Unit specification

Keeping Safe: Adult Relationships (National 1)

Unit code:	J5H2 71
SCQF:	level 1 (6 SCQF credit points)
Valid from:	session 2021–22

This document provides detailed information about the unit to ensure consistent and transparent assessment year on year.

This document is for teachers and lecturers and contains all the mandatory information required to deliver and assess the unit.

The information in this document may be reproduced in support of SQA qualifications only on a non-commercial basis. If it is reproduced, SQA must be clearly acknowledged as the source. If it is to be reproduced for any other purpose, written permission must be obtained from permissions@sqa.org.uk.

Unit outline

The aim of this unit is to provide learners with opportunities to explore different adult relationships they may encounter as they enter adulthood. The unit helps learners to be aware of relationships that may be safe for them, and those that may be unsafe.

Learners who complete this unit will be able to:

- 1 identify different relationships that exist between adults
- 2 investigate personal safety in adult relationships
- 3 give a response to activities involving safe adult relationships

This unit is a mandatory unit within the Adult Learning and Transition Award (SCQF level 1). Please read this unit specification in conjunction with the unit support notes, which provide advice and guidance on delivery, assessment approaches, and developing skills for learning, skills for life and skills for work.

Exemplification of the standards in this unit is given in unit assessment support.

Recommended entry

Entry to this unit is at the discretion of the centre. Relevant experiences and outcomes may provide an appropriate basis for doing this unit.

Standards

Outcomes and assessment standards

Outcome 1

1 Identify different relationships that exist between adults by:

- 1.1 identifying a trusted adult relationship
- 1.2 participating in an activity that identifies other adult relationships

Outcome 2

2 Investigate personal safety in adult relationships by:

- 2.1 identifying places and people that make you feel safe
- 2.2 participating in an activity that explores what to do if an adult relationship makes you feel unsafe

Outcome 3

3 Give a response to activities involving safe adult relationships by:

- 3.1 communicating whether you liked or disliked the activities

Evidence requirements for the unit

You should use your professional judgement, subject knowledge and experience, and understanding of your learners, to determine the most appropriate ways to generate evidence, and which conditions and contexts to use.

Evidence for this unit could include observation checklists, logs, short recorded oral responses, photographic evidence or equivalent. You should be confident that there is enough evidence to support your judgement that the assessment standards have been met:

- ◆ outcome 1: the learner must identify one trusted adult relationship as part of an activity, and two other types of adult relationship
- ◆ outcome 2: the learner must identify one place where they feel safe and one adult that makes them feel safe. They must also participate in an activity exploring what action they should take if they feel unsafe in an adult relationship
- ◆ outcome 3: the learner must give a response (positive or negative) to the activities they participated in

Learners will normally receive a high degree of support to achieve the outcomes of the unit. It is your responsibility to ensure that the level of support is appropriate for the requirements of the unit.

Unit assessment support provides exemplification of assessment.

Skills for learning, skills for life and skills for work

This unit helps learners to develop broad, generic skills. These skills are based on [SQA's Skills Framework: Skills for Learning, Skills for Life and Skills for Work](#) and draw from the following main skills areas:

1 Literacy

1.3 Listening and talking

You must build these skills into the unit at an appropriate level, where there are suitable opportunities.

Equality and inclusion

This unit is designed to be as fair and as accessible as possible with no unnecessary barriers to learning or assessment.

You should take into account the needs of individual learners when planning learning experiences, selecting assessment methods or considering alternative evidence. The unit support notes provide further information.

Guidance on assessment arrangements for disabled learners and/or those with additional support needs is available on the assessment arrangements web page:

www.sqa.org.uk/assessmentarrangements

Appendix: unit support notes

Introduction

These support notes are not mandatory. They provide advice and guidance to teachers and lecturers on approaches to delivering the unit. Please read these unit support notes in conjunction with the unit specification and appropriate assessment support materials.

Developing skills, knowledge and understanding

You are free to select the skills, knowledge, understanding and contexts that are most appropriate.

Learners who complete this unit will be able to participate in activities involving different adult relationships they may encounter, and ensuring personal safety in relation to relationships with other adults.

Approaches to learning and teaching

This section provides general advice and guidance on approaches to learning and teaching that you can use to deliver this unit.

At SCQF level 1, learners require varying degrees of support, depending on their needs. Some learners may:

- ◆ take part at an experiential or sensory level, requiring full support
- ◆ require frequent direction and support to enable them to take part
- ◆ take part independently or with intermittent support

You should give learners as much support as they need to engage with learning, teaching and assessment activities while maintaining the integrity of the outcomes and assessment standards.

The following table provides examples of approaches to learning and teaching. These may also provide naturally occurring evidence that you can use to assess learners against the assessment standards.

Keeping Safe: Adult Relationships

Outcome 1: identify different relationships that exist between adults

Outcome 2: investigate personal safety in adult relationships

Outcome 3: give a response to activities involving safe adult relationships

Assessment standards

1.1 identifying a trusted adult relationship

1.2 participating in an activity that identifies other adult relationships

Approaches for learning and teaching

This unit provides learners with opportunities to explore the different adult relationships they may encounter both currently and in the future.

Examples of adult relationships might include:

- ◆ family member
- ◆ friend or new friend
- ◆ boy or girlfriend
- ◆ spouse
- ◆ teacher or lecturer
- ◆ employer or employee
- ◆ social worker
- ◆ support worker
- ◆ care provider or service user

Activities might involve an Euler (circle of trust) diagram, or other tools that you can use to help learners consider the various adult relationships that are important in their lives or that they may encounter in the future.

Sorting activities may also suit some learners, with exercises involving people the learner knows being sorted into groupings depending on the type of relationship they have.

Activities for this outcome could be linked to activities for the Preparing for Adult Life (National 1) unit.

Assessment standards	Approaches for learning and teaching
<p>2.1 identifying places and people that make you feel safe</p> <p>2.2 participating in an activity that explores what to do if an adult relationship makes you feel unsafe</p>	<p>Some learners may be involved in the production of their communication passport, which will identify levels of safety in adult relationships they may have in the future.</p> <p>It may be helpful for some learners to make lists or categories of adult relationships, and then identify which of these the learner considers as safe or unsafe.</p> <p>Safe places and safe relationships should be explored in a variety of environments, for example:</p> <ul style="list-style-type: none"> ◆ in the learner’s home ◆ in their learning centre ◆ in other venues the learner may regularly attend <p>You could consider role-play or simulations to explore what a learner should do if they are in the company of an adult that they feel unsafe with.</p>
<p>3.1 communicating whether you liked or disliked the activities</p>	<p>You should encourage learners at SCQF level 1 to:</p> <ul style="list-style-type: none"> ◆ express an opinion ◆ show a preference ◆ make a decision about things they are being asked to do <p>You can ask learners at various points during the unit whether they are enjoying what they are doing or not.</p> <p>Learners should use their normal communication method when participating in the unit. You should use your knowledge of the learner, and of their preferred method of communication, to record the learner’s responses and their level of engagement.</p> <p>The learner’s normal communication method might involve:</p> <ul style="list-style-type: none"> ◆ facial expression ◆ vocalisation ◆ verbal communication ◆ signing ◆ use of symbols or other augmentive communication systems ◆ written responses

Centres may find resources on the [RSHP Scotland website](#) helpful when delivering this unit.

Approaches to assessment and gathering evidence

There is no external assessment for National 1 units. All units are internally assessed against the requirements outlined and described in the unit specification and the unit assessment support pack.

To achieve the unit, learners must achieve all the unit outcomes.

At SCQF level 1, most evidence for assessment is gathered on a naturally occurring, ongoing basis, rather than from more formal assessment methods. There are many contexts that you might use for gathering evidence, for example extra-curricular and/or outdoor learning.

Naturally occurring evidence is evidence that occurs in and as part of learning and teaching, which you can gather for assessment purposes in a variety of ways:

- ◆ observation of evidence demonstrated during an activity (using an observation checklist, visual recording, photography or equivalent)
- ◆ oral questioning before, during, and on completion of an activity (recorded using an audio-visual or audio recording or using your detailed written notes as evidence)
- ◆ learning and teaching activities that generate physical evidence for assessment
- ◆ identifying opportunities to record evidence during out-of-centre activities

You should focus on small, well-defined steps in learning. In this way, the learner is more likely to achieve success in the units and in any subsequent learning.

Learners benefit from receiving accurate and regular feedback regarding their learning. This helps to ensure they are actively involved in the assessment process. It is important that you use different approaches to assessment to suit the varying needs of learners.

Combining assessment within units

It may be possible to reduce the volume of assessment for this unit by designing broad assessment tasks that cover a number of assessment standards and/or outcomes at one time. However, for some learners it may be more appropriate to design assessment tasks that include smaller steps and/or repetition, which could help with the retention and reinforcement of learning.

Developing skills for learning, skills for life and skills for work

This section highlights the skills for learning, skills for life and skills for work that learners should develop in this unit. These are based on SQA’s Skills Framework: Skills for Learning, Skills for Life and Skills for Work and should be built into the unit where there are appropriate opportunities. The level of these skills will be appropriate to the level of the unit.

Some examples of potential opportunities to practise or improve these skills are provided in the following table.

Skills for learning, skills for life and skills for work	Approaches for learning and teaching
<p>1 Literacy</p> <p>1.3 Listening and talking:</p> <ul style="list-style-type: none"> ◆ listening means the ability to understand and interpret ideas, opinions and information presented orally for a purpose and within a context, drawing on non-verbal communication as appropriate ◆ talking means the ability to communicate orally ideas, opinions and information for a purpose and within a context 	<p>Where appropriate, learners could use their normal communication method during learning and teaching activities to:</p> <ul style="list-style-type: none"> ◆ communicate, for example information about different adult relationships ◆ respond, for example the learner identifies their safe places and the adults they feel safe with

It is important that you provide learners with opportunities to develop these broad general skills as an integral part of their learning experience.
