

# **Award in Emergency First Aid at Work Assessment Strategy and Guidance**

**Group Award Code: GT7W 46**

**Scottish Credit Qualification  
Framework (SCQF level 6)**

**Date of original publication: August 2022**

**Version: 01 (August 2022)**

## History of Changes

It is anticipated that changes will take place during the life of the qualification and this section will record these changes. This document is the latest version and incorporates the changes summarised below. Centres are advised to check the Scottish Qualification Authority (SQA) APS Navigator to confirm they are using the up-to-date qualification structure.

**NOTE:** Where a unit has been revised and replaced by an updated version of the original unit:

- ◆ No new centres may be approved to offer the old version of the unit
- ◆ Centres should only enter learners for the old version of the unit where learners are expected to complete the unit before its finish date.

<b>Version number</b>	<b>Description</b>	<b>Date</b>
01	Creation of new document following FAAOF unit review of Emergency First Aid at Work syllabus.	August 2022

Unit title	Unit code	SCQF level	SCQF credit points	SQA credit value
Emergency First Aid in the Workplace	J6N0 46	6	1	0.25

## General Information

This guidance is designed to assist first aid training providers to gain and maintain Scottish Qualifications Authority (SQA) approval to deliver, assess and internally verify the *Award in Emergency First Aid at Work (EFAW)* at Scottish Credit and Qualification Framework (SCQF) level 6.

The content and standards of first aid training will be conversant with the following:

- ◆ *First Aid at Work: The Health and Safety (First Aid) Regulations 1981 — Guidance on Regulations.*
- ◆ Current guidance published by the Resuscitation Council (RCUK).
- ◆ Current edition of the authorised 'First Aid Manual' of the Voluntary Aid Societies (St John Ambulance, St Andrew's First Aid and British Red Cross).
- ◆ Current edition of the 'Emergency First Aid Made Easy' manual by Nigel Barraclough.
- ◆ The Assessment Principles and Delivery Standards of the First Aid Awarding Organisation Forum.
- ◆ Other published guidelines, provided they are in line with or are supported by a responsible body of medical opinion.

## Definition of First Aid

First aid is the initial help given to a sick or injured person until they receive full medical treatment.

*The Health and Safety (First Aid) Regulations 1981* require all employers to provide adequate first aid cover in the workplace in order that employees receive immediate attention if they are taken ill or become injured at work.

# Quality Assurance of Regulated First Aid Qualifications

In order to ensure the integrity and currency of regulated First Aid qualifications, the **First Aid Awarding Organisation Forum (FAAOF)** has produced **Assessment Principles, Delivery Standards**, and **Assessment Standardisation** for Regulated First Aid training. These shared **minimum** standards have been agreed by members of the FAAOF in co-operation with the Health and Safety Executive (HSE) and qualification regulators. They must be applied in addition to the generic criteria and regulations that Ofqual/SQA Accreditation/Qualification Wales/CCEA Regulation require Awarding Organisations to meet for the delivery of regulated and accredited qualifications.

The use of unit J6N0 46 *Emergency First Aid at Work* within the *Award in Emergency First Aid at Work* is restricted to Awarding Organisations who meet the Terms of Reference of the First Aid Awarding Organisation Forum.

The Scottish Qualifications Authority and other Awarding Organisations constitute the membership of the FAAOF. Forum members, such as SQA and its approved centres, must comply with the most current Assessment Principles and Delivery Standards for regulated first aid. Competence of trainers, assessors and internal verifiers will be managed through robust internal and external quality assurance systems.

The First Aid Assessment Principles, produced and managed by the FAAOF relate to the following awards:

- ◆ Emergency First Aid at Work (EFAW).
- ◆ First Aid at Work (FAW).
- ◆ Emergency Paediatric First Aid (EPFA).
- ◆ Paediatric First Aid (PFA).

SQA has developed this Assessment Strategy and Guidance document in accordance with these standardised documents. It is designed to assist first aid training providers to gain and maintain SQA approval to deliver, assess and internally verify the *Award in Emergency First Aid at Work*. All SQA centres must comply with this Assessment Strategy and Guidance.

## Roles and Responsibilities for this Award

The effective delivery of the *Award in Emergency First Aid at Work* will require, at a minimum, one trainer, one assessor and one internal verifier.

The occupational and knowledge requirements for the trainer and assessor are specified separately. However, it is accepted that the same person may perform both roles, providing the qualification and experience requirements for both roles are met.

The number of courses delivered may impact the number of trainers, assessors and internal verifiers required.

The trainer/assessor must maintain a portfolio of first aid evidence containing appropriate qualifications to their role:

- ◆ A current and valid First Aid at Work certificate (or acceptable equivalent).
- ◆ Evidence of first aid training/assessment.
- ◆ Annual observation of first aid practice.
- ◆ Evidence of continuing professional development.

## **Trainer, Assessor, Internal Verifier, External Verifier**

Individuals undertaking these roles must have occupational knowledge and competency in first aid and appropriate/associated training experience conversant with their role.

Occupational knowledge and competence in first aid can be evidenced by providing a current and valid First Aid at Work certificate issued by a recognised Awarding Organisation **or** equivalent, as accepted by the FAAOF and listed in **Appendix 1**.

In terms of SQA ensuring that a non-regulated First Aid at Work qualification meets the requirements of the *Award in Emergency First Aid at Work*, those claiming current competence in First Aid at Work must present a detailed mapping showing how the learning outcomes and assessment criteria of the *First Aid at Work* units have been assessed and achieved through the non-regulated qualification. Evidence must also be provided of how the qualification was quality assured. This evidence will be checked by an SQA external verifier. A recommendation for ratification will then be made, if appropriate, to the FAAOF. The **FAAOF FAQ page** lists all currently accepted FAW equivalents for assessors and verifiers.

From 1 September 2019, a second option for trainer/assessor re-qualification has been introduced.

If a qualified trainer/assessor is current and has delivered one full First Aid at Work course within the last 3 months of sitting the assessments and has been with the Awarding Organisation for at least one year, they may go straight to assessment. As a minimum requirement they must also provide evidence of:

- ◆ a satisfactory first aid internal quality assurance observation within the last 12 months of sitting the assessments.
- ◆ a portfolio of evidence as stated in the Assessment Principles and outlined in the Roles and Responsibilities section.

Assessment must be carried out by another suitably qualified assessor and independently verified.

## **Knowledge and competence in first aid training, assessing, internal and external verification can be evidenced by:**

- ◆ A suitable Training/Assessing qualification as listed in **Appendix 2**.
- ◆ A suitable Internal Verification qualification as listed in **Appendix 3**.
- ◆ A suitable External Verification qualification as listed in **Appendix 4**.

### **Trainers**

Those involved in the training of the *Award in Emergency First Aid at Work* must have knowledge and competency in first aid as well as knowledge and competency to train based on qualifications and experience. An acceptable portfolio must show:

#### **(i) Occupational knowledge and competence in first aid — evidenced by:**

- ◆ holding a First Aid at Work qualification or medical registration as detailed in **Appendix 1**.

#### **(ii) Knowledge and competency in teaching/training first aid - evidenced by:**

- ◆ holding an acceptable teaching/training qualification as detailed in **Appendix 2**.

#### **AND either:**

- ◆ providing an acceptable log of teaching first aid within the last three years. *This should be a minimum of 36 hours (for example 6 days of 6 hours).*

**or**

- ◆ providing an acceptable record of competently teaching theoretical and practical first aid sessions under the supervision of a suitably qualified trainer/assessor. *This should be a minimum of 36 hours (for example 6 days of 6 hours).*

#### **And:**

Hold a minimum of one annual observation, conducted under the supervision of a qualified internal verifier of first aid within the previous 12 months. This record should provide evidence that practical and theoretical topics were delivered (and assessed if trainer/assessor is the same person), competently for the following minimum duration:

- ◆ new Trainers/Assessors — 6 hours.
- ◆ experienced Trainers/Assessors — 4 hours.

It is the centre's responsibility to maintain up-to-date information about trainers and assessors, and to ensure the currency of all those involved in first aid training delivery.

## **Assessors**

Those involved in the assessment of the *Award in Emergency First Aid at Work* must have knowledge and competency in first aid as well as knowledge and competency to assess based on qualifications and experience. An acceptable portfolio must show:

**(i) Occupational knowledge and competence in first aid evidenced by:**

- ◆ holding a First Aid at Work qualification or medical registration as detailed in **Appendix 1**.

**(ii) Knowledge and competency in assessing first aid evidenced by:**

- ◆ holding an acceptable assessing qualification or CPD training as detailed in **Appendix 2**.

**AND either:**

- ◆ providing an acceptable log of first aid assessments conducted within the last three years.

**or**

- ◆ providing an acceptable record of competently assessing theoretical and practical first aid qualifications under the supervision of a suitably qualified assessor.

**And:**

Hold a minimum of one annual observation, conducted under supervision of a qualified internal verifier of first aid within the previous 12 months. This record should provide evidence that practical and theoretical topics were delivered competently for the following minimum duration:

- ◆ new trainers/assessors — 6 hours.
- ◆ experienced trainers/assessors — 4 hours.

Assessors may be working towards an assessor qualification as detailed in Appendix 2. If this is the case, the qualification needs to be achieved within 18 months of starting.

Assessors who are working towards an appropriate assessor qualification, should have the necessary occupational competence and experience and be supported by an appropriately qualified assessor or internal verifier. Any such arrangements should be agreed with SQA and will be monitored through the external quality assurance process.

Where assessors undertake first aid qualifications within their own centre, this should be recorded as a potential conflict of interest and marked by another assessor. Assessment evidence for the assessor in question should be sampled by the internal verifier in addition to the usual sampling strategy. This evidence may be requested during external verification.

It is the centre's responsibility to maintain up-to-date information about assessors and to ensure the currency of all those involved in assessing.

### **Internal Verifiers**

Those involved in the internal quality assurance of the *Award in Emergency First Aid at Work* must have knowledge and competency in first aid as well as knowledge and competency in internal quality assurance. An acceptable portfolio must show:

**(i) Occupational knowledge and competence in first aid evidenced by:**

- ◆ holding a First Aid at Work qualification or medical registration as detailed in **Appendix 1**.

**(ii) Knowledge and competency in internal quality assurance evidenced by:**

- ◆ holding an acceptable internal quality assurance qualification or CPD training as detailed in **Appendix 3**.

Internal verifiers must:

- ◆ have knowledge of the requirements of the qualification they are quality assuring at the time any assessment is taking place.
- ◆ have knowledge and understanding of the role of assessors.
- ◆ visit and observe assessments.
- ◆ carry out other related internal quality assurance.

Internal verifiers may be working towards an internal verifier qualification as detailed in **Appendix 3**. If this is the case, the qualification needs to be achieved within 18 months of starting.

Internal verifiers who are working towards an appropriate internal verifier qualification, should have the necessary occupational competence and experience and be supported by an appropriately qualified internal verifier. Any such arrangements should be agreed with SQA and will be monitored through the external quality assurance process.

The internal verifier must carry out pre-delivery checks on the instruments of assessment and marking instructions to be used. This includes both SQA and centre-devised instruments of assessment and marking instructions. The internal verifier must ensure these adhere to the FAAOF Assessment Principles, the SQA Assessment Strategy and the unit specification requirements. Learner evidence must be monitored to ensure assessment judgments are accurate and appropriate. These and other internal verification outcomes should be set out in an internal verification record and discussed at regular standardisation meetings. The internal verifier should also monitor and verify the trainer's/assessor's ability in teaching and/or assessing first aid.

Internal verifiers cannot verify their own work. This includes assessments they have delivered (if in a dual role), or assessments they have completed. Where internal verifiers undertake first aid qualifications within their own centre, these assessments should be verified by another internal verifier in addition to the usual sampling strategy. Evidence of this may be requested during external verification.

It is the centre's responsibility to maintain information about internal verifiers and to ensure the currency of those involved in internal verification processes.

## **External Verifiers**

Those involved in the external quality assurance of the *Award in Emergency First Aid at Work* must have knowledge and competency in first aid as well as knowledge and competency in external quality assurance. An acceptable portfolio must show:

**(i) Occupational knowledge and competence in first aid evidenced by:**

- ◆ holding a First Aid at Work qualification or medical registration as detailed in **Appendix 1**.

**(ii) Knowledge and competency in external quality assurance evidenced by:**

- ◆ holding an acceptable external quality assurance qualification as detailed in **Appendix 4**.

External verifiers must:

- ◆ have knowledge of the requirements of the qualification they are quality assuring at the time any assessment is taking place.
- ◆ have knowledge and understanding of the role of trainers, assessors and internal verifiers.

External verifiers may be working towards an external verification qualification as detailed in **Appendix 4**. If this is the case, the qualification needs to be achieved within 18 months of starting. SQA will organise, provide and manage this training.

The external verifier will carry out approval and external verification visits. They may observe the quality standards of training delivery and assessment of learners during annual visits. These external activities should ensure consistency of delivery, assessment and internal verification of the *Award in Emergency First Aid at Work* across all centres. The external verifier will provide a report for each centre and forward this to SQA.

# Delivery, Assessment and Quality Assurance

## Governance

Centres must have a copy of the most up-to-date Assessment Strategy and Guidance for the *Award in Emergency First Aid at Work* and be working to the standards required.

It is the responsibility of centres delivering this award to ensure all trainers, assessors and internal verifiers meet the occupational knowledge and competence requirements prior to fulfilling the role of trainer, assessor and internal verifier. Centres must ensure that everyone involved with this award has current first aid knowledge and is working to the current Resuscitation Council (UK) First Aid Standards — <https://www.resus.org.uk/>.

It is the centre's responsibility to ensure trainers, assessors and internal verifiers keep up to date with the standards required of their role. Trainers, assessors and internal verifiers should evidence this through the recording of appropriate Continuing Professional Development (CPD) activities, identifying which role it relates to and explaining the impact of the learning on that specific role. Attendance at standardisation meetings and professional reading are good examples of appropriate CPD activity.

CPD logs will be monitored during external verification activity. A template is available on the SQA First Aid page for use by trainers/assessors/IVs — **CPD Template**.

To uphold competent standards of first aid practice, SQA strongly recommends that all centres register for email updates from the **Resuscitation Council (UK)** and make use of other publications, provided they are supported by a responsible body of medical opinion.

## Training equipment

Centres should ensure they have the correct equipment to effectively deliver the *Award in Emergency First Aid at Work*. There should be enough equipment to ensure compliance with the FAAOF **Delivery Standards for Regulated First Aid Qualifications** and to cover all learning outcomes and assessment criteria identified in the unit specification (see **Appendix 5**). The training equipment should be sufficient to support the maximum ratio of 12 learners to 1 trainer.

Training equipment and resources should include the following:

<b>Resuscitation Manikins</b>	Resuscitation manikins should be provided at a minimum ratio of one adult manikin per four learners*.
<b>AED Trainers</b>	AED training devices should be provided at a minimum ratio of one AED per four learners. Where fewer training AEDs are provided, learning hours and lesson plans should be adjusted accordingly to ensure learners are not disadvantaged.
<b>Hygiene</b>	Sufficient procedures must be in place to ensure adequate hygiene standards in the use of resuscitation manikins and other training equipment. All regulatory and/or government guidance in relation to COVID-19 must be followed. <b><i>*Where manikins must be shared between learners, each learner should be provided with their own manikin face for maximum hygiene.</i></b>
<b>Audio visual equipment and training aids</b>	Sufficient AV equipment and other training aids should be available to facilitate learning using varying training methods. This may include slides, videos, revision activities, first aid kits and choking rescue vests or choking manikins. Other resources for trainer and/or learner demonstration should include trainer auto-injectors, inhalers and spacer devices.
<b>Learning materials</b>	Learners should be provided with clear and accurate reference materials (handouts/books/links to online resources), covering the topics included in the award. These must be made available to the learner whilst undertaking the course and for the duration of their certification period. Learning materials must meet current first aid standards as identified by the Resuscitation Council (UK) and other responsible bodies of medical opinion.
<b>Dressings</b>	Sufficient clean bandages, dressings and other items commonly found in a first aid kit must be available to facilitate training delivery and assessment.
<b>Training Venue</b>	The training venue must meet acceptable health and safety standards and be conducive to learning, with sufficient room for practical and theoretical training. <i>For example, size, floor surfaces, seating, writing surfaces, toilet facilities, ventilation, lighting, heating, access, exits, cleanliness, absence of distracting noise.</i>

Additional requirements for COVID-safe training should also be taken into account — further information on this is available in our COVID Guidance for Centres document. Equipment maintenance and covid-safe practices will be monitored during external verification activity.

## Duration and Delivery of Training

The **minimum** duration of contact hours (time set aside for direct teaching and assessing, excluding breaks) for this award is 6 hours. These can be delivered over a minimum of 1 day or a maximum of 4 weeks with a minimum of 2 hours per individual session.

Centres may choose to deliver this curriculum over a longer period, provided the above minimum and maximum timescales are adhered to:

Qualification	Minimum Contact Hours	Minimum Days	Maximum Weeks	Minimum Session	Learner/ Trainers Ratio	Certificate Validity	Annual Refresher Recommended
Emergency First Aid at Work	6	1	4	2 hours	12:1	3 years	Yes

Certification for the *Award in Emergency First Aid at Work* is valid for 3 years, after which revalidation is required.

The Health and Safety Executive (HSE) highly recommends that holders of this certificate attend an annual refresher course to keep their first aid skills up to date and be informed of any recent changes to first aid practice.

Suggested content for an annual refresher course can be found in ***First Aid at Work: The Health and Safety (First Aid) Regulations 1981 — Guidance on Regulations 2013***.

Unit J6N0 46 *Emergency First Aid in the Workplace (Appendix 5)* identifies the learning outcomes and assessment criteria to be achieved.

Following successful completion of this Award, learners may decide to progress on to undertake Unit 2 J6N1 46 (*Recognition and Management of Illness and Injury in the Workplace*). Where 'Recognition of Prior Learning' is applied, Unit 2 must be successfully completed within 10 weeks of the first unit (J6N0 46) being achieved.

Centres can increase flexibility by overlapping this qualification with Day 1 of the *Award in First Aid at Work*, provided the maximum learner to trainer ratios (12:1) are adhered to.

## Blended Learning in Emergency First Aid at Work — Quality Assurance Standards

SQA strongly recommends that all first aid training be delivered using face-to-face methods. However, in certain circumstances, centres may wish to consider the use of blended learning approaches. If this is the case, centres must adhere to the assessment standards for the unit (See **Appendix 5**) and take account of the following:

1. The time taken to complete the first aid course is not reduced. There may be a benefit in flexibility, but blended learning should not reduce the overall time required to take the course.
2. The employer should provide paid time for the employee to undertake the training. The employee should not be required to take the distance-learning component of the course in their 'own' time.
3. Following completion of the distanced learning component, the learner must be assessed by a suitably qualified first aid assessor (who has qualifications and experience as listed in **Appendices 1 and 2**). The first aid assessor must satisfy themselves that all the assessment criteria for the learning outcomes delivered via distance learning have been met. Auditable evidence should be generated. It is the centre's responsibility to confirm the identity of the learner and the authenticity of this evidence.
4. The assessment should be quality assured following FAAOF and SQA guidance.
5. A minimum of two-thirds of the training time for the unit should be face-to-face learning (for example for *EFAW* qualifications a minimum of 4 hours must be delivered face-to-face).
6. All practical elements of the training **must** be delivered and assessed face-to-face. These are identified in the unit specification in Appendix 5.

### Lesson Plans

Centres should plan and deliver training in accordance with detailed lesson plans. Training should be delivered to the principles set out in *NOS 7 Facilitate Individual Learning and Development*. Lesson plans will be monitored during external quality assurance activity.

Lesson plans must include the following:

- ◆ timetable for delivery of the *Award in Emergency First Aid at Work*.
- ◆ aims, outcomes and objectives of each session.
- ◆ learner and trainer, individual and/or group activities.
- ◆ resources required for each session.

In line with the revised unit specification for the *Award in Emergency First Aid at Work*, management of catastrophic bleeding (wound packing and application of a tourniquet) may be included in teaching on management of external bleeding, where a trainer/assessor has the required knowledge and skills to deliver the topic. The optional Practical Assessment 6 should be used to confirm competency in these skills.

## Requirements for Assessment

The following guidance is applicable to both SQA and centre-devised instruments of assessment:

The unit J6N0 46 *Emergency First Aid in the Workplace* should be delivered, assessed and quality assured in accordance with the *Assessment Principles for Regulated First Aid*, published by the FAAOF, as well as SQA's *Assessment Strategy and Guidance*.

Practical and theoretical assessments should determine a learner's ability to act safely, promptly and effectively when an emergency occurs and when administering first aid to a casualty.

The internal verifier must verify all instruments of assessment and marking instructions prior to them being used by the trainer/assessor. Evidence of internal prior verification and other pre-delivery checks must be recorded.

Assessors are encouraged to make effective use of informal assessment strategies to assist professional judgements of when a learner may be ready for formal assessment. Questions and answers, group activities, self-assessment tools can all be used for this purpose. However, informal assessment activities cannot be used when making assessment decisions of competence against the unit's assessment criteria.

Formal assessment may take place at any time during the delivery of the qualification (where the trainer/assessor is the same person) and does not need to be done as a final assessment. It is however, a requirement for the learner to be aware that assessment is taking place and all assessment criterion for the unit must be assessed.

Where the assessment criterion uses the verb 'demonstrate' the learner must demonstrate the skill through practical scenario.

Assessors **must** be confident that the learner's response clearly demonstrates they could act safely, promptly and effectively in an emergency. Whether written assessment is completed in sections throughout the course or delivered summatively at the end of a unit, the minimum standard for each assessment criterion must be met to achieve a pass. A learner cannot miss out or completely fail any individual question. The minimum success criteria for each question is set out within the marking guide for each award. Assessors should use professional judgement to determine where a learner has not met this minimum standard or errors have occurred, and make good use of remediation strategies (such as additional verbal

questioning) to ensure sufficient overall knowledge and understanding conversant with the role of a first aider. Details of any remediation (for example assessor question and learner answer) should be recorded on the learner's assessment paper.

All theory questions must be physically marked. It is good practice to mark each correct statement within an answer, rather than apply a single tick to the whole question. This provides clear feedback for the learner where part of their answer is incorrect or irrelevant, and also makes it easier for internal and external verifiers to confirm assessment judgements.

While physical contact can be kept to a minimum and it is not obligatory for learners to play the role of 'casualty', owing to the nature of first aid, some elements of practical learning will involve close contact with another learner. It is good practice for centres to make learners aware of this requirement prior to the course.

**First aid can be physically demanding, and learners must be physically able to meet all practical assessment criteria. This includes performing CPR to the required standard on a manikin, on the floor for a minimum of 2 continuous minutes. Centres should inform learners of these requirements prior to the course (for example through joining instructions). SQA will monitor how centres ensure learners are 'fit for assessment' during external verification visits.**

Where practical demonstration of a skill requires a complex sequence of actions, each step in the sequence must be assessed. The assessment must be planned in such a way as to ensure reliability and clear marking guidance must be provided to trainers, assessors and internal verifiers.

AED training is now a mandatory part of the CPR sequence. The unit specification J6N0 46 *Emergency First Aid in the Workplace* (**Appendix 5**) highlights the skills to be covered.

**Remediation:** Where a learner has not provided acceptable answers to written questions or demonstrated practical competence for some of the evidence required of the assessment criteria, the assessor should make good use of remediation strategies to allow the learner the opportunity to demonstrate their knowledge and understanding to the best of their ability. The assessor can clarify learner responses by requiring a written amendment or by oral questioning. This can be done face-to-face or by telephone. Assessor questions and feedback, along with learner responses and their outcome should be noted on the learner's assessment paper.

**Re-assessment:** Where a learner has not provided acceptable answers to written questions or practical competence to most of the evidence required of the assessment criteria, the learner should be provided with a re-assessment opportunity. A new and unseen instrument of assessment must be used.

## Reasonable Adjustments

Where a barrier to learning may prevent someone with an additional support need or disability from undertaking assessment, adaptations or special considerations may be applied provided the integrity, validity and reliability of the assessment can be maintained.

It may not be possible to make an adjustment where it would negatively impact an employer's responsibilities under the Health and Safety (First Aid) Regulations 1981 (for example if a learner is unable to safely and competently perform CPR for 2 continuous minutes on a manikin on the floor without assistance from a third party). The **FAAOF guidance on Reasonable Adjustments and Special Considerations in First Aid Qualifications** should be referred to when planning training delivery, and considering whether a reasonable adjustment or special consideration is appropriate.

Centres should have a system in place to request/gather (as much as is reasonably possible), this information prior to the learner attending the course. Where possible, reasonable adjustments and special considerations should be discussed and agreed with another assessor or internal verifier, as well as the learner. Details of any adjustments made should be recorded, (although this may be retrospectively) and monitored during the internal verification process. SQA will check how centres confirm learners' fitness for regulated first aid assessment under qualification verification Assessment Criterion 3.2. This may include looking at a centre's processes for managing reasonable adjustments.

All evidence of assessment, remediation, re-assessment and reasonable adjustments must be formally recorded and available for internal and external verification.

## SQA Devised Instruments of Assessment

The unit J6N0 46 *Emergency First Aid in the Workplace* should be delivered, assessed and quality assured in accordance with the **Assessment Principles and Delivery Standards for Regulated First Aid Qualifications**, published by the FAAOF and outlined in SQA's *Assessment Strategy and Guidance*.

SQA has developed assessment papers which meet the assessment criteria (including theoretical questions, practical scenarios and associated marking instructions) for the *Award in Emergency First Aid at Work*. These can be found on SQA's secure web pages — **[www.sqasecure.org.uk](http://www.sqasecure.org.uk)** which can be accessed via the centre coordinator. These papers are live instruments of assessment and must be kept confidential and stored securely at all times. For further guidance on the security of assessments, please refer to **SQA's 'Security of Assessments Procedure Enhanced Guidance'**.

Theory parts of the assessment should be delivered in closed-book, supervised conditions. All assessment criteria for the unit (see **Appendix 5**) must be assessed. In accordance with the 'requirements for assessment' outlined above, assessors may choose to assess questions at various appropriate points throughout the course, provided the integrity of the assessment process is maintained.

The internal verifier must verify the instruments of assessment and marking instructions prior to them being used by the trainer/assessor. Evidence of this and other pre-delivery checks must be recorded and made available for external verification.

Centres must demonstrate standardisation of assessment judgements/decisions across all assessors and internal verifiers. As good practice, assessors and internal verifiers should complete 'moderation of marking' exercises to confirm the accuracy and consistency of assessment judgements and internal verification decisions. Along with feedback from internal verification, this should be monitored during centre standardisation activities.

All evidence of assessment, remediation and any re-assessment or reasonable adjustments must be formally recorded and available for internal and external verification.

## **Centre-devised Assessments**

Where centres wish to devise their own instruments of assessment and marking instructions for the *Award in Emergency First Aid at Work*, they must ensure these meet the standards required of the assessment criteria as outlined in the unit specification as well as SQA's assessment principles (valid, reliable, equitable and fair).

Centres may wish to make use of the following documents when constructing appropriate instruments of assessment and associated marking instructions:

### **SQA's Guide to Assessment (August 2017)**

### **SQA's Assessment: A Guide for Centres offering Regulated Qualifications (updated March 2019)**

Centres must also adhere to SQA's guidance on the security of assessments. Centre assessments must be kept confidential and stored securely at all times. For further guidance on the security of assessments, please refer to **SQA's 'Security of Assessments Procedure Enhanced Guidance'**.

Assessment may take place at any time during the delivery of the qualification where the trainer/assessor is the same person.

Centres must use appropriate methods of assessment and all assessment criteria for the units (see **Appendix 5**) must be assessed in line with the **Requirements for Assessment** outlined above.

Evidence of achievement of the unit assessment criteria must be appropriately recorded for quality assurance purposes. This includes a record of oral evidence. An observation checklist can provide evidence for practical demonstration.

Knowledge-based assessment criteria could be assessed for example, by short-answer questions, oral questioning or case studies. Some assessment criteria must be assessed through practical demonstration as specified in the unit specification (see **Appendix 5**).

When devising instruments of assessment and marking instructions, centres may wish to take a more holistic approach and integrate some underpinning knowledge questions during the practical simulations. For example, when demonstrating how to control external bleeding (**Appendix 5** — Assessment Criterion 5.2) the assessor may verbally ask the learner how they would recognise a casualty who is in hypovolaemic shock (**Appendix 5** — Assessment Criterion 6.1). The learner's response must be recorded and kept as evidence for internal and external quality assurance.

The internal verifier must verify the instruments of assessment and marking instructions prior to them being used by the trainer/assessor. Evidence of internal prior verification and other pre-delivery checks must be recorded and made available for external verification.

It is also strongly recommended that all centre-devised instruments of assessment and marking instructions are submitted to the SQA for prior verification, which is a free service offered to all centres. Prior verification gives additional confidence that proposed instruments of assessment are fit for purpose and meet the standards for assessment including national standards and requirements for qualification verification.

Centres must demonstrate standardisation of assessment decisions across all assessors and internal verifiers. This can be achieved through the development of detailed marking instructions, providing exemplar answers to questions set within the instrument(s) of assessment. As good practice, assessors and internal verifiers should complete 'moderation of marking' exercises to confirm the accuracy and consistency of assessment judgements. Along with feedback from internal verification, this should be monitored during centre standardisation activities.

All evidence of assessment, remediation and any re-assessment must be formally recorded and available for internal and external verification.

## **End of Course Evaluation**

Centres should have an evaluation procedure in place that provides an opportunity for learners to give feedback on the following:

- ◆ the ability and competence of trainers/assessors.
- ◆ the structure and content of the Emergency First Aid at Work course.
- ◆ the first aid equipment used.
- ◆ the appropriateness of the training venue.

# Internal Verification

Internal verification helps centres ensure assessments are valid, reliable, practicable and fair. It also helps those involved in the delivery and assessment process work to a consistent standard. Documenting internal verification activity helps monitor internal assessment and verification, and plan for improvement. It also shows SQA that an effective internal verification system is in place, helping to safeguard the quality of our qualifications.

SQA uses a risk-based approach to meeting regulatory requirements for quality assurance. This should be reflected in the centre's internal verification strategy which should incorporate the following three stages:

- ◆ **Plan (pre-delivery).**
- ◆ **Do (during delivery — support and sampling).**
- ◆ **Review (post-delivery — reflection and review).**

The internal verifier should work to the requirements of their role as previously identified in the **Roles and Responsibilities** section. The internal verifier may wish to make additional use of the document — **Internal Verification: A Guide for Centres (updated June 2019)** to support their internal verification role. Additionally, centres may want to refer to the guidance and suggested templates in the **Internal Verification Toolkit: SQA** and on the **SQA: First Aid** pages.

Internal verifiers cannot verify assessments which they have developed or verify their own assessment judgements. Where internal verifiers and/or assessors undertake first aid qualifications within their own centre, it is expected that this would be documented as a potential conflict of interest and that any assessment decisions would be verified by another internal verifier. Assessment evidence for the assessor or internal verifier in question should be sampled in addition to the usual sampling strategy. This evidence may be requested during external verification. **Internal verification evidence must be kept for a minimum of 12 months for regulated first aid delivery. This includes learner assessment papers and feedback, IV reports plus any related standardisation or moderation activity.**

In line with the **Assessment Principles** and **Delivery Standards** for Regulated First Aid (as outlined in the **Roles and Responsibilities** section), each trainer/assessor should have a minimum of one observation per year. Trainers/assessors working with a larger volume of learners may need monitoring more frequently. The centre's internal verification policy should identify risk factors that would trigger additional observations.

The annual observation of the trainer/assessor, completed by an internal verifier for first aid should include:

- ◆ evidence of effective planning and delivery of training.
- ◆ adapting learning materials to meet the needs of learners.
- ◆ adapting flexibly to meet the needs of the learner.
- ◆ engaging appropriately with the learner.
- ◆ effectiveness of assessment methods and decisions.
- ◆ effective and positive methods of providing feedback to the learner.
- ◆ appropriate recording of all course requirements.
- ◆ effective use and safety of first aid and technical equipment.

Internal verifiers should record the outcomes of trainer observations and provide a copy to each trainer/assessor and other centre personnel as appropriate. A copy must also be made available to the external verifier. Centres may wish to make use of the templates provided on the SQA First Aid pages:

**Exemplar Annual Observation of Trainer/Assessor (Template)**

**Exemplar Annual Observation of Trainer/Assessor (Completed)**

## **Following Completion of the Award in Emergency First Aid at Work**

### **Retention of Records**

The centre should retain the following:

- ◆ learner details.
- ◆ dates for courses delivered.
- ◆ trainer/assessor who taught and assessed each course.
- ◆ assessment outcome for each learner.
- ◆ site selection checklists if delivered externally to the centre.
- ◆ learner evidence as per SQA and Centre Retention Policy.

Centres are required to retain learner assessment evidence for an annual external verification visit — for regulated qualifications this should be at least 12 months. This includes any assessments, internal verification records, feedback and any other related documents for example record of trainer observation.

## Certification

The centre must register the learner with SQA. This should include learner details plus:

<b>Group Award Code:</b>	GT7W 46
<b>Group Award Title:</b>	Emergency First Aid at Work
<b>Unit Code:</b>	J6N0 46
<b>Unit Title:</b>	<i>Emergency First Aid in the Workplace</i>

On successful completion of the course, the centre should notify SQA of the learner's achievement of the *Award in Emergency First Aid at Work*. It is important to do this quickly after course completion because the learner cannot undertake the role of First Aider in their workplace until they have evidence of their competence to do so.

SQA will generate the learner's *Emergency First Aid at Work* certificate. There is no requirement for a centre to provide the learner with a temporary certificate.

## Re-qualification

Certification for the *Award in Emergency First Aid at Work* is valid for 3 years.

Once a certificate has lapsed, learners must re-qualify by taking the full qualification again. Learning outcomes and assessment criteria for this unit are outlined in **Appendix 5**.

Should the learner's *Emergency First Aid at Work* certificate lapse, then they will not be considered competent to undertake the role of Emergency First Aider in the workplace for the purposes of the *First Aid at Work: The Health and Safety (First Aid) Regulations 1981*.

The Health and Safety Executive strongly recommends that Emergency First Aiders undertake annual refresher training during the three year certification period. Although not mandatory, this will assist them to maintain their basic skills and keep up to date with any changes to first aid procedures. This does not extend the currency of the *Emergency First Aid at Work* certificate.

## Appendix 1: Occupational Knowledge and Competence in First Aid

All Trainers, Assessors, Internal Verifiers and External Verifiers must have occupational knowledge and competence in first aid.

This may be evidenced by:

- ◆ holding a qualification issued by an Ofqual/SQA Accreditation/Qualification Wales/CCEA Regulation recognised Awarding Organisation/Body as follows:

Qualification delivered	Minimum qualification to be held by the Trainer/Assessor/IV/EV
Emergency First Aid at Work	First Aid at Work

or

current registration as a Doctor with the General Medical Council (GMC).

or

current registration as a Nurse with the Nursing and Midwifery Council (NMC).

or

current registration as a Paramedic with the Health and Care Professions Council (HCPC).

Registered healthcare professionals must act within their scope of practice and therefore have current expertise in first aid to train and/or assess. If holding current expertise in first aid practice, the above are exempt from the requirement to have a current and valid First Aid at Work certificate.

**The FAAOF has accepted the following as equivalent to a First Aid at Work certificate. It may add other certificates to this list:**

- ◆ IQL Level 2 Award in Pool Lifeguarding, Intervention, Supervision and Rescue.
- ◆ St John Ambulance First Aid at Work Certificate.
- ◆ St Andrew's Ambulance First Aid at Work Certificate.
- ◆ British Red Cross First Aid at Work Certificate.
- ◆ QA Level 3 Certificate in First Response Emergency Care (RQF).
- ◆ QA Level 4 Certificate in First Response Emergency Care (RQF).
- ◆ QA Level 5 Diploma in First Response Emergency and Urgent Care (RQF).
- ◆ FAQ Level 3 Award for First Responders on Scene: Emergency First Responder.

- ◆ FAQ Level 3 Award for First Responders on Scene: Ambulance Service Community Responder.
- ◆ FAQ Level 3 Award for First Responders on Scene: Ambulance Service Co-Responder.
- ◆ FAQ Level 3 Certificate for Ambulance Service First Responders.
- ◆ FAQ Level 3 Award in Immediate Emergency Care: Fire and Rescue.
- ◆ FAQ Level 3 Certificate for First Responders on Scene.
- ◆ QNUK Level 3 Award for First Responders (RQF).
- ◆ QNUK Level 3 Award for the First Person on Scene (International) (RQF).
- ◆ QNUK Level 3 Award in Rescue Trauma and Casualty Care (RTACC) (RQF).
- ◆ Pearson BTEC Level 3 Certificate for First Person on Scene.
- ◆ Pearson BTEC Level 4 Certificate for First Person on Scene.
- ◆ Pearson BTEC Level 4 Extended Certificate for First Person on Scene.
- ◆ Highfield Level 3 Award in First Aid Response (RQF).
- ◆ Highfield Level 3 Award in Emergency Care for First Responders (RQF).
- ◆ TQUK Level 3 Award for Initial Person on the Scene of an Incident (RQF).
- ◆ STA Award in Pool Lifeguarding.
- ◆ SFJ Awards Level 3 Award in First Person on Scene Support.

## Appendix 2: Qualifications suitable for Training/Assessing

The FAAOF has deemed the following qualifications as being suitable for trainers and assessors.

This list is **not exhaustive** but provides a guide to acceptable training and/or assessing qualifications. Trainers who also assess learner competence must hold a qualification (or separate qualifications) to enable them to perform both functions.

Qualification	Trainer	Assessors
<b>Current qualifications</b> <i>(available for new trainers/assessors to undertake):</i>		
Level 3 Award in Education and Training.	X	X
Level 4 Certificate in Education and Training.	X	X
Level 5 Diploma in Education and Training.	X	X
Level 3 Award in Training and Assessing in First Aid Qualifications (RQF).	X	X
Cert Ed/PGCE/B Ed/M Ed.	X	X
SVQ 3 Learning and Development SCQF level 8.	X	X
SVQ 4 Learning and Development SCQF level 9.	X	X
TQFE (Teaching Qualification for Further Education).	X	X
Planning and Delivering Training Sessions to Groups SCQF level 6.	X	X
Planning and Delivering Learning Sessions to Groups SCQF level 6.	X	X
L&D Unit 6 Manage Learning and Development in Groups SCQF level 8.	X	
L&D Unit 7 Facilitate Individual Learning and Development SCQF level 8.	X	
L&D Unit 8 Engage and Support Learners in the Learning and Development Process SCQF level 8.	X	
Carry Out the Assessment Process SCQF level 7.		X
Level 3 Award in Assessing Competence in the Work Environment.		X
Level 3 Award in Assessing Vocationally Related Achievement.		X
Level 3 Award in Understanding the Principles and Practices of Assessment.		X
Level 3 Certificate in Assessing Vocational Achievement.		X
L&D Unit 9Di Assess Workplace Competence Using Direct and Indirect Methods SCQF level 8.		X
L&D Unit 9D Assess Workplace Competence Using Direct Methods SCQF level 7.		X

Qualification	Trainer	Assessors
<b>Other acceptable qualifications</b>		
CTLLS/DTLLS.	X	X
PTLLS with unit 'Principles and Practice of Assessment' (12 credits).	X	X
Further and Adult Education Teacher's Certificate.	X	X
IHCD Instructional Methods.	X	X
IHCD Instructor Certificate.	X	X
English National Board 998.	X	X
Nursing mentorship qualifications.	X	X
NOCN Tutor Assessor Award.	X	X
SVQ/NVQ level 3 in Training and Development.	X	X
SVQ/NVQ level 4 in Training and Development.	X	X
PDA Developing Teaching Practice in Scotland's Colleges SCQF level 9.	X	X
PDA Training Practice in Scotland's Colleges SCQF level 9.	X	
PTLLS (6 credits).	X	
Regulated Qualifications based on the Learning and Development NOS 7 Facilitate Individual Learning and Development or NOS 6 Manage Learning and Development in Groups.	X	
Training Group A22, B22, C21, C23, C24.	X	
Learning and Training — Assessment and Quality Standards SCQF level 9.		X
A1 Assess Candidates Using a Range of Methods <b>or</b> D33 Assess Candidates Using Differing Sources of Evidence.		X
Conduct the Assessment Process SCQF level 8.		X
A2 Assess Candidate Performance through Observation <b>or</b> D32 Assess Candidate Performance.		X
Regulated Qualifications based on the Learning and Development NOS 9 Assess Candidate Achievement.		X

**Note: Assessors who do not hold a formal assessing qualification may alternatively attend First Aid Assessor CPD Training with an approved Awarding Organisation/Body.**

## Appendix 3: Qualifications suitable for Internal Verification

The FAAOF has deemed the following qualifications as being suitable for internal verifiers.

This list is **not exhaustive** but provides a guide to acceptable internal verification qualifications:

L&D Unit 11 Internally Monitor and Maintain the Quality of Workplace Assessment SCQF level 8.
Level 4 Award in the Internal Quality Assurance of Assessment Processes and Practice.
Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes and Practice.
Conduct the Internal Verification Process SCQF level 8.
Regulated Qualifications based on the Learning and Development National Occupational Standards (NOS) level 11 Internally Monitor and Maintain the Quality of Assessment.
V1 Conduct Internal Quality Assurance of the Assessment Process <b>or</b> D34 Internally Verify the Assessment Process.
Internally Verify the Assessment Process SCQF level 8.

***Note: Internal Verifiers/IQAs who do not hold a formal Internal Quality Assurance qualification may alternatively attend Internal Quality Assurance CPD Training with an Awarding Organisation/Body.***

## Appendix 4: Qualifications suitable for External Verification

The FAAOF has deemed the following qualifications as being suitable for external verifiers.

This list is **not exhaustive** but provides a guide to acceptable external verification qualifications:

L&D Unit 12 Externally Monitor and Maintain the Quality of Workplace Assessment SCQF level 9*.
Regulated qualifications based on the Learning and Development National Occupational Standards (NOS) 12 Externally Monitor and Maintain the Quality of Assessment.
Level 4 Award in the External Quality Assurance of Assessment Processes and Practice.
Level 4 Certificate in Leading the External Quality Assurance of Assessment Processes and Practice.
Conduct External Verification of the Assessment Process SCQF level 9.
V2 Conduct External Quality Assurance of the Assessment Process <b>or</b> D35 Externally Verify the Assessment Process.
Externally Verify the Assessment Process SCQF level 9 .

***Note: Where an external verifier is still in the process of achieving this qualification, the Awarding Organisation/Body must ensure that external verifiers are following the principles set out in the current 'NOS 12 Externally Monitor and Maintain the Quality of Assessment'.***

**Appendix 5: Unit 1 — J6N0 46  
Emergency First Aid in the Workplace**

**GT7W 46 — Award in Emergency First Aid in the Workplace**

<b>Unit title</b>	Emergency First Aid in the Workplace
<b>Unit code</b>	J6N0 46
<b>SCQF level</b>	6
<b>SCQF credit points</b>	1

## History of Changes

**Publication date:** August 2022

**Version:** 01

<b>Version number</b>	<b>Date</b>	<b>Description</b>	<b>Authorised by</b>
01	August 2022	New units devised by FAAOF following RCUK update and review 2021.	First Aid Awarding Organisation Forum/SQA Accreditation.

Title: <b>Emergency First Aid in the Workplace — Unit J6N0 46</b>		
<b>Learning outcomes —</b>	<b>Assessment Criterion —</b>	<b>Indicative content —</b>
<b>The learner will:</b>	<b>The learner can:</b>	<b>Context for learning:</b>
<b>1</b> Understand the role and responsibilities of a first aider.	1.1 Identify the role and responsibilities of the first aider.	Identification of the roles and responsibilities of a first aider may include: <ul style="list-style-type: none"> <li>◆ Preventing cross infection.</li> <li>◆ Recording incidents and actions.</li> <li>◆ Safe use of available equipment.</li> <li>◆ Assessing an incident.</li> <li>◆ Summoning appropriate assistance.</li> <li>◆ Prioritising treatment.</li> <li>◆ Dealing with post incident stress.</li> </ul>
	1.2 Identify how to minimise the risk of infection to self and <b>others</b> .	Minimising the risk of infection may include: <ul style="list-style-type: none"> <li>◆ Personal Protective Equipment (<i>PPE</i>).</li> <li>◆ Hand hygiene.</li> <li>◆ Disposal of contaminated waste.</li> <li>◆ Using appropriate dressings.</li> <li>◆ Barrier devices during rescue breaths.</li> <li>◆ Covering own cuts.</li> </ul> <p><b><i>Others may include casualties, work colleagues or people within the workplace environment.</i></b></p>
	1.3 Identify the need for <b>consent</b> to provide first aid.	Identifying the need to gain consent may include: <ul style="list-style-type: none"> <li>◆ Gaining consent.</li> <li>◆ <b>Implied consent.</b></li> </ul> <p><b><i>Where a casualty is unable to give consent in a life-threatening emergency for example due to unconsciousness, the law says that first aiders can assume consent based on the rationale that most rational people would want help.</i></b></p>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
2	Be able to assess an emergency situation safely.	2.1 Conduct a scene survey.	Conducting a scene survey may include: <ul style="list-style-type: none"> <li>◆ Checking for further danger.</li> <li>◆ Identifying the number of casualties.</li> <li>◆ Evaluating what happened.</li> <li>◆ Prioritising treatment.</li> <li>◆ Delegating tasks.</li> </ul>
		2.2 Conduct a primary survey of a casualty.	The primary survey sequence: <ul style="list-style-type: none"> <li>◆ Danger.</li> <li>◆ Response.</li> <li>◆ Airway.</li> <li>◆ Breathing.</li> <li>◆ Circulation.</li> </ul>
		2.3 <b>Summon appropriate assistance</b> when necessary.	Summoning appropriate assistance: <ul style="list-style-type: none"> <li>◆ Shouting for help.</li> <li>◆ Calling 999/112 via speakerphone or bystander.</li> <li>◆ Leaving the casualty to call 999/112.</li> <li>◆ Calling an NHS emergency helpline such as 111.</li> </ul> <p><b><i>Learners should be able to evaluate a situation to determine when to summon further assistance and what type of assistance to request.</i></b></p>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
3	Be able to provide first aid to an unresponsive casualty.	3.1 Identify when to administer Cardiopulmonary Resuscitation (CPR).	Identifying when to administer CPR must include: <ul style="list-style-type: none"> <li>◆ When the casualty is unresponsive and not breathing.</li> <li>◆ When the casualty is not breathing normally/has agonal breathing.</li> </ul>
		3.2 <b>Demonstrate</b> adult CPR using a manikin.	Demonstrating CPR must include: <ul style="list-style-type: none"> <li>◆ 30 chest compressions: <ul style="list-style-type: none"> <li>— correct hand positioning</li> <li>— 5-6 cm compression depth</li> <li>— 100-120 rate per minute.</li> </ul> </li> <li>◆ 2 rescue breaths: <ul style="list-style-type: none"> <li>— correct rescue breath positioning</li> <li>— blowing steadily into mouth (<i>about 1 sec to make chest rise</i>)</li> <li>— taking no longer than 10 seconds to deliver 2 breaths.</li> </ul> </li> <li>◆ AED (<i>Defibrillator</i>): <ul style="list-style-type: none"> <li>— correct placement of AED pads</li> <li>— following AED instructions.</li> </ul> </li> </ul> <p><b><i>CPR demonstration time must be a minimum of 2 continuous minutes at floor level and may additionally include use of rescue breath barrier devices.</i></b></p> <p><b><i>Where the word demonstrate is used, the learner must be assessed on practical skills.</i></b></p>

Learning outcomes — The learner will:	Assessment Criterion — The learner can:	Indicative content — Context for learning:
	3.3 Identify when to place a casualty into the <b>recovery position</b> .	<ul style="list-style-type: none"> <li>◆ Identifying when to place the casualty into the recovery position should include when the casualty has lowered levels of response and: <ul style="list-style-type: none"> <li>— does not need CPR</li> <li>— is breathing normally</li> <li>— is uninjured</li> </ul> </li> <li>◆ An injured casualty may be placed in the recovery position if the airway is at risk (<i>for example fluids in the airway or you need to leave the casualty to get help</i>).</li> </ul> <p><b><i>A position which maintains a stable, open, draining, airway.</i></b></p>
	3.4 <b>Demonstrate</b> how to place a casualty into the <b>recovery position</b> .	<p>Placing a casualty into the recovery position may include:</p> <ul style="list-style-type: none"> <li>◆ Placing in a position that maintains a stable, open, draining airway at floor level</li> <li>◆ Continually monitoring airway and breathing</li> <li>◆ Turning the casualty onto the opposite side every 30 minutes</li> <li>◆ Placing heavily pregnant casualty on their left side</li> </ul>
	3.5 <b>Demonstrate</b> continual monitoring of breathing whilst the casualty is in the recovery position.	<p>Continually monitoring airway and breathing includes:</p> <ul style="list-style-type: none"> <li>◆ Continual checking for normal breathing to ensure that cardiac arrest can be identified immediately</li> </ul>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
		3.6 Identify how to <b>administer first aid</b> to a casualty who is experiencing a seizure.	<p>Administering first aid to a casualty having a generalised seizure may include:</p> <ul style="list-style-type: none"> <li>◆ Keeping the casualty safe (<i>removing dangers</i>)</li> <li>◆ Noting the time and duration of the seizure</li> <li>◆ Opening airway and checking breathing post seizure</li> <li>◆ Determining when to call 999/112</li> </ul> <p><b><i>Administering first aid includes providing help for the casualty, managing the situation and seeking appropriate assistance when necessary</i></b></p> <p><b><i>First aiders should be suspicious of cardiac arrest in any casualty presenting with seizure.</i></b></p>
4	Be able to provide first aid to a casualty who is choking.	4.1 Identify when a casualty is choking.	<p>Identifying mild choking may include recognising the casualty is still able to:</p> <ul style="list-style-type: none"> <li>◆ speak</li> <li>◆ cough</li> <li>◆ breathe</li> </ul> <p>Identifying severe choking may include recognising the casualty is:</p> <ul style="list-style-type: none"> <li>◆ unable to cough effectively</li> <li>◆ unable to speak</li> <li>◆ unable or struggling to breathe</li> <li>◆ in visible distress</li> <li>◆ unconscious</li> </ul>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
		4.2 <b>Demonstrate</b> how to administer first aid to a casualty who is choking.	<p>Administering first aid for choking should include the following:</p> <ul style="list-style-type: none"> <li>◆ Encouraging to cough</li> <li>◆ Giving up to 5 back blows if needed</li> <li>◆ Giving up to 5 abdominal thrusts if needed</li> <li>◆ Calling 999/112 when required</li> <li>◆ CPR if unconscious</li> </ul> <p><b><i>Demonstration of choking management must be simulated using a training device on manikin/self and not another learner.</i></b></p>
5	Be able to provide first aid to a casualty with external bleeding.	5.1 Identify whether external bleeding is life-threatening.	<p>Identifying the severity of arterial bleeding may include recognising that arterial blood:</p> <ul style="list-style-type: none"> <li>◆ Is under pressure</li> <li>◆ spurts in time with the heartbeat</li> <li>◆ <b><i>Is a life-threatening emergency.</i></b></li> </ul> <p>Identifying the severity of venous bleeding may include recognising that venous blood:</p> <ul style="list-style-type: none"> <li>◆ Is comparable in volume to an arterial bleed</li> <li>◆ Flows profusely from the wound</li> <li>◆ <b><i>Is a life-threatening emergency.</i></b></li> </ul> <p><i>Identifying capillary bleeding may include recognising that blood trickles from the wound. <b>Capillary bleeding is not a life-threatening emergency.</b></i></p>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
		5.2 <b>Demonstrate</b> how to administer first aid to a casualty with external bleeding.	<p>Administering first aid for external bleeding may include:</p> <ul style="list-style-type: none"> <li>◆ Maintaining aseptic technique</li> <li>◆ Siting or laying the casualty</li> <li>◆ Examining the wound</li> <li>◆ Applying direct pressure onto (<i>or into</i>) the wound</li> <li>◆ Dressing the wound</li> </ul> <p>Catastrophic bleeding treatment may include:</p> <ul style="list-style-type: none"> <li>◆ Wound packing</li> <li>◆ Tourniquet application</li> <li>◆ Improvised tourniquet application</li> </ul>
6	Know how to provide first aid to a casualty who is suffering from shock.	6.1 Recognise when a casualty is suffering from <b>shock</b> .	<p>Hypovolaemic shock recognition may include:</p> <ul style="list-style-type: none"> <li>◆ Pale, clammy skin</li> <li>◆ Fast, shallow breathing</li> <li>◆ Rise in pulse rate</li> <li>◆ Cyanosis</li> <li>◆ Dizziness/passing out when sitting or standing upright</li> </ul> <p><b><i>Hypovolaemic shock (resulting from blood or fluid loss).</i></b></p>
		6.2 Identify how to administer first aid to a casualty who is suffering from <b>shock</b> .	<p>Administering first aid for hypovolaemic shock may include:</p> <ul style="list-style-type: none"> <li>◆ Treating the cause</li> <li>◆ Casualty positioning</li> <li>◆ Keeping the casualty warm</li> <li>◆ Calling 999/112</li> </ul>

Learning outcomes —		Assessment Criterion —	Indicative content —
The learner will:		The learner can:	Context for learning:
7	Know how to provide first aid to a casualty with minor injuries.	7.1 Identify how to <b>administer first aid</b> to a casualty with: <ul style="list-style-type: none"> <li>◆ Small cuts/grazes</li> <li>◆ Bruises</li> <li>◆ Small splinters</li> <li>◆ Nosebleeds</li> </ul>	<p>Administering first aid for small cuts and grazes may include:</p> <ul style="list-style-type: none"> <li>◆ Irrigation</li> <li>◆ Dressing</li> </ul> <p>Administering first aid for bruises may include:</p> <ul style="list-style-type: none"> <li>◆ Cold compress for 10 minutes</li> </ul> <p>Small splinter removal may include the following steps:</p> <ul style="list-style-type: none"> <li>◆ Cleaning of area</li> <li>◆ Remove with tweezers</li> <li>◆ Dress</li> </ul> <p>Administering first aid for a nosebleed may include:</p> <ul style="list-style-type: none"> <li>◆ Sitting the casualty down, head tipped forwards</li> <li>◆ Pinching the soft part of the nose</li> <li>◆ Telling the casualty to breathe through their mouth</li> </ul>
		7.2 Identify how to <b>administer first aid</b> to a casualty with minor burns and scalds.	<p>Administering first aid for minor burns and scalds may include:</p> <ul style="list-style-type: none"> <li>◆ Cooling for at least 20 minutes</li> <li>◆ Removing jewellery and loose clothing</li> <li>◆ Covering the burn</li> <li>◆ Determining when to seek advice</li> </ul>

<b>Additional information about the unit</b>	
<b>Indicative content</b>	The purpose of the indicative content in this unit is to provide an indication of the context behind each assessment criteria. This is not intended to be exhaustive or set any absolute boundaries.
<b>Unit purpose and aims</b>	The purpose of this unit is for the learner to attain knowledge and practical competences required to deal with a range of workplace first aid situations.
<b>Details of the relationship between the unit and relevant national occupational standards or other professional standards or curricula (if appropriate)</b>	First Aid at Work Health and Safety (First Aid) Regulations 1981 <i>Guidance on Regulations (L74)</i> .  Resuscitation Council (UK) Guidelines.
<b>Assessment requirements or guidance specified by a sector or regulatory body (if appropriate)</b>	The unit should be delivered, assessed and quality assured in accordance with <i>Assessment Principles for Regulated First Aid Qualifications</i> .
<b>Support for the unit from an SSC or other appropriate body</b>	Health and Safety Executive.
<b>Location of the unit within the subject/sector classification system</b>	Health and Social Care.
<b>Availability for use</b>	Restricted to Awarding Organisations (AOs) who meet the Terms of Reference of the First Aid Awarding Organisation Forum.
<b>Unit available from</b>	30 September 2022.
<b>SCQF level</b>	6
<b>SCQF Credit</b>	1
<b>Guided Learning Hours (GLH)</b>	6
<b>Total Qualification Time (TQT)</b>	7
<b>Simulation</b>	Simulation is permitted in this unit. The following ACs must be assessed by practical demonstration: 2.1, 2.2, 3.2, 3.4, 3.5, 4.2, 5.2.
