

# Subject guidance for internally assessed qualifications in 2021-22

Please read this document in conjunction with [guidance for the assessment of internally assessed qualifications issued to centres in August 2021](#).

<b>Group Award title(s):</b>	PDA Carpentry and Joinery at SCQF Level 6
<b>Group Award code(s):</b>	GM4P 46

## Units and/or outcomes where conditions of assessment can or cannot be altered

### Practical work assessments

For any unit in the Construction Craft PDAs where any practical work is still to be assessed, no alternative arrangements are acceptable. **Therefore, the assessment of the outstanding practical activity must be deferred until it can be carried out according to the normal guidance.**

However, if a candidate has already been assessed for a similar practical activity within another unit in the PDA at SCQF Level 6 or as part of the SVQ at SCQF Level 6, then this evidence can also be used for other PDA units of the same level of demand, either partially or as a whole.

Please remember that evidence (be it practical or knowledge) can be used more than once across various units, learning outcomes, performance criteria and qualifications.

If this is not possible, then the assessment of the outstanding practical activity must be deferred until it can be carried out according to the normal guidance.

## Adaptations to evidence requirements to help manage assessment

With centres moving to more blended learning approaches, and with significantly less opportunity for face-to-face delivery, training and assessment, time with learners will become increasingly valuable and needs to be used to the best effect to engage, motivate and support the learning journey.

In support of this, we are encouraging centres, and course teams, in particular, to continue to consider and plan more innovative approaches to the delivery of the Construction Craft PDAs.

Centres should also remember that while adaptations to assessment are not possible, adaptations to the delivery of the PDAs learning, teaching and training can be adapted without recourse to SQA. For example, centres may consider:

- ◆ Delivering the PDA programme over a longer period of time to facilitate more face-to-face learning, training and assessment.
- ◆ Assessing the practical components of the PDA when candidates are in college and assessing knowledge remotely.
- ◆ Adapting the 'practical training' aspects of each Training and Assessment (TAPs). These activities are designed to prepare the candidates for practical assessment by developing the skills and techniques which were formally assessed. So, adapting and combining 'practical training' could avoid duplication.
- ◆ Additionally, if any SVQ assessed evidence from the workplace is being used as evidence for a PDA unit (TAP) this would also obviate the need to undertake the 'practical training' and assessment for the PDA unit (TAP).

## **Rationale**

Centres should ensure that the alternative assessment is of the same SCQF level as the original assessment requirements.

A centre-led approach is encouraged towards maintaining quality standards, however direct support from SQA remains available where required.

SQA and the team of external verifiers will host MS Team Quality Network events in late 2021 and early 2022 to support centres and share good practice.
