 lift, remove and transfer loads
 - 8.7 position, place and set down loads
 - 8.8 confirm loads stability and security and release
 - 8.9 shut down and secure plant or machinery
 - 8.10 use hand tools, ancillary equipment and accessories
- 9 team work and communication
- 10 needs of other occupations associated with operating plant or machinery for lifting and transferring loads

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Scope/range relating to Knowledge and Understanding (cont)

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work on the programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants and fuels
 - 16.2 attachments and lifting aids
 - 16.3 hand tools, ancillary equipment and/or accessories
- 17 methods of calculating weight, bearing, pressure, quantity, length and area associated with the method/procedure to operate plant or machinery for lifting and transferring loads

Security procedures

18 site, workplace, company and operative

Skills

19 own occupation and occupations related to the work

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment for plant or machinery operations
- 4 operating and shutting down plant or machinery for construction and formation work

Key words

Graders; Piling-rigs; Drilling-rigs; Dozers; Tunnelling plant

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant or machinery, tools and equipment
- follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work7.1 tools and ancillary equipment and/or accessories
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- 11 demonstration of work skills to check, adjust, communicate, manoeuvre, position, construct and form
- 12 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery to construct and form to given working instructions relating to one of the following categories of plant or machinery
 - 13.1 graders
 - 13.2 piling/drilling rigs
 - 13.3 dozers
 - 13.4 tunnelling plant and equipment
- 14 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Knowledge and Understanding (cont)

Performance Criteria 3

Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how emergencies should be responded to and who should respond
- K9 the organisational security procedures for plant and/or machinery, tools, equipment and personal belongings
- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5 Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant resources and how defects should be rectified
- K14 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the hazards associated with the resources and methods of work and how they are overcome

Knowledge and Understanding (cont)

Performance Criteria 6

Minimise the risk of damage

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Performance Criteria 7

Meet the contract specification

- K19 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8

Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery for construction and formation

Scope/range relating to Knowledge and Understanding (cont)

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

7 operative care of plant or machinery, hand tools, ancillary equipment and/or accessories

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used. to:
 - 8.1 identify the characteristics of the plant and machinery appropriate to the construction and formation operation
 - 8.2 carry out performance checks for the construction and formation operation
 - 8.3 identify the area for the construction and formation work
 - 8.4 carry out pre-operational checks for obstructions, stability, safety and security of the work and surrounding area
 - 8.5 check to avoid damage to structures and utilities service apparatus
 - 8.6 complete construction and formation work
 - 8.7 shut down and secure plant or machinery
 - 8.8 use hand tools, ancillary equipment and accessories

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

- 9 team work and communication
- 10 needs of other occupations associated with operating plant or machinery for construction and formation work

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants, fuels
 - 16.2 attachments and aids for construction and formation work
 - 16.3 hand tools, ancillary equipment and/or accessories

Scope/range relating to Knowledge and Understanding (cont)

Resources (cont)

methods of calculating weight, quantity, length and area associated with the method/procedure to operate plant or machinery to carry out construction and formation work

Security procedures

18 site, workplace, company and operative

Skills

19 own occupation and occupations related to the work

Notes/Comments		
The candidate has satisfied the Assessor and Internal Verifier that the perfo	rmance evidence has been met.	
Candidate	Date	
Assessor	Date	
Internal Verifier	Date	

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment for plant or machinery operations
- 4 setting up, operating and shutting down plant or machinery to receive and transport bulk material loads

Key words

Concrete-pumps; Forward tipping dumpers; Agricultural tractors; Tunnelling plant; Dump-trucks; Bowsers

Performance Criteria

You must be able to:

- 1 interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant or machinery, tools and equipment
- follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work7.1 tools and ancillary equipment and/or accessories
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- demonstration of work skills to check, adjust, communicate, manoeuvre, position, receive, transport and deposit
- 12 use and maintain hand tools, ancillary equipment and/or accessories.
- operate plant or machinery to receive and transport bulk material loads to given working instructions, relating to one of the following categories of plant or machinery
 - 13.1 concrete pumps
 - 13.2 forward tipping dumpers
 - 13.3 agricultural tractors complete with towed equipment
 - 13.4 tunnelling plant and equipment
 - 13.5 dump trucks
 - 13.6 bowsers
- 14 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5 Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant resources and how defects should be rectified
- K14 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 6

Minimise the risk of damage

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 7

Meet the contract specification

- K19 how methods of work, to meet the specification, are carried out and problems reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8 Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding (cont)

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery to receive and transport loads

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Scope/range relating to Knowledge and Understanding (cont)

Maintenance

7 operative care of plant or machinery, hand tools and ancillary equipment

Methods of work

- 8 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 identify the characteristics of the plant and machinery appropriate for the receipt and transportation operation
 - 8.2 carry out performance checks to receive and transport loads
 - 8.3 identify characteristics, type and volume of loads to receive and transport
 - 8.4 carry out pre-operational checks for obstructions, stability, safety and security of the work and surrounding area
 - 8.5 receive, secure and balance loads for transport
 - 8.6 transport and deposit loads
 - 8.7 shut down and secure plant or machinery
 - 8.8 use hand tools, ancillary equipment and accessories
- 9 team work and communication
- 10 needs of other occupations associated with operating plant or machinery for receiving and transporting bulk material loads

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Scope/range relating to Knowledge and Understanding (cont)

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist:
 - 16.1 consumables, lubricants, fuels
 - 16.2 attachments and load coverings
 - 16.3 hand tools, ancillary equipment and/or accessories
- 17 methods of calculating weight, quantity, length and area associated with the method/procedure to operate plant or machinery for receiving and transporting bulk material loads

Security procedures

18 site, workplace, company and operative

Skills

19 own occupation and occupations related to the work

Notes/Comments		
The candidate has satisfied the Assessor and Internal Verifier that the perfo.	rmance evidence ha	as been met.
Candidate	Date	
Assessor	Date	
Internal Verifier	Date	

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment with the plant or machinery operations
- 4 setting up, operating and shutting down of plant or machinery for accessing

Key words

Mobile-elevated working platforms; MEWP; Mast-climbers

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- 1 interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out
- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant, machinery, tools and equipment
- 6 follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work
 - 7.1 tools and ancillary equipment and/or accessories
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- disposal of waste in accordance with legislation
- 11 demonstration of work skills to check, adjust, communicate, manoeuvre, position, access and set down
- 12 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery for accessing to given working instructions, relating to one of the following categories of plant or machinery
 - 13.1 mobile elevated working platforms
 - 13.2 mast climbers
- 4 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Selection of resources

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4 Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5 Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant **resources** and how defects should be rectified
- K14 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 6 Minimise the risk of damage

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 7

Meet the contract specification

- K19 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8 Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery for accessing

Scope/range relating to Knowledge and Understanding (cont)

Legislation, Approved Codes of Practice and official guidance

6 this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

7 operative care of plant or machinery, hand tools and ancillary equipment

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 identify the characteristics of the plant and machinery appropriate to the accessing operation
 - 8.2 carry out performance checks for accessing operation
 - 8.3 identify with area of access operation
 - 8.4 carry out pre-operational checks for obstructions, stability, of the work and surrounding area
 - 8.5 check to avoid damage to structures and utilities service apparatus
 - 8.6 position, set up and secure plant or machinery for accessing operations
 - 8.7 operate, manoeuvre, position and set down safety and securely
 - 8.8 shut down and secure plant or machinery
 - 8.9 use hand tools, ancillary equipment and accessories

Scope/range relating to Knowledge and Understanding (cont)

Methods of work (cont)

- 9 team work and communication
- 10 needs of other occupations associated with operating plant or machinery for accessing

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants, fuels
 - 16.2 attachments and accessing aids
 - 16.3 hand tools, ancillary equipment and/or accessories

Scope/range relating to Knowledge and Understanding (cont)

Resources (cont)

17 methods of calculating weight, bearing, pressure, quantity, length and area associated with the method/procedure to operate plant or machinery for accessing

Security procedures

18 site, workplace, company and operative

Skills

19 own occupation and occupations related to the work

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting and/or using materials, components and equipment for plant or machinery operations
- 4 setting up, operating and shutting down plant or machinery to carry out processing work

Key words

Crushers; Screeners; Batching-plant

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- 2 organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the plant or machinery operations and the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the plant or machinery operation and the work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant or machinery, tools and equipment
- 6 follow organisational procedures for the requisition of consumables, materials and other resources
- 7 selection of resources associated with own work7.1 tools and ancillary equipment and/or accessories
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- 11 demonstration of work skills to check, adjust, communicate, manoeuvre, position and process
- 12 use and maintain hand tools, ancillary equipment and/or accessories
- operate plant or machinery for processing operations to given working instructions, relating to one of the following categories of plant or machinery
 - 13.1 crushers
 - 13.2 screeners
 - 13.3 batching plant
- 14 shut down and secure plant or machinery
- 15 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate **information** and unsuitable **resources**, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2 Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Safe work practices

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why and when **personal protective equipment (PPE)** should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other **resources**

Performance Criteria 5 Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant **resources** and how defects should be rectified
- K14 how the **resources** should be used and how any **problems** associated with the **resources** are reported
- K15 the organisational procedures to select **resources**, why they have been developed and how they are used
- K16 the **hazards** associated with the **resources** and **methods of** work and how they are overcome

Performance Criteria 6

Minimise the risk of damage

- K17 how to **protect work** from damage and the purpose of protection
- K18 why **disposal of waste** should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 7 Interpretation of information

K19 how **methods of work**, to meet the specification, are carried out and **problems** reported

K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8 Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official quidance

Emergencies

- 3 operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by method of work, risk/COSHH assessments, manufacturers' technical information statutory regulations and official guidance

Information

drawings, specifications, schedules, method statements, manufacturers' information and regulations governing the operation of plant or machinery for carrying out processing work

Scope/range relating to Knowledge and Understanding (cont)

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Maintenance

7 operative care of plant or machinery, hand tools, ancillary equipment and/or accessories

Methods of work

- application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 identify the characteristics of the plant and machinery appropriate to the processing operation
 - 8.2 carry out performance checks for process operation
 - 8.3 identify with the area for the process work
 - 8.4 carry out pre-operational checks for obstructions, stability, safety and security of the work and surrounding area
 - 8.5 carry out the processing work
 - 8.6 deposit processed materials
 - 8.7 shut down and secure plant or machinery
 - 8.8 use hand tools, ancillary equipment and accessories
- 9 team work and communication
- 10 needs of other occupations associated with operating plant or machinery for process work

Scope/range relating to Knowledge and Understanding (cont)

Personal protective equipment (PPE)

occupational use, types, purpose of each type and work situations

Problems

- 12 those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist
 - 16.1 consumables, lubricants, fuels
 - 16.2 attachments, processing aids
 - 16.3 hand tools, ancillary equipment and/or accessories
- 17 methods of calculating weight, bearing, pressure, quantity, length and area associated with the method/procedure to operate plant or machinery to carry out process work

Security procedures

18 site, workplace, company and operative

Scope/range relating to Knowledge and Understanding (cont)

Skills

19 own occupation and occupations related to the work

Unit Summary

This standard is about:

- 1 interpreting information
- 2 adopting safe and healthy working practices
- 3 selecting materials, components, plant, tools and/or ancillary equipment
- 4 preparing for operator or operator assisted erection and dismantling of mobile cranes and drilling, piling and demolition rigs

Key words

Mobile crane; Mobile tower crane; Drilling rig; Piling rig; Demolition rig

Performance Criteria

You must be able to:

- interpret the given operating information relating to the use of plant or machinery and confirm its relevance
- organise with others the sequence in which the work is to be carried out
- 3 comply with the relevant, current legislation, special legal status documents, official guidance and organisational procedures to maintain safe work practices
- 4 request resources to sustain plant or machinery operations to complete the programme of work
- 5 select plant or machinery resources for the methods of work and operations to be carried out
- 6 comply with organisational procedures to minimise the risk of damage to the work and surrounding area
- 7 comply with the given contract information to carry out the work efficiently to the required specification
- 8 complete the work within the allocated time, in accordance with the programme of work

Scope/range related to Performance Criteria

- interpretation of drawings, specifications, schedules, method statements and manufacturers' information related to the work to be carried out
- 2 organisation of own work
- 3 communication with team members and other associated occupations about the operation and/or work to be carried out

Scope/range related to Performance Criteria (cont)

- 4 avoid hazards by following given safety information, including the use of personal protective equipment (PPE) to carry out the activity in accordance with legislation, Approved Codes of Practice and/or organisational requirements
- 5 safe use and storage of plant, tools and equipment
- follow organisational procedures for the requisition of consumables, materials and other resources
- selection of resources associated with own work
 7.1 attachments, tools and ancillary equipment
- 8 protection of the work and its surrounding area from damage
- 9 minimise damage and maintain a clean work space
- 10 disposal of waste in accordance with legislation
- demonstration of work skills to unload, load, site, measure, mark out, lay out, align, fit, position, connect, configure, dismantle, remove, adjust, secure, check and inspect
- use and maintain hand tools, portable power tools, ancillary equipment and machinery
- 13 prepare, erect and dismantle plant to given working instructions for one or more of the following
 - 13.1 mobile crane
 - 13.2 mobile tower crane
 - 13.3 drilling rig
 - 13.4 piling rig
 - 13.5 demolition rig
- 14 completion of own work within the estimated, allocated time to meet the needs of other occupations and/or client

Knowledge and Understanding

You need to know and understand:

Performance Criteria 1 Interpretation of information

- K1 the organisational procedures developed to report and rectify inappropriate information and unsuitable resources, and how they are implemented
- K2 the types of **information**, their source and how they are interpreted
- K3 the organisational procedures to solve **problems** with the **information** and why it is important they are followed

Performance Criteria 2

Organise with others

- K4 **communication** of ideas between team members
- K5 organisation of **resources** in conjunction with the progress of work
- K6 the **skills** required to carry out the work

Performance Criteria 3 Safe work practices

- K7 the level of understanding operatives must have of information for relevant, current legislation, Approved Codes of Practice and official guidance and how it is applied
- K8 how **emergencies** should be responded to and who should respond
- K9 the organisational **security procedures** for plant and/or machinery, tools, equipment and personal belongings

Knowledge and Understanding (cont)

Performance Criteria 3 (cont)

Safe work practices

- K10 what the accident reporting procedures are and who is responsible for making the report
- K11 why, when and how personal protective equipment (PPE) should be used

Performance Criteria 4

Request resources

K12 the organisational procedures for requisitioning consumables and other resources

Performance Criteria 5

Selection of resources

- K13 the characteristics, quality, uses, limitations and defects associated with plant resources and how defects should be rectified
- K14 how the resources should be used and how any problems associated with the resources are reported
- K15 the organisational procedures to select resources, why they have been developed and how they are used
- K16 the hazards associated with the resources and methods of work and how they are overcome

Performance Criteria 6

Minimise the risk of damage

- K17 how to protect work from damage and the purpose of protection
- K18 why disposal of waste should be carried out safely and how it is achieved

Knowledge and Understanding (cont)

Performance Criteria 7

Meet the contract specifications

- K19 how **methods of work**, to meet the specification, are carried out and **problems** reported
- K20 how **maintenance** of plant and/or machinery, tools and equipment is carried out

Performance Criteria 8 Allocated time

K21 what the **programme** is for the work to be carried out in the estimated, allocated time and why deadlines should be kept

Scope/range relating to Knowledge and Understanding

Communication

1 discussions, sketches and briefings

Disposal of waste

environmental responsibilities, organisational procedures, manufacturers' information, statutory regulations and official guidance

Emergencies

- operative's response to situations in accordance with organisational authorisation and personal skills when involved with
 - 3.1 fires, spillages, injuries
 - 3.2 emergencies relating to occupational activities

Hazards

4 those identified by risk assessment, method of work, risk/ COSHH assessments, manufacturers' technical information, statutory regulations and official guidance

Information

5 drawings, specifications, schedules, method statements, and manufacturers' information

Legislation, Approved Codes of Practice and official guidance

this relates to the operative's responsibilities regarding potential accidents and health hazards whilst working in the workplace, below ground level, at height, with tools and equipment, with materials and substances, with movement/storage of materials and by manual handling and mechanical lifting

Scope/range relating to Knowledge and Understanding (cont)

Maintenance

operative care of hand tools and/or portable power tools, plant and ancillary equipment

Methods of work

- 8 application of knowledge for safe work practices, procedures and skills, relating to the method/area of work and materials used, to
 - 8.1 erect and dismantle one or more of the following: mobile crane, mobile tower crane, drilling rig, piling rig, demolition rig
 - 8.2 use hand tools, power tools, plant and equipment
- 9 team work and communication
- 10 needs of other occupations associated with the erection and dismantling of plant

Personal protective equipment (PPE)

11 occupational use, types, purpose of each type and work situations

Problems

- those arising from information, resources and methods of work
 - 12.1 own authority to rectify
 - 12.2 organisational reporting procedures

Programme

- 13 types of progress charts, timetables and estimated times
- organisational procedures for reporting circumstances which will affect the work programme

Protect work

15 protect work against damage from general workplace activities, other occupations and adverse weather conditions

Scope/range relating to Knowledge and Understanding (cont)

Resources

- materials, components and equipment relating to types, quantity, quality and sizes of standard and/or specialist 16.1 plant
 - 16.2 hand and/or powered tools and equipment
- methods of calculating weight, bearing, pressure, quantity, length and area associated with the method/procedure to erect and dismantle plant

Security procedures

18 site, workplace, company and operative

Skills

19 own occupations and occupations related to the work
